Course Overview
The course builds the skills and knowledge needed for the organizational management of a small water and wastewater utility in rural Alaska. The instructors present eight lessons with topics that include level of service, organizational structures, roles, authority, responsibilities, and accountability, utility ordinance, customer agreements, communication and administration. See “Course Content” below for details within each lesson.

The course is 32 hours long and can be taught online using a learning management system or in person at one of our office locations. If the course is taught in person travel scholarships are available for those who successfully complete the class.

Who Should Take the Course?
Municipal clerks, utility clerks, treasurers, bookkeepers, managers, administrators, chiefs, mayors, and council members who are involved in the managerial and financial operations of the utility. In the RUBA program’s partnership with the Department of Environmental Conservation, water and wastewater operators can earn 3.2 core continuing education units (CEUs).

Operations and Maintenance Best Practices
The course qualifies for Operation and Maintenance Best Practices points used to determine eligibility and prioritization for community sanitation projects. Here is the link to more information about Best Practices.

Operations and Maintenance Best Practices

Homework and Attendance Policy
Students are expected to attend each day, read lesson materials before class, participate in discussions and lesson exercises take a pre-test and post-test, and draft action plans to take back to their communities.

Additional Information
