**Subject:** 3 ACC 306.735  
**Date:** Thursday, February 25, 2016 2:42:41 PM

---

Good afternoon,

I'm with the FNSB Community Planning Department and we are processing several land use conditional use permit applications as well as receiving quite a few inquiries regarding marijuana establishments. A question that has recently been raised several times is whether porta-potty/sani-can type facilities would be acceptable to meet the Health and Safety Standards, particularly for outdoor cultivation facilities. Also, if the requirement in 3 ACC 306.735(b)(2)(A) for a "adequate and readily accessible toilet" is able to be met with a porta-potty/sani-can, would 3 ACC 306.735(b)(2)(B) be able to be met with a separate facility? Meaning, if the porta-potty/sani-can is the toilet facility, can the hand-washing facility be in another structure? And does the hand-washing facility need to have hot water or just warm water available?

If you need any additional detail regarding the specific land use applications, please just let me know.

Thanks in advance for your help!  
Stacy

**Subject:** A couple of questions  
**Date:** Thursday, March 03, 2016 3:11:52 PM

---

Hi, I've had several people ask questions that I can't answer about marijuana regulations. The department just received the amended regulations that went into effect on 2/21/16 but it's still unclear. One particular question comes from 3AAC 306.010 License Restrictions, (d) .... Prohibited under AS 17.38.100(i) from receiving a marijuana license because of a conviction of a felony. I've looked for AS 17.38.100(i) and can't find what those prohibitions would be. Something else I read said people who haven't been convicted of a felony in the last 5 years would be eligible for a license. So we are confused.

Another thing we would like clarified is the amount of plants allowed per household. Per person over age 21? Flowering vs non-flowering? Ect.

We want to give people the correct information but when we don't know it ourselves, that's not good.

Thank you for your time.

---

Hello,

To date, the Haines Borough has no regulations regarding marijuana businesses, retail, wholesale, processing, or cultivation— and I understand that the state has begun accepting permit applications.

I have a few questions regarding local control:

1. Without local ordinances, who decides where to locate marijuana businesses and how to regulate their hours?
2. If it is the state, what are your rules regarding marijuana plant sales, retail sales, “bars”, cultivation, etc?
3. Can Haines place a moratorium on marijuana businesses until we have local regs, or is it too late? In other words, will state permits issued for Haines based marijuana businesses before we have regs (if we do) have existing use rights if we ban or restrict marijuana businesses here? (If there are state 50 permits issued here and we decide the max is 5. What then?)
4. Does the board have any advice for local planning boards on how to approach this, or resources to assist in local governments?
5. The deputy mayor and mayor both say we have plenty of time to decide how we want to control marijuana sales in Haines— Is that accurate? And is this an assembly issue or a planning and zoning board issue, or both? Which body should initiate hearings and create ordinances?

Thanks so much--

Heather Lende

---

I am applicant 10002, Clint Tuma, when I started my application I wanted my name as the business, but than I decided to brand myself and got another business license. I am still the sole owner, financier, same address, and everything. Before I submitted my newspaper ad, and my public notice I made the corrections, and posted the correct information and business license number.

My secretary is dropping off my completed application today, and I have included the corrected public notice so that you can see I filed correctly with the right name, and license number.

The business license I intend to use is 1032849, I made sure that all documents have this business license, and used Clint Tuma, Evergreen Marijuana Producers on all my postings and newspaper clipping as well.

Since the packet is over 80 pages and includes many documents which cannot be scanned, (notarized, affidavits, and fingerprint card) I am having my secretary drop off a copy to the main office in anchorage, and scan copies to submit as well, and having her drop off the \$1000 for the application, and \$5000 for the license.

Look forward to working with you all-  
Clint Tuma

I see that 3AAC 306.010(b) prevents holding a marijuana license "if the licensed premises will be located in a liquor license premises. My questions is, in the event a client owns a large structure with many office/rooms available, can the marijuana license be issued for one room that is separate from the liquor premises room but on the same property obviously. Also, if a client owns a restaurant where regular food items are sold can a marijuana license be issued for those same premises if they meet the other requirements of course.

Thank you.

**Subject:** Application and Planning Questions  
**Date:** Friday, March 04, 2016 3:14:19 PM

---

Good afternoon,

I am planning to apply later this year for a limited cultivation license. I live outside Talkeetna in the Mat-Su. I understand there is a vote in October to decide if it will be allowed in the borough.

My questions are based on voters approving business operations in Mat-Su.

I live in an off grid house, 1.5 miles from the road system. They only access to my property is a walking trail from the road to my house. I have no neighbors within 1 mile of my house. It is dense forest around me for miles except for the access trail from the road. We have electricity and internet.

I am planning to grow in a 500 sq feet soft sided green house and process in a small outbuilding. I only plan to produce outdoors in the summer when it will grow. I am not planning year round growing or indoor growing.

My questions are on the security requirements:

It seems the regulations call for a physical barrier around the green house and processing building. Does this have to be a chain link fence? Can it be a wood fence? Do I have to have this barrier if I live this far from the road and no one will see the grow operation? Does the forest and distance around me and private property create a physical barrier? I have 40 acres and this will be well out of sight on private property that is well marked as private property.

Does the processing building, count as part of the 500 feet of cultivation or only the green house?

I am planning to breed a few plants in a smaller separate greenhouse for seed production and not for sale, does that count towards the 500 feet?

Is the state going to implement an inventory tracking system or will I need to find one?

Since I only plan to grow for a limited time in a soft green house. I am planning to put it up at the beginning of the season and tear it down at the end. Does this cause any problems with the video recording? Do I only run the video recording during the time I am growing and processing?

If my partner and I are listed on the application, do we both need a handler permit?

Thank you for your help,

Chris

Hi Mr. Stowe,

The problem for corporations is that the legislature voted that no one holding a marijuana license can have a felony conviction in the last 5 years or be on felony probation or parole. For entities, in order to assure that we are meeting this requirement, we need to reduce the application to the human beings behind the corporation or partnership. That means that the license application must list everyone and include fingerprints for each shareholder. That is the only way to assure that we are following the law.

Cynthia Franklin, Director  
Alcoholic Beverage & Marijuana Control Boards

Hello John,

We had a customer contact us interested in future signage for a marijuana store. I spoke with the municipality in the planning dept. and they mentioned the State of Alaska had some restrictions on signage. I looked through the ordinance you have and just wanted to clarify a few things so I understood it correctly. I listed my questions below. I am meeting with the gal at 3:30 today so if you have time to respond before then I would really appreciate it.

Thanks,

Sharon Huffman

Universal Sign & Lighting, LLC

907-278-7446

- 1) It states they may have a total of 3 signs at no larger than 4800 sq. inches (33.3333 sq. feet). They may be attached to the window or the outside of the licensed premise. Does this mean they can have exterior wall signs or a pole sign? Can they be non-lit or lit?
- 2) It states all advertising for marijuana or any marijuana product must contain each of the following warnings... 1,2,3,4,5 (as listed in ordinance). Do all these warnings need to be listed on each sign?
- 3) Is there any other information we should know in regards to the signage?

