

# Napaskiak Activity Report

## Community Overview

Lead RUBA Staff: Johnny Evan, Bethel Office

2001 Population: 390

Region: Lower Kuskokwim

Local Governments: Second Class City, Tribal Council

The Tribal Council in Napaskiak operates and maintains the washeteria, water treatment plant, honey-bucket and flush haul systems respectively for the community. The Village Council operates the utility services under a Memorandum of Agreement with the City, and is the policy making body.

Residents haul treated water from the central well and one of two watering points located in the community. The school has its own well, but needs a new water treatment system. After a successful flush haul demonstration project, the community selected the system for its water sewer. Currently, the community has 64 units in operation with 22 units under constructions, these are slated to get done by Spring 2003.

## RUBA Activity This Reporting Period

There was minimal activity as the Tribal Organization is self-sufficient.
