

Source Owner or Location	Potential or Known Hazardous Material Sources	Potential Contaminants of Concern	Estimated Volume (cubic yards unless otherwise noted)
Newtok School	Heating oil fuels, creosote treated wood platforms, drums containing: paint thinner, mixed waste, waste oil, dirty water waste, used glycol. Potential asbestos in building and fluorescent lights. Storage shed containing gasoline and oil containers, insulation material.	Hydrocarbons, Creosote, Metals, Asbestos, PCBs, Glycols	50 - 50 gallon drum materials Creosote treated wood: 105 yd ² Contaminated soils: 140
