

Gulkana Activity Report

Community Overview

Lead RUBA Staff: Greg Gould, Anchorage Office
 2002 Population: 83
 Region: AHTNA
 Local Government: Village Council

Water is currently derived from a well, is treated and stored in a 100,000-gal. tank. Due to iron and magnesium levels, new infiltration galleries on the Gulkana River and water treatment improvements are under construction. A piped water and sewer system serves most homes. A community septic tank treats wastewater. Individual wells and septic tanks are also used by a number of residences.

A Master Plan has been recently completed to examine connection of all homes to a new system. Permafrost and high water tables are problematic in this region. The PHS constructed a Laundromat in 1976, but it is not functioning -- a washeteria is needed in the community.

RUBA Activity This Quarter

RUBA staff did not have any travel to Gulkana this quarter. The village bookkeeper attended the introductory QuickBooks class in Anchorage. At last report the village was planning to install and convert their system to the QuickBooks system on January 1. The village scored well on the VSW applications and stands a good chance of being funded for the water sewer projects identified in the master plan.
