### Yukon Flats

#### Regional Education Attendance Area School Board Recasting

Alaska Statutes at AS 14.08.051(c) require that within 90 days of the Federal decennial census, the Commissioner of the Department of Education and Early Development, in consultation with the Department of Commerce, Community, and Economic Development and the local communities, must review the school board apportionment scheme of each Regional Education Attendance Area (REAA) to determine if it meets the standards contained at AS 14.08.051(a). The standard is that each school board member must represent, “as nearly as practicable, an equal number of persons.”

A generally accepted standard for equal representation is that the population represented by each school board member not vary more than plus or minus five percent from the average. The average is determined by taking the total population of the REAA and dividing it by the total number of school board seats. When current representation varies by more than plus or minus five percent, the Commissioner must recast the boundaries of each section to more closely meet the standard.

Under the existing school board apportionment scheme for the Yukon Flats REAA, the overall deviation is 29.19 percent. Accordingly, to more closely meet the equal representation standard, the options identified below (*see attached map*) are being put forth for discussion and public comment. One of these options, or an option identified through the public comment process, may be recommended to the Commissioner for adoption as a replacement for the existing apportionment scheme.

Yukon Flats REAA has three sections containing a total of seven school board seats. Section I has two seats and includes the communities of Arctic Village, Beaver, and Venetie. Section II has three seats and includes the City of Fort Yukon and the community of Birch Creek. Section III has two seats and includes the communities of Central, Chalkyitsik, Circle, Livengood, Rampart, and Stevens Village.

- Option B moves Beaver from Section I into Section II and areas north of Chalkyitsik from Section I into Section III. Option B has an overall deviation of 5.57%.

**Based on the REAA's demographic, socio-economic, linguistic, transportation, cultural, and communication considerations, the recommendation for the Yukon Flats REAA is to implement Option B.**
