

Hooper Bay Activity Report

Community Overview

Lead RUBA Staff: Marita Hansen, Bethel Office

2003 Population: 1,115

Region: Yukon-Kuskokwim Delta

Local Governments: 2nd Class City

The City of Hooper Bay operates multiple watering points, operates a honeybucket haul service and sewage lagoon. The City Council is the policy making body for the utility. Residents currently haul treated water from the washeteria or other watering points. Three new wells were drilled in 1997, 3 miles northeast of town. The school uses its own water system. Honeybuckets are dumped at collection points, then hauled by a 4-wheeler and trailer. Access roads and construction pads are completed. The landfill was expanded in 1997, and includes a new sewage lagoon; the combined site is nearly 20 acres in size. The new water/sewer project construction was underway and the shell of the building itself was completed. Project continues as long as the community meets the grant condition showing capability of financially supporting this project through a sanitation tariff.

RUBA Activity This Reporting Period

This quarter the City of Hooper Bay continues to meet the special grant condition of maintaining a 75% collection rate. Surveys for road construction from the previous quarter have been postponed due to the salmon road permit. Road damages have occurred again by the recent fall storm and flood. There are other damages that are being evaluated which range from individual subsistence equipment such as boats, motors, fishing nets and fish camps. There are also roofs of homes that have been damaged due to the high winds. The City is in the process of putting together a local disaster declaration. The fall storm delayed projects but continue to be on-going projects such as the playground, youth/elder building. Permits for the small dock repair and construction have been received but actual work is post poned due to the storm and flooding. The Water/Sewer project has started up again this quarter. AVEC and CE2 continue to work with the City on reduction of operating costs for the new water/sewer facility. Drilling for soil samples have been completed. Plans for wind monitors are in the works. Coastal Village Region Fund (CVRF) is taking an interest in this project and may be a revenue matching source. The sub-regional clinic construction currently is waiting for funding. Word is, construction work may start this winter. As for the new school construction, this continues to be on-going.
