

Kiana Activity Report

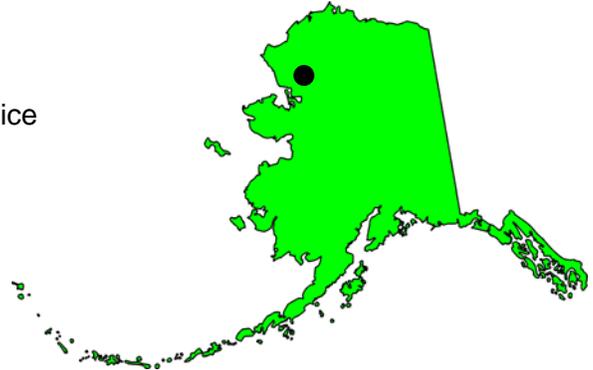

Community Overview

Lead RUBA Staff: Margaret Hansen, Kotzebue Office

2003 Population: 408

Region: Northwest Arctic

Local Governments: 2nd Class City
Tribal Council

The City of Kiana operates the piped water and sewer system and maintains a central watering point where residents come to haul water to their residences. The City also maintains honeybucket pits and a sewage lagoon. The City Council is the policy making body for the utility. A 200,000-gallon steel tank is intermittently filled from two wells near the Kobuk River. Water is chlorinated prior to distribution through buried water mains. Piped water and sewer are provided to 75 homes, the clinic, school and community hall. Kiana maintains a 6-inch buried gravity sewer system, which drains to a lift station and is pumped through a buried force main to the sewage treatment lagoon northeast of the village. A few households haul water and use honeybuckets or septic tanks. The landfill is located west of the sewage disposal lagoon. The site needs to be relocated. A water and sewer Master Plan is being conducted for needed infrastructure improvements. Currently the cities two pumps for their sewage are down so are using honey buckets. They are still using the sewer lines pumping effluent waste water into the river. The city received enough funds to order two new pumps which should be on line in a couple of weeks.

RUBA Activity This Quarter

The tribe has hired a new Executive Director who was the previous City Administrator before the MOA was signed. RUBA staff had planned to visit Kiana the second week of November 05 per the new administrator's request but have not been able to make it out there as of yet.

Capacity Indicators

Finances