Hello,

As I was reading through the questions I came across an answer pertaining to the Initial cuttings a new cultivation facility would need to acquire. The wording was a bit confusing:

"After the initial inventory is established, the regulations prohibit personal use marijuana or any marijuana grown outside the licensed premises being entered into the tracking system."

Does This mean we have only one opportunity to enter different strains? Or when the word "marijuana" is used is it referring to harvested marijuana BUD? I would like to think we could purchase clones and seeds within the state at legal outlets. Eventually we should see seed companies and clones sold at retail locations, but if marijuana grown outside the licensed premises cannot Be entered into the tracking system, how will we ever Be able to add variety to our operations?

So, is it referring to marijuana BUD, or marijuana plants and seeds?

Thank you for clarifying,  
Dollynda Phelps

**Subject:** Excessive requirements  
**Date:** Thursday, February 25, 2016 10:44:37 AM

---

Mr. Calder,

I hope I am sending this to the correct place.

I need to add my opinion on the state making the testing facilities requirements so outrageous.

A PHD. in Chemistry? Seriously. You want someone with the knowledge of 100,000 things to oversee the testing of 1, count it out, 1 weed. Just how many people do you suppose have that qualification in this state. With our State in such financial difficulties, why wouldn't you take that same PHD in Chemistry person and have them teach an 8 week course on how to do the different tests on Cannabis and charge \$xxxxx amount of money to do so?

By AMCO making this excessive requirement, you have effectively said "screw you" to all of the little towns and villages that have no road access available to ship their product to one of the larger cities, IE, Anchorage, Fairbanks for example, to be tested. As you all well know, it is still against Federal Law to transport cannabis over water and air.

So, please, tell me I am wrong. I am not interested in the testing facility at all except that, before I could dispense any marijuana, it would have to be tested. I imagine there are at least 3 or 4 people in Petersburg who, I am sure, want to grow, but without the test facility, they cannot even apply, I think.

The AMCO has effectively kept about 10 new businesses from starting in Petersburg alone, so you should start adding up just how many more businesses aren't

happening from the outlying areas  
and water locked towns. How much revenue will be lost that our wallowing  
state economy could  
use right now?

In the course of 2 months you have elated me, as I am the only business  
downtown in Petersburg,  
that met your 500' requirements, me the one that already was selling the  
accessories for cannabis,  
and then I felt stabbed in the back when I found out the requirements you  
had for the testing. In all  
honesty, I am an almost 60 year old business woman without a retirement  
and I finally thought I had  
it figured out. Sorry, not meaning to make this about me, but, heh, guess it  
is.

Thank you for letting me have my say. I will still be applying for a  
dispensary license, just in case  
you all change things up or maybe someone will have a traveling lab.

Sincerely

Susan

**Subject:** ABC Board Website Question

Dear Director Franklin,

I am attaching a letter concerning the Marijuana Control Board and its use of the term resident as it applies to the PFD, their creation and filing of regulations, and the fact that they were never vented by the State Legislature.

Our government, on all levels, has rules, regulations and laws its suppose to operate by for protection of its people. We cannot allow it to become an anarchy. If we have even one member of the Marijuana Control Board found to have a conflict of interest, whenever the Legislature gets around to venting them, we will have existing regulations on the books that were promoted/filed by an unapproved board. These regulations would be illegitimate. How will government on any state, borough, or local level deal with trying to enforce anything to do with growing operations then?

Please do whatever you can to encourage the Legislature to vent this committee ASAP and to legitimize the regulations by whatever means necessary. We don't want enforcement to slip through the cracks because of an error on the States part.

Seeds for thought.

Sincerely,

Edward D. Martin, Jr. (907)252-7857

Mr. John Calder,

Hello, My name is Jon Mansker. Owner of Musky Ox, a marijuana cultivation and retail company in Fairbanks. My application is being submitted through my lawyer, Jana Weltzin.

I am requesting permission from the state to operate a retail marijuana store at 544 3rd Ave, Fairbanks, AK 99701.

The location is suitable according to all guidelines, however, it is not clear to me how a childrens museum is classified. This childrens museum is a walk-in, membership based establishment where parents can bring their children and must stay with them. This is not a "drop off" location. Also, the way this particular museum is located, it is very unlikely the marijuana establishment would be seen. Please see attached "retail location details" for reference. According to Fairbanks zoning, 544 3rd Ave is allowable. Please see attached "city zoning image".

Thank you for your consideration,

Jon Mansker  
Musky Ox, LLC  
[jjmansker@gmail.com](mailto:jjmansker@gmail.com)  
[907-750-2573](tel:907-750-2573)

for reference: If an existing marijuana establishment license for premises located within 500 feet of a school ground, a Register 217, April 2016 COMMERCE, COMMUNITY, AND EC. DEV. 5 recreation or youth center, a building in which religious services are regularly conducted, or a correctional facility is revoked or expires, the board will not issue another marijuana establishment license for the same premises unless the school ground, the recreation or youth center, the building in which religious services are regularly conducted, or the correctional facility no longer occupies the site within 500 feet.

Hello,

I am considering a grow operation in Petersburg and have not seen this question come up. How would I be able to transport to the Juneau lab or to other places in the state to sell my product? With the federal guidelines it is presently illegal to transport via airlines or boat. Would this still apply?

Thank you for your prompt response.

Bob in Petersburg

Hello, AMCO.

I have a question about greenhouses, and whether or not they are considered an "indoor" space or an "outdoor" space? More specifically:

Is a "...greenhouse with rigid walls, a roof, and doors," be an indoor space, as long as the structure is compliant with other regulations?

Thank you for your time, and for all of your hard work.

I have asked the question all along.....On Unorganized borough's are they opted out unless they opt in???

That wasn't the original question the original question was; will unorganized borough's be allowed to have marijuana licenses. To the best of my knowledge, I never got a specific answer to my question. But today on facebook I find that someone posted unorganized borough's are considered "opted out" unless they opt in!

**Subject:** Is Marijuana classified an Agricultural Crop.  
**Date:** Wednesday, March 02, 2016 10:25:50 AM

---

The question I have is marijuana/ cannabis/ hemp classified as a agricultural crop in Alaska. The Federal Gov. said NO from what I have found.

In the MSB our Chugach View Estates Subdivision has 15 lots and the covenants say that Block 1 Lots 1,2,3 are rural residential purposes only and may be used for agricultural purposes they are 3.5 acres in size.  
All other Lots are rural residential purposes only.

