

## Metrc Training by Franwell

Training on Metrc, the marijuana inventory tracking system required to be used by future marijuana establishment license holders, will occur in several Alaska cities next week. Franwell, the creators of Metrc, will be accompanying members of AMCO staff for several four-hour training sessions to introduce future licensees, local government officials, local law enforcement, and the public to Metrc. Additional training will be provided in the future, and Franwell will provide ample training materials to businesses along the way. Seats will be limited by venue on a first come, first served basis. Again, these presentations are an introduction to Metrc, and more training will be available to licensees in the future. We intend to live-stream The April 9<sup>th</sup> session in Juneau. More information will follow soon.
