

Chefornak Activity Report

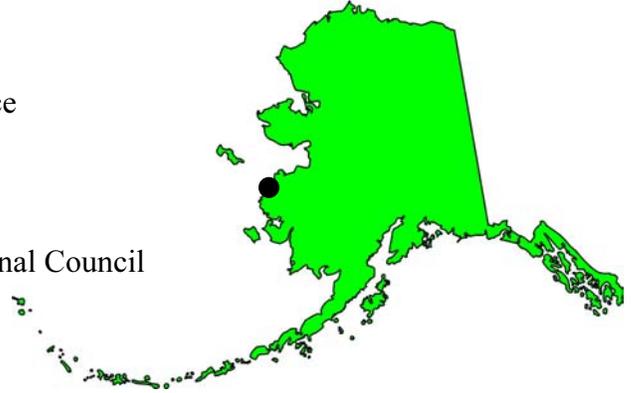

Community Overview

Lead RUBA Staff: Paul Chimiugak, Bethel Office

2001 Population: 394

Region: Yukon-Kuskokwim Delta

Local Governments: Second Class City, Traditional Council

The Village Council operates the multiple watering points and manages the honeybucket haul system. The Village Council is the policy making body for the utility.

Twelve wells provide potable water for Chefornak; residents haul from watering points. Some residents melt ice in the winter or use rain catchment systems in the summer. Some residents use river water. The infrastructure to develop a flush/haul system was started in 1998. 50 residences use honeybuckets; 24 homes use tank haul. The school well is inadequate; the water is too salty. The community wants a piped system.

RUBA Activity This Reporting Period

RUBA staff traveled to Chefornak in February to conduct an assessment and to assist the utility staff in setting up a monthly financial report form for them to use. The utility has a problem with retaining staff, thus they have occasional turnovers in either the Manager or Clerk position.