Our Subdivision and the neighboring Subdivision say no,  
There is a School Bus Stop of all ages and has been their for Years, The School Bus Stop is next to one of Lots Block 1 Lot 1. We do not want any thing like that to go on here.  
Is there a Alaska State Law that does not allow this.

We are looking for some help on this and would appreciate all you folks can do to help in this matter thank you.

Greetings — I tried but cannot find the language / conditions concerning our potential operating facility.

We have a location in mind that meets all criteria however it would be a sublet situation i.e. we would rent out space from a tenant (who's landlord has already given permission).

The tenant simply has too much unneeded square footage and would be agreeable to rent out to us the desired space we need.

Of course we would modify this area to make sure it complies with all current regulations.

Can this be done? Hope so.

thanks,

Pete

**Date:** Thursday, March 17, 2016 4:43:52 PM

---

HI,

I have been hoping to open a Marijuana Retail Store in Kotzebue. My problem is that the Federal Aviation Regulations, specifically 91.19(a) prohibits any pilot to carry onboard any Marijuana. I will not be able to send or personally fly any legally onboard an aircraft. FAA FAR 91.19(b) would allow aircraft to carry Marijuana if a State of Alaska Statute would specifically authorize the carriage of Marijuana aboard an aircraft.

Please consider proposing to the Alaska Senate or Legislature to introduce legislation for an Alaska Statute that would authorize the carriage of marijuana aboard an aircraft in Alaska. The Marijuana Control board could also make a regulation requiring a license for the carriage of marijuana aboard an aircraft in Alaska.

This may be a solution to problem of legally shipping marijuana samples or inventory to bush Alaska.

Thank you for your time and consideration,

John Walker

**Subject:** Marijuana cultivation permit  
**Date:** Tuesday, March 08, 2016 8:16:12 AM

---

Hi,

My name is Forest Collins. I have lived on Prince of Whales Island for over 30 years. I have purchased land in Thorne Bay, Goose Creek Industrial subdivision, with the intent of developing a marijuana cultivation business. It has been zoned and approved by the city of Thorne Bay.

My questions are...

#1. My land and infrastructure still need to be developed. Do I have to invest in everything before I can apply for the permit to operate? I have to liquidate my current residence to reinvest in the new one. I would prefer to have a permit before making such a bold financial investment.

#2. If there is not a lab near me, I will have to send my samples to a lab some were in the state. Will I be allowed to ship samples on Alaska Airlines? S.A.R.D.F.A. sends Geoducks to a lab in Anchorage every week for PSP testing .It works well for us. I would like to do something similar if possible.

#3. Is there a limited # of these permits available? Can I be left behind if I do not rush in? I would like to have a couple of years to sell my primary residence and construct a new one on the business site as well as all of the necessary infrastructure for the business plan.

Thank you for your time,

Forest Collins

**Subject:** Marijuana Local Option -- 3 AAC Section 2  
**Date:** Thursday, February 25, 2016 11:05:27 AM

---

Hello,

My name is Dwight Haak and I am in the licensing phase of applying for a 500 sq. ft. Marijuana Cultivators License. I am located in the unincorporated Mat-Su Borough. My question/concern involves the local option, specifically 3 AAC 306.200- 306.270 and what happens if Mat-Su voters decide to disallow commercial marijuana in October. Assuming I receive a license and commence growing marijuana, will all my work go to nothing in October? Should I and others in the Mat-Su Borough even bother going through the process? I understand the risks involved in starting a business, however I don't feel like going bankrupt because I am embracing entrepreneurship.

Also, my interpretation of 3AAC 306.200- 306.270 leads me to understand that any marijuana business I start will always be subject to being closed down based on what voters decide from election to election. A yearly fear of disappearing licenses isn't instilling confidence in me to build a business.

I only just discovered last night that the Mat-Su Borough had a Commercial Marijuana Ban Initiative on the ballot for October, Initiative 2. Should I just halt moving forward with licensing? I know the answer is "yes".

My entrepreneurial spirit is feeling a little zapped because I was excited for this week's steps forward, but now I know I'm just back to square zero (not even square one).

Can this issue be addressed on the website? I don't even think people in the Mat-Su know a vote is happening. ADN had an article yesterday entitled "Where do Alaska Cities and Towns Stand on Commercial Marijuana", which has seemingly stopped me from wanting to move forward on licensing.

Thank you,  
Dwight Haak

I will redirect my comments as you have suggested. Loren Jones told me he was the "public health" person assigned to the Board. His work in alcohol for many years is certainly noteworthy. There are many, many clinical, epidemiologic, and social public health issues to be addressed in this panoply of issues. The clinical and public health literature is replete with information on both sides of the divide. I have seen very little either at the CBJ Municipal level in Juneau or from reading of the State materials.

Do you have any sense of why the public health people didn't respond?

I will certainly appreciate remaining on whatever mailing lists and information sharing lists that you all have created.

Thank you for these considerations.

Dr. Brown,

I certainly appreciate your thoughts on this. We do have one board member who was appointed to provide a public health perspective to the board.

Sadly, we did not have much feedback from public health representatives or advocates during the rule making process. I encourage anyone interested to get involved, attend board meetings and make their voices heard. Those who want to make money are certainly doing that and are sometimes the only voices in the room.

Again, thanks for your comments. If you wouldn't mind forwarding your thoughts to [marijuana@alaska.gov](mailto:marijuana@alaska.gov), that is the email box we bring to the board at each meeting.

Cindy

On Feb 29, 2016, at 2:54 PM, carolyn V Brown <[cvbrown1937@yahoo.com](mailto:cvbrown1937@yahoo.com)> wrote:

Cynthia: I heard your presentation at the Alaska Public Health Association Meeting.

You have to do what you have to do. I haven't seen much about "protecting consumers" or the "interest of the health and public safety" that you mention in the attached press release. Perhaps those things are "lost in the weed(s)". If there are credible data about the "public's health and safety" (and this means physical, mental, social, and/or environmental), I would welcome access to that information.

It is my view that the jury is not in on health and safety as it relates to children, adolescents, pregnant women, co-admixture with alcohol, driving, and long-term use in adults and seniors.

I sadly fear that the "knee-jerk" to make money on the part of entrepreneurs and tax collectors trumps the science surrounding the implications of widespread availability and use of marijuana without significant additional safety nets that address the "public's health and safety".

It may well be that by the time those data are in (if even they are being collected), the current decision-makers will all have gone somewhere else and "it will be somebody else's problem". I sense that is the way bureaucracy operates a good bit of the time.

I do believe the "public's health and safety" requires some oversight and that perhaps ought to be the work of decision-makers within the State Government at the "health and public safety" level.

Respectfully,

**Date:** Friday, March 04, 2016 9:54:14 PM

---

Hi, I was sorry the training videos didn't include the questions and answers from the audience, as perhaps someone asked these questions.

