

Chalkyitsik Activity Report

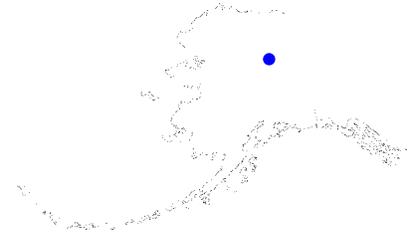

Community Overview

Lead RUBA Staff: Eileen Kozevnikoff, Fairbanks Office

2001 Population: 83

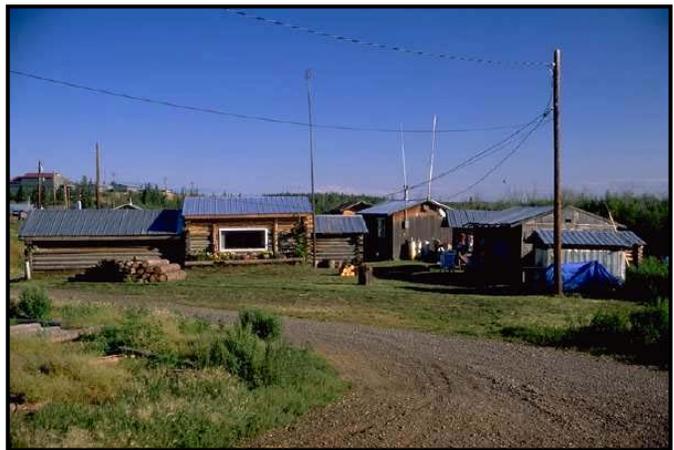

Region: Interior

Local Governments: Village Council

The Village Council operates the one central watering point. The Village Council is the policy making body for the utility.

Most residents haul water from the new water treatment plant/washeteria and use honeybuckets or outhouses for sewage disposal. The village provides water to the school. A Master Plan is underway to study system improvements needed to provide a community system.

General Information

There was no activity with Chalkyitsik this quarter.

Observations and Recommendations

Finances — The council has adopted a budget and financial reports are being prepared. Staff report to the council on a monthly basis. The utility meets all minimum requirements for this category.

Accounting Systems — The system is working as implemented with no problems reported. The utility meets all minimum requirements for this category.

Tax Problems — They are current with payroll tax reports and payments.

Personnel System — They have a Personnel Policy which they use, however it needs revision. They have written job descriptions and a written hiring process. They have personnel folders that contain all the necessary information. They are advertising for an

Administrative Assistant to help with the bookkeeping and grant reporting. They do have a written Organizational Chart and carry workers' compensation insurance.

Organizational Management — They know they own and operate the utility services. The Council meets as required and on short notice as needed. The Council meets and discusses many issues including utility services and sets policy for the utility. All positions are filled with competent personnel and if certification is a requirement, the council assures they receive the training for certification. The Council has adopted a utility ordinance to operate its facility and they comply with the "Open Meetings Act" for all meetings.

Operation of Utility – Two certificated operators are working a two weeks on and two weeks off shift. The utility is in compliance with testing requirements of DEC. The utility has a preventive maintenance plan; provides status reports to the council on a monthly basis; has completed their Consumer Confidence Report and distributed it. They do not maintain an inventory list nor do they have a critical spare parts list.
