

Huslia Activity Report

Community Overview

Lead RUBA Staff: Eileen Kozevnikoff, Fairbanks Office

2001 Population: 293

Region: Interior

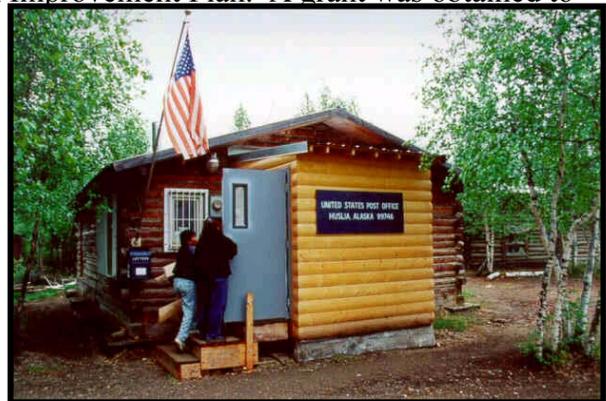

Local Governments: Second Class City

The City Council operates the piped water and sewer system and maintains a central watering point where residents come to haul water to their residences. The City also maintains a sewage lagoon and a solid waste site. The City Council is the policy making body for the utility.

The City provides water to the school. Montgomery Watson for improvements and additions to the community system completed a Sanitation Improvement Plan. A grant was obtained to move the solid waste site from the present location. The airport runway was relocated approximately two miles south of the old runway. It is going to be interesting to see how they deal with transportation to and from the new airport and the increase of gasoline usage.
