APPENDIX C

AERIAL PHOTOGRAPHS
Site Reconnaissance Photographs

Landfill (#15 on Figure 1)

Photo 1: Looking east at landfill across Newtok River at low tide.

Photo 2: Boardwalk leading to landfill
Site Reconnaissance Photographs

Landfill (#15 on Figure 1)

Photo 3: Landfill contents

Photo 4: Landfill contents and burn box
Site Reconnaissance Photographs

Hazardous Materials Shed behind NTC Building (#5 on Figure 1)

Photo 5: Hazardous materials shed

Photo 6: Some material falling out of the shed
Site Reconnaissance Photographs

Appliance / Snow Machine Staging Area (#7 on Figure 1)

Photo 7: Looking south at staging area

Photo 8: Staging area contents, Old BIA School in the background
Site Reconnaissance Photographs

Bagged Waste Staging Area (#8 on Figure 1)

Photo 9: Bagged waste slated for transport across the river to landfill

Newtok School Tank Farm (#1 on Figure 1)

Photo 10: Tank farm, damaged fence, drum storage within containment area
Site Reconnaissance Photographs

Newtok School Tank Farm (#1 on Figure 1)

Photo 11: Hydrocarbon staining and stressed vegetation in SW corner. Containment wall in disrepair.

Photo 12: Rust staining in SE corner
Site Reconnaissance Photographs

Newtok School Tanks (#1 on Figure 1)

**Photo 13:** 250 gallon tank with metal container box below.

**Photo 14:** Stressed vegetation near power generation conex 2000 gallon tank.
Site Reconnaissance Photographs

Old BIA School Tank Farm (#9 on Figure 1)

Photo 15: Fencing in disrepair, wood platforms subsiding

Newtok Village Council Tank Farm (#12 on Figure 1)

Photo 16: Vertical tank farms
Site Reconnaissance Photographs

Newtok Village Council Tank Farm (#12 on Figure 1)

Photo 17: Creosote treated wood platforms, containment wall in good condition

Photo 18: Horizontal tank farm
Site Reconnaissance Photographs

Ungusraq Power Company Tank Farm (#14 of Figure 1)

Photo 19: UPC tank farm

Photo 20: Inside tank farm, hydrocarbon staining below fill spouts.
Site Reconnaissance Photographs

Newtok Traditional Council Tanks (#13 on Figure 1)

Photo 21: 10,000 gallon, double walled tank, no longer being used.

Photo 22: 3000 gallon tank, in use, no secondary containment.
Site Reconnaissance Photographs

Tom’s Store Tanks (#10 on Figure 1)

Photo 23: 10,000 gallon, double walled tank, empty and out of service

Photo 24: 3000 gallon tank, no secondary containment, empty and out of service.
Site Reconnaissance Photographs

Sewage Lagoon (#6 on Figure 1)

Photo 25: View on sewage lagoon, Newtok River in background.

Photo 26: Piping from washeteria in the background. Piping from Newtok School in the foreground.
Site Reconnaissance Photographs

UPC Generator Building (#4 on Figure 1)

Photo 28: UPC generator building and washeteria water holding tank

Photo 27: Significant oil staining below building.
Site Reconnaissance Photographs

UPC Generator Building (#4 on Figure 1)

Photo: Oil stained soil near genset motor.

Old BIA School Building (#9 on Figure 1)

Photo: School built in the 1960s. Building is boarded up and no longer used.
Site Reconnaissance Photographs

BIA Built Home – Earliest Newtok Housing

Photo 32: Flooring a mix of old and new tiles with potential for ACM.

Photo 31: Peeling paint may be lead containing or lead based.

Newer Houses

Photo 33: Most homes have a heating oil tank.
