Re: Comments on 2nd Class City Application.

Dear Sirs:

Thank you for visiting our community and giving us an opportunity to comment on the Second Class City Proposal. Our community association supports the application.

Our primary reasons for seeking to become a 2nd class city are two fold, one is to have more control over the future of our community and to be in a better position to secure the funding necessary to provide services for community residents.

Previously, we have been able to obtain support for community services through various State funded programs and with the State's current fiscal problems, we expect funds obtained through these these sources to be problematical.

Thank you for the opportunity to comment.

Sincerely,

Robert M Meyer, President
Whale Pass community Association