1. If you don't live in Anchorage, where do you get your finger prints taken?
2. Since I already have a lease for my current store (and would just be expanding an inventory line) do I need to have my landlord submit a new lease on line, or can I submit a copy of the lease I have? (He lives out of state, but has told me he's okay with a retail operation, just not use on premises.)
3. Life gets extremely busy for us in the summer tourist season and I was hoping to go ahead and apply, give public notice, etc. for my retail license as soon as possible. I know you aren't working on those licenses right now, but is a person allowed to send in their application early so that it is already there when the time comes? I would need to make some physical modifications to my building and would need as much advance notice as possible.

Thank you.

**To:** [Marijuana, CED ABC \(CED sponsored\)](#)  
**Subject:** public health and safety  
**Date:** Monday, March 14, 2016 10:54:48 AM

---

I am writing a express concern regarding public health and safety in relation to the legalization of marijuana in Alaska.

As a pediatrician, I am particularly concerned about the expected rise of accidental ingestion of marijuana by children and illegal use of marijuana by teens. Research from other states that have legalized marijuana shows every reason for us to be concerned about children and teens. Fortunately, we are at a time in which we can make decisions that may prevent some of the problems seen in other states.

As you may know the developing brain is very different than the adult brain. The adverse effects of marijuana in children and teens have been well-documented. Marijuana use can impair memory, decrease concentration, and change problem-solving capacity. It's not good for the lungs nor long-term health; teens who use pot have a higher likelihood of drug addiction later on in life, the risks increase the earlier they start using. Research also finds that teens who use marijuana are less likely to finish high school, are more likely to use other (illicit) drugs, and have an increase in suicide attempts compared to those who don't. The more they use, the more the effect.

When Washington state legalized marijuana, Seattle children's hospital developed a handout "What parents need to know..." (attached in second email. I recommend the state develop a similar handout for families as part of an overall preventative care plan. I also recommend a management plan for Alaska's medical systems that will need to support the increased needs of our children and teens with problems related to marijuana. A well-funded program for prevention and management of the anticipated consequences *must* be part of the plan for Alaska. We can prepare in advance or pay later. Let's be clear, there will be consequences for Alaska's families that will need to be addressed.

Sincerely,  
Kathy Stepien, MD, FAAP

---

I reviewed the regulations and cannot find an answer to a question. If a lender loans money to a cannabis business which loan is secured by the assets of the business, does the lender need to be a resident of the state and have to undergo a background investigation. The regulations provide that anyone with a legal or equitable interest in a business needs to be a state resident. Does the department include a lender with a security interest in the assets of the business as having a legal or equitable interest in the business, or would a lender only acquire an interest if the borrower defaults and the lender forecloses its security interest? Thank you.

**Subject:** Question on premises inspection and license initiation  
**Date:** Tuesday, March 01, 2016 10:54:37 AM

---

Q1:

Once the application is completed and submitted, the board has a 90 day turnaround for either approval or disapproval. During this time, an inspection of the premises will occur. The question is, does it have to be fully operational at the time of the inspection. i.e. do the lights have to be hung and ready. Or just security and building itself fully functional to meet SOA requirements?

Q2:

Once an application is "initiated," is there a timeline as to its completion with you all for final submission as to all documents?

Thank you.

**Subject:** question regarding security system  
**Date:** Monday, March 14, 2016 4:54:19 PM

---

We have had a home security system in place in our home for over a year. It consists of infrared security cameras, motion detection devices, and intruder alert devices. There are 4 outside infrared cameras that record, regardless of temperature or lighting, to a hard drive where information is stored for 90 days. The motion detection devices are manually set when we leave home. The intruder alerts are triggered when a door or window has been opened, prior to disengaging the alarms. The alerts are sent to my husband, my son and myself via a text and a phone call by security system which allows us access to view the camera activity.

In planning our security system for our cultivation facility, we would like to use the same type of security system that we are familiar with and currently have. It appears in reading the regulations, we would meet the requirements for video surveillance under 3 AAC 306.430 and 3 AAC 306.715 and AAC 306.720. What isn't clear to me is 3 AAC 306.715 (d) where it states "describe actions....when any automatic or electronic notification system alerts a local law enforcement agency of an unauthorized breach of security." Is it a requirement that law enforcement be alerted every time an alert or alarm is triggered? Our system is so sensitive that it will occasionally send an alert notification if there is a change in temperature or if an automatic timer turns on a light. If our visual monitoring following an alert requires law enforcement, we would of course immediately notify them.

Thank you for the clarification,

**Subject:** question regarding security  
**Date:** Monday, March 07, 2016 5:29:37 PM

---

Hi,

regarding "(2) a security alarm system on all exterior doors and windows", my question is would a motion sensor on the inside of the facility, faced at the door with an alarm be sufficient? Or would it have to contact 911 or does it have to be the kind of alarm that is triggered by the door/window opening? From how it's worded we're assuming an alarm like [this](#) would work, but wanted to make sure.

Another question I have is about the security cameras. I remember early on hearing a specified resolution, but can't find one in the final regs. The cameras we have will be 720p, which seems sufficient enough, and to be able to actually store 40 days worth of footage. Is there a minimum resolution I'm just not seeing?

Thanks for your help,  
Steven Briody

**Date:** Monday, March 14, 2016 1:45:56 PM

---

After review the training video on Form MJ-00 Application Certifications I would like clarification.

The Video states the each person signing an application must fill out this form. Looking over Statue 3 AAC.306.020 b(2) which is referenced on the form for each proposed licensee I do not find anywhere where it clearly states if a indirect financial interested party is included in the definition of licensee. My question: Are indirect financial interested parties obligated to fill out this form and/or any other form including finger print cards?

Can you please include a list of what a indirect financial interested party must include in this application process.

Thank you,

Lorraine Daly

**Subject:** question  
**Date:** Monday, March 14, 2016 2:47:52 PM

---

Can you please answer this one - again - I can not find any regulations on it.

Our operation is only going to be a bakery / we are not processing plants for extract, etc only baking.

According to current State restaurant regulations — if you are not frying / deep frying, etc you are not required to have an exhaust hood. (example Subway restaurants, Urban Greens downtown, many others)

An exhaust hood is a very expensive endeavor and if we don't have to have one it would be good.

thanks,

Pete

To Whom this may concern,

Hello, I am looking into marijuana waste management. I was wondering if it is possible to open a "marijuana waste management" business where a person, or persons, could do a pick up service throughout the legal businesses and grind/compost the waste? Or does each individual business need to do this themselves? Also I am not finding very much information except for one page in the 3AAC 306 statutes on the laws and regulations for waste disposal, are there any other resources available? Any information is greatly appreciated.

Thank you,  
Bobbi Jo

**Subject:** Questions about security  
**Date:** Monday, March 07, 2016 11:52:00 AM

---

Hello,

Just a few specific questions. I'm working on my operation plan for a limited marijuana cultivation facility. Are there requirements for any specific type of alarm system? Does it have to be the type that notifies local law enforcement? Or can it just notify me? I found that the regs really didn't spell that part out clearly.

