

Project Name:	FEMA Region X Discovery
Meeting:	Valdez Discovery Meeting
Date and Time:	Monday, July 11, 2011, 9 am – 4 pm AKDT
Place:	Valdez City Hall, 215 Chenega Avenue, Valdez, AK 99686
Facilitator:	Jennifer Meyer, FEMA RX

Discovery Meeting Agenda

Introductions (15 minutes)

Presentation: Introduction to Risk MAP and Discovery (15 minutes)

- To provide an introduction to Risk MAP and Risk MAP products
- To explain the role of Discovery
- To review the meeting goals

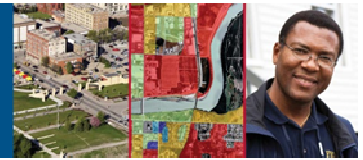

Identify Risk MAP Needs: Study, Mitigation, Compliance, and Communication (4 hours)

- View and discuss identified Areas of Concern using Discovery Database/Map
- Discuss implications of Discovery Map data around Areas of Concern
- Discuss current and potential:
 - activities to mitigate flood risk
 - flood studies
 - training or compliance issues
 - mitigation plans and improvements
 - communication strategies for educating the public on flood risk
- Discuss additional data, resources, or funding that may be needed to implement solutions
- Discuss potential content for next mitigation plan

Wrap Up (1 hour)

- Review and prioritize desired flood studies
- Review and prioritize desired mitigation projects
- Review other identified Risk MAP Needs
- Next steps
 - meeting notes and draft project charter via email within 2 weeks
 - FEMA contact regarding Risk MAP project funding within 4 months

Close

	Area or Point of Concern Identifier	Flooding Source	Possible Risk MAP Need	Data Source	Additional Info
1	Low River	Low River	Detailed Riverine Study	Valdez	The Low River has migrated since the original flood study and has the highest priority in the vicinity of the Alpine Woods Subdivision where LOMA clusters and recent flood control developments warrant a new study
2	Alpine Woods Dikes	Low River	Mitigation, Non Regulatory Products	Valdez	Dikes protect Alpine Woods Subdivision from flooding , new improvements: phase 1 complete, phase 2 funded awaiting construction, initial construction potentially with FEMA grant in 1995
3	State Levee Breach	Low River	Non Regulatory Products	Valdez	2006 flood damaged levee that protects Richardson Highway, plans to restore
4	Valdez Glacier Stream	Valdez Glacier Stream	Detailed Riverine Study	Valdez	Highly migratory channel, outside SFHA boundary, ice jam flooding, annual temporary sacrificial dike
5	Valdez Glacier Stream Dike	Valdez Glacier Stream	Mitigation, Non Regulatory Products	Valdez	State maintained dike to protect Richardson Highway
6	Mineral Creek Loop Road Tidal Flooding	Port Valdez	Detailed Coastal Study, Non Regulatory Products	Valdez	Low bank development has tidal flooding issues, at least one non official Rep Loss property
7	Avalanche Hazards	NA	Non Regulatory Products	Valdez	Two avalanche zones identified, several homes relocated to Corbin Creek Subdivision with FEMA grant
8	Mineral Creek	Mineral Creek	Detailed Riverine Study	Valdez	Migratory channel, study outdated
9	Mineral Creek Dike	Mineral Creek	Mitigation, Outreach	Valdez	The Mineral Creek Dike protects the fill-elevated Cottonwood Subdivision and Homestead Road
10	North Bridge	Mineral Creek	Post Project LOMR?	Valdez	Repeatedly destroyed by flooding, rebuilt without LOMR
