

Alakanuk Activity Report

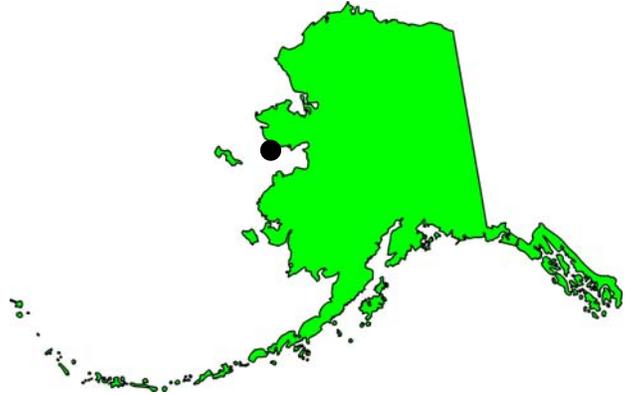

Community Overview

Lead RUBA Staff: Paul Chimiugak, Bethel Office

2003 Population: 666

Region: Lower Yukon

Local Governments: 2nd Class City

The City of Alakanuk operates the piped water and sewer system, the central watering point, flush tank and haul system, and washeteria/sauna service. The City Council is the policy making body for the Utility. Construction began in 1995 to provide piped water and sewer to 170 homes and the school. In 1998, 83 homes, the school and teacher's housing were first connected. Today, there are 132 utility customers hooked up to the system. Water is derived from the slough, treated, stored in a tank, and piped to most of the community. New facilities include a water treatment plant, heated 300,000-gallon water storage tank, vacuum sewage plant, sewage lagoon, arctic piping and household plumbing. The new subdivision has been completed with all homes connected to the piped system. Plans to hook up the other side of the river are in the near future. The new airport construction is on-going.

RUBA Activity This Reporting Period

The city has hired an interim administrator. The city council had a meeting on the 21st of September and made a motion to pull out of an agreement with YKHC/RUC. There will be a negotiation meeting between LYSD, YKHC, and the city on October 10th in Mountain Village. The motion to pull out was based on the YKHC wanting to charge w/s fee to the school. The school has been getting free w/s in return for storing city fuel in the school bulk fuel storage tanks, a result of an agreement made in the 1970's.

Capacity Indicators

Finances

Essential Indicators

- | Yes | No | |
|-------------------------------------|-------------------------------------|--|
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | All revenue and expenses for the utility are listed in the utility budget. |
