The City of Deering operates the piped water & sewer system, central watering point and water delivery haul system. The City Council is the policy making body for the utility.

Water is derived from the Inmachuk River; is treated and pumped to a 400,000-gallon insulated storage tank. Water is delivered to home tanks or hauled from the watering point. Major improvements are under construction for a water haul and vacuum sewer system. A new washeteria and water treatment plant are nearing completion. Archaeological remains were discovered while excavating for the new system. The City would like to purchase an incinerator with waste heat recovery to reduce the volume of refuse.

RUBA Activities For The Coming Quarter

The Kotzebue RUBA staff will travel to Deering this next quarter to provide on site training and assistance to the council on utility roles and responsibilities, review their current organizational structure and approve a new organizational chart. RUBA will also review their current rate structure, and get them to look at saving funds in an account for repair and replacement.

Since they have not been successful in getting an administrator for the last year and a half, RUBA staff will assist them with either hiring an administrator or creating a strong Mayor form of government
