Available products may include previously issued Letters of Map Change, a Flood Insurance Study Report, an updated Flood Insurance Rate Map, and flood hazard data presented in the FIS Report. For information on available products associated with this FIRM, visit the Flood Insurance Program website at http://www.fema.gov or contact the FEMA Public Information Center at 877-4FEMA (1-877-433-6662) or visit the NFIP website at http://www.floodsmart.gov.

A Flood Insurance Rate Map, or FIRM, is a map published by the Federal Emergency Management Agency (FEMA). The FIRM identifies flood hazards, the floodplain, and Base Flood Elevations. It is used by FEMA in conjunction with the National Flood Insurance Program (NFIP) to make floodplain information available to the public and governmental agencies for administrative and emergency management purposes. FEMA issues FIRM revisions to reflect changes in flood hazard, such as changes in floodplain boundaries, elevation data, and updated flood hazard information. A FIRM is valid until the issuance of a new FIRM. This FIRM was published on April 12, 2012.

Any discrepancy between the FIRM and the Summary of Stillwater Elevations table should be reported to the FEMA Public Information Center at 877-4FEMA (1-877-433-6662) or visit the NFIP website at http://www.floodsmart.gov.

For a copy of the Summary of Stillwater Elevations table, contact the Alaska Division of Safety and Risk Management at 907-465-2525.

Current areas in Special Flood Hazard Areas may be protected by flood control structures. Flood control structures are used to reduce flooding and protect property and lives. Flood control structures are typically levees, dams, or other structures designed to control the flow of water and prevent flooding.

To obtain more detailed information in areas where flood hazard exists, contact the Federal Emergency Management Agency at 877-4FEMA (1-877-433-6662) or visit the NFIP website at http://www.floodsmart.gov. Local Community Leaders and government officials should also be contacted for more detailed and updated flood hazard information.