So surveillance cameras...there are a lot of different products on the market. Do the cameras need to record 24/7? Or can they be motion activated?

I plan to purchase cameras that record in night vision, in that case, do I still need exterior lighting of areas under surveillance? And if so, can those be motion activated?

Thank you for your time,

<[marijuana@alaska.gov](mailto:marijuana@alaska.gov)> wrote:

If you've received this email, it's because AMCO has identified errors in your initiated marijuana establishment license application(s) that would require you re-accomplish your public notice requirements.

You must list **every** human being who has a financial interest in the license (direct or indirect) as either an owner or affiliate. Each entity that has ownership in a license must also have its human owner listed as affiliates.

The designated owner field needs to be a human being and cannot be anything but a human being.

The physical address of your premises cannot be a PO Box. It must be the actual physical address of your proposed premises.

Remember that you can't change any information on your application after you click the submit button. **Please read the application instructions** and then review your application carefully to ensure its complete and accurate prior to submitting.

### **HOW TO CORRECT YOUR ISSUES:**

Please access your initiated license application after 4:30pm on February 26<sup>th</sup>. AMCO staff will have changed the status of your application to "new", rather than "initiated", so you can make necessary adjustments and re-submit your application. The information you've entered previously should still be there. Be absolutely sure to enter affiliate information for any human being who has any percentage of ownership or financial interest, however small. You will not be afforded this opportunity again.

Stacy,

This is a question of interpretation for the MCB. Each application will be reviewed on its own merits and we won't know the answer to this question until the board begins reviewing applications. It's also possible that the Department of Environmental Conservation (DEC) might have something to say about this. The regulations specify the temperature of the water must be "suitable" to promote health and safety, sanitization and cleanliness. To some that will mean hot water, but I can't say what that will mean to the MCB.

**Subject:** 3 ACC 306.735

Good afternoon,

I'm with the FNSB Community Planning Department and we are processing several land use conditional use permit applications as well as receiving quite a few inquiries regarding marijuana

establishments. A question that has recently been raised several times is whether porta-potty/sani-can type facilities would be acceptable to meet the Health and Safety Standards, particularly for outdoor cultivation facilities. Also, if the requirement in 3 ACC 306.735(b)(2)(A) for a “adequate and readily accessible toilet” is able to be met with a porta-potty/sani-can, would 3 ACC 306.735(b)(2)(B) be able to be met with a separate facility? Meaning, if the porta-potty/sani-can is the toilet facility, can the hand-washing facility be in another structure? And does the hand-washing facility need to have hot water or just warm water available?

If you need any additional detail regarding the specific land use applications, please just let me know.

Thanks in advance for your help!

**Subject:** RE: A couple of questions

AS 17.38.100(i) prohibits the MCB from issuing a license to anyone who's received a felony conviction within the past 5 years. It's included in HB 123, which amended AS 17.38 and can be found at the following link:

<https://www.commerce.alaska.gov/web/portals/9/pub/MCB/StatutesAndRegulations/hb-123.pdf>

This is available on our website at our marijuana regulations page:

<https://www.commerce.alaska.gov/web/amco/MarijuanaRegulations.aspx>

The personal use and possession limits are answered in our FAQ's, also on our website. Please see the complete list of FAQ's as may help to answer some of your questions:

<https://www.commerce.alaska.gov/web/amco/MarijuanaInitiativeFAQs.aspx>

An excerpt:

AS 17.38.020 allows for the in-home production and possession of marijuana for personal use. That statute specified that an adult over the age of 21 may grow up to six plants, up to three of which may be flowering, in their home. The statute is silent on whether there is a household limit on the number of plants that may be grown when more than one adult

resides there. There is legislation this session that may establish a 12 plant per household limit. The Marijuana Control Board has clarified through definitions that personal grows and assisting cannot be used to circumvent licensure requirements. See 3 AAC 306.990.

**Subject:** A couple of questions

Hi, I've had several people ask questions that I can't answer about marijuana regulations. The department just received the amended regulations that went into effect on 2/21/16 but it's still unclear. One particular question comes from 3AAC 306.010 License Restrictions, (d) .... Prohibited under AS 17.38.100(i) from receiving a marijuana license because of a conviction of a felony. I've looked for AS 17.38.100(i) and can't find what those prohibitions would be. Something else I read said people who haven't been convicted of a felony in the last 5 years would be eligible for a license. So we are confused.

Another thing we would like clarified is the amount of plants allowed per household. Per person over age 21? Flowering vs non-flowering? Ect.

We want to give people the correct information but when we don't know it ourselves, that's not good.

Thank you for your time.

Do you provide printed copies of the marijuana regulations 3AAC\_306 - I would like to stop by and pick one up.

I own a commercial condo and the adjacent owner is renting to a marijuana grow operation. I would like to understand what the State of Alaska law is providing for when it comes to legalization of grow operations and what rights I have as a normal business.

Besides the issues of legality, I also have concerns of the loss of condo association insurance (underwriters disallow grow operations and will cancel our association policy), potential attraction of crime, and any pungent smell invading my business.

Thank you,

**Subject:** question regarding security

Hi,

regarding "(2) a security alarm system on all exterior doors and windows", my question is would a motion sensor on the inside of the facility, faced at the door with an alarm be sufficient? Or would it have to contact 911 or does it have to be the kind of alarm that is triggered by the door/window opening? From how it's worded we're assuming an alarm like [this](#) would work, but wanted to make sure.

Another question I have is about the security cameras. I remember early on hearing a specified resolution, but can't find one in the final regs. The cameras we have will be 720p, which seems sufficient enough, and to be able to actually store 40 days worth of footage. Is there a minimum resolution I'm just not seeing?

Thanks for your help,

Under section 3 SAC 306.715. The regulations state that a marijuana establishment must have "a security alarm system on all exterior doors and windows"

This of course is a very simple statement. It does not specify whether or not this needs to be a monitored alarm system. However, several lines down, it also states that the establishment must "describe the actions to be taken by a licensee, employee, or agent of the marijuana establishment when any automatic or electronic notification system motivation system alerts a local law enforcement agency of an unauthorized breach of security." This statement also does not specify if it is required for the alarm system to be monitored by an outside entity, but does raise the question. I am simply trying to be sure I have a thorough understanding of the regulations. This is not a hypothetical question. The regs are simply unclear on this issue.

**Subject:** Questions about security

Hello,

Just a few specific questions. I'm working on my operation plan for a limited marijuana cultivation facility. Are there requirements for any specific type of alarm system? Does it have to be the type that notifies local law enforcement? Or can it just notify me? I found that the regs really didn't spell that part out clearly.

So surveillance cameras...there are a lot of different products on the market. Do the cameras need to record 24/7? Or can they be motion activated?

