

NJ-05 Section 4 Product #27

Product Name:	Canna-Crinkle Cookies
Type:	Edible
Product Description Details must include the color, shape, and texture.	Approximately 2"x 2" round, flat shape, dark brown, soft, chewy texture.
Ingredients This box is not applicable to marijuana concentrates	<ul style="list-style-type: none"> • 3/4 cup Canna-Oil • 2 cups granulated sugar • 3/4 cup HERSHEY'S Cocoa or • 4 eggs • 2 teaspoons vanilla extract • 2-1/3 cups all-purpose flour • 2 teaspoons baking powder • 1/2 teaspoon salt • 1/3 cup powdered sugar for rolling
Standard Production Procedure and Detailed Manufacturing Process:	<ul style="list-style-type: none"> - The cookies will be produced using the canna-oil once all testing reports have been received. Then a batch will be made following these steps: <ul style="list-style-type: none"> a. Combine granulated sugar and oil in large bowl; add cocoa, beating until well blended. Beat in eggs and vanilla. Stir together flour, baking powder and salt; gradually add to cocoa mixture, beating well. b. Cover; refrigerate until dough is firm enough to handle, at least 6 hours. c. Heat oven to 350°F. Lightly grease cookie sheet or line with parchment paper. Shape dough into 1-inch balls; roll in powdered sugar to coat. Place about 2 inches apart on prepared cookie sheet. d. Bake 11 to 13 minutes or until almost no indentation remains when touched lightly and tops are crackled. Cool slightly. Remove from cookie sheet to wire rack and add serving size line. Cool completely. Package. - A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with METRC label, and stored in the locked, secure storage room. - Once the sample is cleared through the testing facility, labels will be made and placed on the stored, segregated cookies batch and then moved to the retail space.

Product Name:	Cannabis Bars
Type:	Edible
Product Description Details must include the color, shape, and texture.	2"x 2" square, dark brown and light brown, creamy in texture.
Ingredients This box is not applicable to marijuana concentrates	<ul style="list-style-type: none"> • ½ cup Canna - Oil • ½ cup Peanut butter • 1 Egg • 1 cup Brown sugar • 1tsp Vanilla extract • 1 cup All purpose flour • 1 cup Semi sweet choc chips
Standard Production Procedure and Detailed Manufacturing Process:	<ul style="list-style-type: none"> - The sauce will be produced using the Cannabis Oil once all testing reports have been received. Then a batch will be made following these steps: <ol style="list-style-type: none"> Pre-heat the oven to 350 degrees. Oil the baking pan and keep aside. In a mixing bowl, add the marijuana-infused oil, an egg, peanut butter, brown sugar, a little vanilla extract and blend the whole thing with a hand mixer until it is nice and smooth like candy. Add the flour and blend it into the above mixture until it is fully incorporated into it. Add chocolate chips and distribute it so that it is evenly spread out. Pour this dough into the pre- greased pan and pat it so that it is evenly spread. Put this into the oven and set the timer for 20-25 minutes. Check whether it's done by using the fork. If it comes out clean, take the bowl out from the oven and place it on a wire rack to cool. After 30 minutes, add serving line and cut the mixture into bars 2"x 2" and package. - A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with METRC label, and stored in the locked, secure storage room. - Once the sample is cleared through the testing facility, labels will be made and placed on the stored, segregated sauce batch and then moved to the retail space.

