VI. Staff Reports

a. Alaska Broadband Grant Program (Director Lochner)

Director Lochner gave a summary of the status of the Alaska Broadband Grant Program. The summary included an explanation of the two extensions the ABO received to submit the Final Proposal to NTIA. Director Lochner further explained the ABO is currently working with NTIA to confirm subgrantee selection for grant awards. Director Lochner also explained the ABO will post the Final Proposal for a seven-day public comment period, the start of which is to be determined.

Director Lochner stated that during the application period for the Alaska Broadband Grant Program, NTIA advised the ABO incorrect service-level data had been provided for some Broadband Serviceable Locations (BSL). NTIA provided the ABO with the correct data which resulted in a seven-day extension of the application period for the grant program so applicants could have access to the corrected data and apply it to their applications as necessary.

Director Lochner also stated that during the application review period, the ABO provided applicants with a 36-hour cure period to correct deficiencies.

Public Attendee Stephanie Fan asked if there will be a copy of the draft Final Proposal that will be available during the public comment period. Director Lochner responded in the affirmative and stated that the draft will include the required BSL data spreadsheets and subgrantee selection.

Public Attendee Shawn Williams asked if the extension information is available on the ABO website and Director Lochner responded that the information is not on the website because the information is tentative. Shawn Williams also asked if the incorrect BSL data was identified before or after the application deadline. Director Lochner clarified that the issue was identified and corrected prior to the application deadline and the deadline was extended seven days to accommodate any necessary revisions to applications.

Public Attendee Lewis Schnaper asked if the ABO had provided a seven-day cure period for applicants and the Director corrected that there was thirty-six-hour cure period and that there would be a seven-day public comment period announced soon.

Board Member Michael Brase asked if Director Lochner could articulate what the data change was. Director Lochner stated that due to a revocation of an award through another Federal broadband grant program, several were classified as underserved when they needed to be classified as unserved. There were no changes to the total BSL count – only reclassification of current BSLs.