I plan to purchase cameras that record in night vision, in that case, do I still need exterior lighting of areas under surveillance? And if so, can those be motion activated?

Thank you for your time,

Ginger Shinness

**Subject:** Re: Questions for compliance  
**Date:** Wednesday, March 16, 2016 5:24:02 PM

---

We have initiated an application for a marijuana retail license. We are in the process of doing renovations on the retail space and have a couple of questions regarding the regulation requirements.

1. Although the regulations require "restricted access" to any area where marijuana is displayed or sold, it does not specify what that term means. Does this mean you must have a separate "bud room" to conduct the sale of marijuana or is it compliant to have the entire store as a restricted access area with the required notices on the front door so that upon entry of the store, the employee checks the identification, gives them a identification badge, and then supervises their viewing and selection of their marijuana. We understand that would require one employee for every 5 customers in the store. However, as indicated, we have limited square footage and would like the area for the selection of marijuana as well as other accessories we plan to sell (i.e., pipes, t-shirts, CBD lotions, etc.), to be in one room. Any guidance would be appreciated.

Hi, My question has not been answered. Please tell me where I can get an answer. I am in the process of remodeling a building to house a marijuana retail store. Should I apply for the license now and expect to have a solution to the marijuana shipping(mailing, air cargo) legality question when my store opens? For example, will it be legal to send marijuana through the mail or air cargo if you live off the road system?

thank you,

John Walker

**Subject:**

Hello,

I have several questions that I would like to have answered.

I live in Sand Point which is located in the Shumagin Islands 570 air miles from Anchorage. We (my wife Shirley and I) own a building that is on commercial property and built this building originally as a pizza/beer wine establishment named Popof Pizza. We were in operation from 1987 - 2000 and we had a beer/wine license. We remodeled this building into a duplex and

rented it out and both units have separate entrances. Our current renters will be the managers/caretakers of our property. The other part of the duplex we would like to license for cultivation, manufacturer and sell.

1. I am concerned about expansion in the future. Can we get a license for 500 square feet and under and then upgrade to a bigger one or should we apply for the 500 and over now and pay the extra \$4000?
2. The current tenants live downstairs. The downstairs is twice the square footage and the upstairs. I am considering them moving upstairs and running the business downstairs. Can the manager live in the building with a separate entrance?
3. Is there room for a marijuana "cafe" or place to smoke on premises?
4. Can we get separate licenses to grow, manufacture and sell on the same premises?
5. How do we test? Send out by freight or by mail?
6. My son and I want to be on the license. Is that OK?

Answers to these questions will help me when I start the application process. Please let me know.

Thank you,  
James Brown

HI,

I live in Kotzebue. I would like to have a marijuana store and possible a cultivation facility in Kotzebue. I am aware that there are problems in getting the marijuana samples to and from the bush for the required testing. I am aware that shipping bulk marijuana from cultivation facilities may not be legal under federal law. Is there some solution to operating in the bush without having to ship bulk marijuana or samples to the lab in Anchorage for testing? I know that there was an exemption for cultivation or stores to operate in the bush(away from the road system) before the department of law approved the final marijuana regulations.

I hope you understand my question.

Thank you,

**Subject:** Timeline question  
**Date:** Thursday, February 25, 2016 11:05:05 PM

---

I've read the regulations, but still need clarification on when the local "clock" begins.

I live in a the city has allowed retail sales.

So let's say for example I apply for a state retail sales license on July 1st, and I follow all the reporting regulations. After the application is in, when does the city government discuss the matter if the city requires a CUP for the site of the retail shop? What I mean is, does that happen before or after the state approves the license?

Hope this makes sense, and thanks for the help.

Good afternoon,

I am curious if the requirement to list all shareholders of an involved entity includes those shareholders of Alaska Native Corporations, both regional and village corporations. It would seem that the listing requirement would preclude any and all Alaska Native Corporations the opportunity to obtain any form of cannabis business license. Would you please clarify?

Thank you and best regards,

**Subject:** Waste Disposal; 3 AAC 306.740. Waste disposal  
**Date:** Tuesday, March 15, 2016 10:45:00 PM

---

Hello, AMCO.

Firstly, thanks for your hard work answering questions about marijuana regulations.

I've researched 3 AAC 306.740 [Waste Disposal] and have a question about waste disposal and composting.

"(a) A marijuana establishment **shall store, manage, and dispose** of any solid or liquid waste, including wastewater generated during marijuana cultivation production, processing, testing, or retail sales, in compliance with applicable federal, state, and local statutes, or ordinances, regulations, and other law.

(b) Marijuana waste must be rendered unusable for any purpose for which it was grown or produced **before it leaves a marijuana establishment...**" (3 AAC 306.740)

My question: Can a cultivator compost their "marijuana plant waste, including roots, etc, that have not been processed with solvent," and then use that compost for their cultivation activities? In other words, the excess plant waste is composted and reused with the cultivation processes, and doesn't leave the marijuana establishment.

Thank you,  
Seth R.

**Subject:** Question regarding retail store bathroom  
**Date:** Monday, March 21, 2016 10:43:43 AM  
**Attachments:** [retail building plot.pdf](#)

---

Hello,

We are hoping to secure a marijuana retail space in downtown Juneau DBA The Fireweed Factory LLC. The building is an historic one that is unusual in size and location. Apparently, it is the smallest separate business store in town tucked between two other old buildings. The interior space is only about 150 sq. feet. The State marijuana regulations require a bathroom for each establishment, but this location does not have water supplied to it.

The city of Juneau has a regulation permitting the use of a nearby permitted bathroom for businesses. Here is the section out of Title 19 which is the City Ordinance that modifies the Building Codes.

**19.03.2902.3.2 - Plumbing systems; location of toilet facilities in occupancies other than covered mall buildings.**

In the exception, add a second paragraph as follows:

"For minor uses, the building official may approve facilities in nearby buildings under the same or different ownership with adequate assurance of continued access."

(Serial No. 2009-16(b), § 2, 9-21-2009; [Serial No. 2014-19\(c\), § 3, 7-30-2014, eff. 7-31-2014](#))

Our hours of operation would match those of the adjacent business providing the bathroom. There are two bars and two restaurants close by. I have also attached a plat of the proposed property and photos.

Would it be possibly to make use of the city's ordinance in order to comply with the State regulation? We would of course provide a signed agreement with the business providing the bathroom. Thank you for your consideration.

Ok, that right there is what is confusing, how can you estimate the sales tax on a clone. Clones are either going to be set in rockwool, oasis cubes, or will be directly placed into soil.

So, when I weigh my clone, I am also weighing the rockwool cubes/oasis cubes/soil?

You see my issue here? There is aeroponic cloning method and you could potentially weigh them out, but the problem with that, is the roots are very delicate, you generally don't want to tamper with them much.