Product Name:	Mary Jane's Macaroons
Type:	Edible
Product Description Details must include the color, shape, and texture.	1"x 1" round, dark brown, light fluffy texture.
Ingredients This box is not applicable to marijuana concentrates	<ul style="list-style-type: none"> • 1 and 1/3 cups of flaked coconut • 1/3rd cup of sugar • 2 tablespoons flour • Pinch of salt • Egg whites of 2 eggs • Vanilla extract • 2 tablespoons of cannabis butter • Baking chocolate or chocolate chips
Standard Production Procedure and Detailed Manufacturing Process:	<ul style="list-style-type: none"> - The macaroons will be produced using Canna-Butter once all testing reports have been received. Then a batch will be made following these steps: <ol style="list-style-type: none"> a. Preheat oven to 325 degrees and grease a large baking tray. b. Next combine together in a bowl the coconut, sugar, flour and salt. Mix well and break off any large lumps of coconut or flour. Once well mixed, set aside and move on to the egg whites. c. Crack the eggs and separate the egg whites from the yolk into a bowl. Add half a teaspoon of vanilla extract to the egg whites. Whip the egg whites with an electric hand mixer. d. Now add the whisked egg whites and vanilla extract mixture to the dry coconut and flour mix and combine the dry and wet ingredients together by tossing them with wooden spoons. e. Once the mixture is ready put one tablespoon scoops of the mixture on the greased biscuit tray. f. Put the tray into the preheated oven for 15 to 18 minutes till the macaroons are golden brown. g. Next get to the marijuana chocolate. Prepare a double boiler and add the cannabis butter to the bowl and let it melt. Once the butter has melted, start adding the chocolate to the cannabis butter in the bowl. As it melts, incorporate it gently with the butter using a spatula to get a glossy mixture. h. Take macaroons out of the oven and let them cool for a few minutes before transferring them to a cooling wire rack. Meanwhile the chocolate sauce should be ready. Keep the flame on simmer so the sauce remains liquid. i. Once the macarons have cooled down they are ready to be dipped in the marijuana chocolate sauce. Hold them from the bottom and dip the tops gently into the sauce. j. Once cooled completely, package and refrigerate. - A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with METRC label, and stored in the locked, secure storage room. - Once the sample is cleared through the testing facility, labels will be made and placed on the stored, segregated sauce batch and then moved to the retail space.

MJ-05 section 4 Product #39

Product Name:	Bong Bread
Type:	Edible
Product Description Details must include the color, shape, and texture.	3"x 3" round rolls, light brown, light, fluffy texture.
Ingredients This box is not applicable to marijuana concentrates	<ul style="list-style-type: none"> • 3g of marijuana flowers that have been de-stemmed and deseeded • 3 cups of all purpose flour • flaxseed meal, for dusting • 1 and 1/4th teaspoon salt • 1/4th teaspoon active dry yeast • 1 and 3/4th cup of non scalding warm water
Standard Production Procedure and Detailed Manufacturing Process:	<ul style="list-style-type: none"> - The bread will be produced using cannabis once all testing reports have been received. Then a batch will be made following these steps: <ol style="list-style-type: none"> a. First, grind the marijuana flowers into a coarse mealy consistency. Preheat the oven to 220 degrees and decarb marijuana. b. The next step is to prepare the flour mix. Mix the flours, salt, yeast and marijuana in a bowl using a whisk. c. Then add the warm water (110 degrees) to the flour and mix it well. It will form a shaggy sort of dough. This is the time when the yeast will develop in the dough. d. Next knead dough and section into 3"x 3" dough balls. Cover dough and allow to rise for approximately 12 hours. e. Preheat the oven to 450 degrees. Put the metal pan in the oven to heat as well. f. Take the pan out carefully using oven mitts and put the dough into the pan with the seam side facing up. Cover with the lid and put it in the oven to bake for 30 minutes. g. After 30 minutes remove the lid off the pan and let the bread bake for about 5 to 10 minutes more. h. Carefully tip the bread onto a cooling wire rack and let it cool for 2 hours and then package. - A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with METRC label, and stored in the locked, secure storage room. - Once the sample is cleared through the testing facility, labels will be made and placed on the stored, segregated sauce batch and then moved to the retail space.

Section 4

Product # 47

Product Name:	Toker Thai Tea
Type:	Edible
Product Description Details must include the color, shape, and texture.	8 oz sauce, light tan, smooth texture
Ingredients This box is not applicable to marijuana concentrates	<ul style="list-style-type: none"> • 6 chai tea bags • 8 cups boiling water • ½ cup granulated sugar • 1 can condensed milk (14 ounces) • 3-5 tablespoons melted cannabutter
Standard Production Procedure and Detailed Manufacturing Process:	<ul style="list-style-type: none"> - The tea will be produced using Canna-Butter once all testing reports have been received. Then a batch will be made following these steps: <ol style="list-style-type: none"> Place the chai tea bags in a pitcher. Pour 8 cups of boiling water over the tea bags. Allow to steep for 35 minutes. Remove the bags and add the optional sugar. Let cool to room temperature. In a small bowl combine the condensed milk and melted cannabutter. Fill 6 bottles two-thirds of the way with the tea. Top the tea with 2 ounces of the condensed milk mixture. Seal the bottle and refrigerate. - A sample from this batch will be sent to a marijuana testing facility with a travel manifesto. This batch will be packaged, labeled with METRC label, and stored in the locked, secure storage room. - Once the sample is cleared through the testing facility, labels will be made and placed on the stored, segregated sauce batch and then moved to the retail space.
Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	 <p>Product</p>
