

Scammon Bay Activity Report

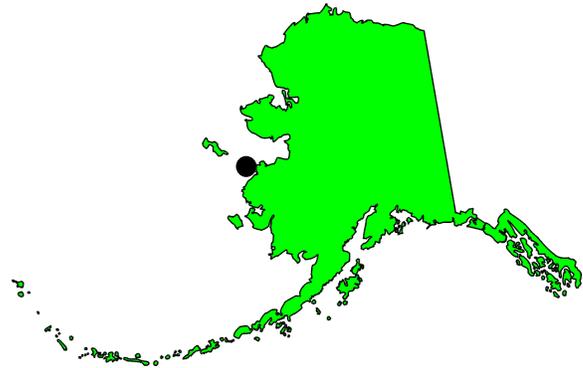

Community Overview

Lead RUBA Staff: Paul Chimiugak, Bethel Office

2002 Population: 491

Region: Lower Yukon

Local Governments: Second Class City, Tribal Council

The City operates the piped water and sewer system. Water is derived from an infiltration gallery located on a small stream south of the City, is treated and stored in a 100,000-gal. tank. The City Council is the policy making body for the utility.

Nearly all homes and the school are connected to the piped water and sewer system and are plumbed. Only a few residents use honeybuckets, typically due to frozen pipe damage. There is no washeteria. A new landfill and access road were recently completed, but funds are needed for equipment. AVEC and the City are interested in developing a small hydroelectric plant.

RUBA Activity This Quarter

The city still has not hired a manager, instead an interim manager was hired and he in turn hired a bookkeeper for the city. The repair to the W/S pipeline was completed in the beginning of September. VSW has sent them a Grant Offer, which will require that a RUBA assessment be completed in order to identify essential indicator deficiencies they may have.

They are done in reports that just show the revenues and expenditures for the month. The expenditures are just about in the budgeted range. The revenues received from customers are at about 50% range. An amended Water/Sewer ordinance will be presented to the customers, which will include customer agreements.
