

Stebbins Activity Report

Community Overview

Lead RUBA Staff: Josie Morrow, Nome Office

2000 Census Population: 547

Region: Bering Straits

Local Governments: Second Class City

The City of Stebbins operates the washeteria and a central watering point where residents can come and haul their own water. The City also provides a honeybucket haul service. The City Council is the policy making board for the utility.

Major improvements are under construction to enable a piped water and vacuum sewer system, with household plumbing. Residents currently haul water and deposit honeybuckets in bunkers. Water is derived during the summer from Big Clear Creek, is treated and stored in a 1,000,000-gallon steel water tank. In the summer there are several watering points in the village, distributed from the tank via plastic pipelines. A reservoir at Clear Lake and a new water storage tank are under construction to alleviate winter water shortages. DEC has approved the landfill for use, although it is not permitted. Refuse is collected by the City from central bins.

General Information

Due to staff turnover there is no information available for this community this quarter.

Anticipated Activity

Leroy Seppilu, LGS/RUBA in the Anchorage office, will be moving to the Nome Regional Office September 1, 2001, and will continue to work with the City.