This is going to be an issue trying to figure out what to tax these at.

Dollynda,

Yes, a licensed marijuana cultivation facility may purchase clones or seeds from another licensed facility. I made the following change the day I wrote you back but apparently failed to save and publish it. This is now on the website:

It's expected that cultivators will either start their plants from seeds or from cuttings only after receiving a license from the Marijuana Control Board. The regulations require that all cuttings that are 8" tall and present on the licensed premises on the day of license issuance be entered into METRC, the marijuana inventory tracking system. After the initial inventory is established, the regulations prohibit personal use marijuana or any marijuana that was not grown in a licensed marijuana cultivation facility and tracked as such being entered into the tracking system.

Hello,

I asked last week about the initial stock being used to start up a cultivation facility. the FAQ-s page states that after the initial start up no marijuana grown off premises can be entered into the facility tracking system. The question was is it referring to BUD or all marijuana? Can't a legal facility purchase clones or seeds legally in the state and enter new strains into the tracking system? It is important that marijuana cultivation facilities have room to expand the strains available and not just the initial few it may start with. I did receive a response indicating the website would clarify this, but still have not seen an update.

Thank you for your time,

**Subject:** RE: Distance from a church Lot  
**Date:** Friday, April 08, 2016 4:54:42 PM

---

Dear Cynthia,

I have contacted your office previously and asked questions pertaining to this property which is located in Fairbanks (218 Marten Dr. zoned Rural Agriculture) and I am considering licensing for a marijuana cultivation facility. My lot adjoins an active church and I am trying to determine if I can stay within the State of Alaska regulations to produce Marijuana on the property in the existing building. I have measured with a tape measure and find that it measures approx. 250 ft. from the main entrance of my shop to the property line. Since I did not feel comfortable going onto the church property I do not know exactly how far it is from my property line to the entrance of the church. I would guess that it is between 100 and 150 feet to the church main entrance. I talked with the borough people and they thought that the regulation was based on the nearest pedestrian route which we took to mean travelling in a roundabout fashion up my driveway, along the subdivision road (Marten Drive,) along McGrath Road and down the Church driveway. That was the only driveable or easily walking path. That route measured approximately 1300 feet. There is currently no fence separating my property from the church property, but the lot is heavily wooded and there would be no clear view available from the church onto my property. A direct route from the church property to my proposed facility would entail trespassing for a considerable distance and would not be easy walking since it is heavily wooded. Can you clarify the regulations for me.

On Fri, 25 Mar 2016 22:11:23 +0000, "Marijuana, CED ABC (CED sponsored)" <[marijuana@alaska.gov](mailto:marijuana@alaska.gov)> wrote:

Mr. Delbridge,

In your application, you are required to swear that your proposed establishment is not within 500 feet of the church, measured main entrance to main entrance. That is about all I can tell you about it. If you swear to that because it is the truth, it should be fine. If you swear to it and it is not true, that is obviously a problem. I am in no position to tell you how far it is from your proposed premises to the church.

Subject: Distance from a church Lot

Dear Sirs,

I earlier called your office to find out about the distance required from a church that is neighbor to my lot. I am proposing to use an existing garage that is approximately 300 feet from the adjoining lot line between my lot (which is 10 acres of rural agriculture land) located on Marten Drive, for an indoor marijuana growing facility. The North Star

Borough has already agreed that I am more than the required 100 foot setback from the church lot line. They asked me to check with you to see if the state requirement was more restrictive. The structure in question is an existing 24 by 48 square foot garage that is approximately 500 feet from the actual church building and is separated by heavy trees. As stated the rough measurement from the nearest corner of the building is 300 feet to the lot line between the church and my lot. There is another approximate 200 feet from the church's lot line and the actual church building.

My driveway and the only entrance to my property is accessed from Marten Drive which is an unpaved subdivision road that runs along the border of my property which is on the opposite side from the church. Please contact me as soon as you can so that I can continue to make plans in the process of submitting my plans for approval by the North Star Borough.

Thank You,  
Bruce Delbridge

**Date:** Wednesday, March 23, 2016 3:22:16 PM

---

We can reset the application, one time, back to "new" so that you can make the changes/start over. What is the license marijuana license number?.. and please make sure you use the email used on the application.

Thank you  
AMCO Staff

Subject: Leased Space Unit # Change On Application

We submitted an application indicating unit # 2 on our application and may be required to occupy unit # 4 in the same building. Do we have to start our application over or just modify the application indicating the new unit #. All other aspects of our application remain the same.

Thanks,  
Steve

<[marijuana@alaska.gov](mailto:marijuana@alaska.gov)> wrote:

Hi Mitch,

There is a project underway to create something we are calling a consumption endorsement for Retail Marijuana Stores. Retail Marijuana Stores are one of our four statutorily created license types. We do not have dispensaries or medical marijuana regulations in Alaska.

The consumption endorsement project is in its early stages. It will be an area of a retail store where members of the public are permitted to consume marijuana or marijuana products purchased in the store. Local governments will have a separate right of protest, so they could say yes to the store but no to the consumption endorsement if they have strict smoking ordinances, for instance. The rules around the consumption are in the process of being written. It will be easy for you to follow along on our website: <https://www.commerce.alaska.gov/web/amco/>. The Marijuana Control Board will review the first draft of the rules for the consumption endorsement at its April 27, 2016 meeting. The draft will then be posted on the website for 30 days of public comment. It will likely be both on the front page and under the section titled "Marijuana Statutes and Regulations" on the left hand bar.

The first stores in Alaska are expected to be licensed in September of 2016, approximately 90 days after the first cultivation facilities are licensed in June. It is our hope that the regulation project can stay on track so that consumption endorsements could be issued shortly after or in conjunction with retail store licenses.

Hope this helps,

Cynthia Franklin, Director

Alcoholic Beverage & Marijuana Control Boards

Hello, my name is Mitch Hughes and I am a legislative intern working for Colorado Representative Jonathan Singer, House District 11. I am writing to you to ask what plans your state has in regards to social use of marijuana, such as recreational use. I was told you may have something in the works for this area of policy and I was hoping to find out what those plans were. Any information you can give me is appreciated. Thank you for your time and I hope to hear back from you soon.

I'm 2 and 0 regarding applicants submitting for STATE approval in illegal locations, so I'm not as confident as you.

This is all new to everyone. And without slamming any industry, the president of "Smoke & Toke Sales" may not be as astute when applying for permits as the president of Conoco Phillips. My two recent examples presumably wasted \$1,000 each on an application fee without first securing a legal location.

**Subject:** RE: Marijuana Retail Store Application - License No. 10087

Just to clarify—when the MOA begins receiving applications for marijuana establishments, those applications will be posted on the MOA website through our CityView Portal system. At this time we have not accepted any applications because we require a completed state application, and the state has not deemed any applications to be complete.

