

Crooked Creek Activity Report

Leroy Seppilu, LGS/RUBA, Anchorage Regional Office

General Information:

There has been no activities during this quarter. Efforts to make contacts with the new tribal president were fruitless.

Anticipated Activity

A contract engineer for ANTHC has been inviting RUBA to attend a meeting to discuss a master plan for the community. The community meeting has been postponed at least three times the last several months. Seppilu had asked the engineer to let him know of the next meeting well ahead of time, but the earliest he has done has been about 4 days ahead. Therefore, RUBA staff have not been able to attend, but as mentioned, the meetings have been cancelled. RUBA staff would like to attend if informed at least couple of weeks ahead of the planned meeting. We'll keep trying.