However, it is unlikely that an applicant will submit for a municipal license/land use permit in an illegal location (such as a residential district).

I am glad the city does not post addresses.

And I doubt the state recognizes this, but at another location, we actually had people “cruising around looking to buy marijuana” prior to approval of any licensing or even occupancy of the vacant condominium, apparently based on publication of the proposed address and/or GPS coordinates. And addresses are critical to determine distances from the nearest church or school, but publication is a double edged sword.

Hopefully this will settle down once we get further down the trail (and hopefully these applicants will stop trying to set up in a condominium or homeowner’s association where it is not legally permissible). Right now, however, it appears somebody with an improper location can still get more than a \$1,000 worth of “free advertising/clientele” just by submitting an application for publishing on the state website and running a “Charlo Greene operation” until shut down.

Dear Ms. Honest and Ms. McConnell,

We are forwarding an email message received from a marijuana license applicant who asserts that he is withdrawing application for license no. 10087. The public notice listed on your website reflected an improper location in the middle of a residential neighborhood across from a homeowner's association park/recreation/youth center. We believe the applicable zoning would also prohibit the issuance of a license for this location, although the association has strong concerns with any reference to the residential address of 2891 Morgan Loop, Anchorage, AK 99516 appearing on your website. (The association previously experienced a robbery/holdup/kidnapping situation when some drug dealers apparently used a mistaken address, and a similar risk exists with any public information pointing potential criminals towards this location associated with a cash only marijuana retail store). You may not be aware of the situation, but at

We do not wish to create any problems for Mr. Weaver if he later decides to seek a license with an allowable address outside the homeowner's association. We will be following up with you next week, however, to ensure this particular application is withdrawn as requested by the applicant.

Any further assistance you can provide in scrubbing the address from public databases would be GREATLY appreciated.

Thank you,

Shane Osowski

Good Evening Shane,

I just went to the web site for my application attempting to edit or delete my file to remove my physical address that is posted as the future site of my proposed retail business, but I am unable to change the file. I will call the MCB tomorrow and request my application be deleted. I will be flying up to Barrow on the morning flight and cell coverage is troublesome, I'll be returning this weekend but will stay on this issue until it is resolved.

Lou Weaver

On Mar 22, 2016, at 05:12 PM, Shane Osowski <[Shane@akcondolaw.com](mailto:Shane@akcondolaw.com)> wrote:

Mr. Weaver,

Our firm represents the Terraces Homeowners Association. You apparently caused quite a stir when your retail marijuana store application listed "2891 Morgan Loop" as the physical address for a retail marijuana sales establishment. We understand you told the association manager that you intend to open a store at 1551 East Tudor Road, and the proposed business location is NOT "2891 Morgan Loop." Attached, however, is a copy of the "Public Notice" downloaded from the Alcohol & Marijuana Control Board indicating your home address as the physical location for the business. The listed GPS coordinates apparently point to a third location at 13101 Glen Alps Road.

We are asking that you immediately clarify the situation, correct the Public Notice to remove 2891 Morgan Loop as the physical address for this business, and provide documentation confirming the correction has been made.

This is a HUGE concern to the homeowner's association, as we previously had an armed robbery/hostage situation involving guns and drugs where one of the criminals obtained an incorrect address on Tulin Park Loop. The association will strongly object to any effort to store or sell marijuana at your home address, or advertise that the home has anything to do with a marijuana dealer. Frankly, we would strongly prefer you not even list Morgan Loop as your MAILING address, recognizing that marijuana businesses handle large sums of cash that most banking institutions cannot presently accommodate. You seem to be inviting a robbery by posting your home address on the internet, associated in any way with a marijuana dealership. Our firm represents another (commercial condominium) association where patrons showed up and tried to purchase marijuana simply based upon the address and GPS coordinates listed on their application (prior to approval or commencement of business, as the applicant withdrew their submission after receiving the Homeowner's Association objection).

The declaration for the Terraces strictly prohibits any type of business operation, other than home professional pursuits with no external evidence of a "business." (So an accountant may work on files at home during the evening, but may not meet with clients at the residence). We can assure you this restriction will be STRICTLY enforced, especially in any situation involving marijuana sales. Violations can result in fines (secured by a lien), injunctive litigation, and

potentially the foreclosure of property if fines are levied and unpaid.

We are attaching a draft letter that I prepared before the manager informed me of your address discrepancy. We assume you would much prefer to avoid having any "objection" or "protest" to your licensing effort, so we will not finalize or send the letter if you correct the address and provide documentation of that correction within five days.

We wish you the best in your upcoming business venture, although we also respectfully insist that your business not impact The Terraces in any manner.

Please contact me with any questions or concerns regarding the above, and we thank you in advance for your assistance in this matter.

Sincerely,

Shane Osowski

---

I am glad the city does not post addresses.

And I doubt the state recognizes this, but at another location, we actually had people “cruising around looking to buy marijuana” prior to approval of any licensing or even occupancy of the vacant condominium, apparently based on publication of the proposed address and/or GPS coordinates. And addresses are critical to determine distances from the nearest church or school, but publication is a double edged sword.

Hopefully this will settle down once we get further down the trail (and hopefully these applicants will stop trying to set up in a condominium or homeowner’s association where it is not legally permissible). Right now, however, it appears somebody with an improper location can still get more than a \$1,000 worth of “free advertising/clientele” just by submitting an application for publishing on the state website and running a “Charlo Greene operation” until shut down.

Dear Mr. Osowski,

Thanks for your email. I appreciate the concerns of the homeowner’s association. The Municipality does not post the public notices that we receive from applicants for a state license on the municipal website. I hope that the state is able to respond to Mr. Weaver’s request in a timely manner.

Sincerely,  
Erika McConnell

**Subject:** FW: Marijuana Retail Store Application - License No. 10087

Dear Ms. Honest and Ms. McConnell,

We are forwarding an email message received from a marijuana license applicant who asserts that he is withdrawing application for license no. 10087. The public notice listed on your website reflected an improper location in the middle of a residential neighborhood across from a homeowner's association park/recreation/youth center. We believe the applicable zoning would also prohibit the issuance of a license for this location, although the association has strong concerns with any reference to the residential address of 2891 Morgan Loop, Anchorage, AK 99516 appearing on your website. (The association previously experienced a robbery/holdup/kidnapping situation when some drug dealers apparently used a mistaken address, and a similar risk exists with any public information pointing potential criminals towards this location associated with a cash only marijuana retail store). You may not be aware of the situation, but at

We do not wish to create any problems for Mr. Weaver if he later decides to seek a license with an allowable address outside the homeowner's association. We will be following up with you next week, however, to ensure this particular application is withdrawn as requested by the applicant.

Any further assistance you can provide in scrubbing the address from public databases would be GREATLY appreciated.

Thank you,

Shane Osowski

Good Evening Shane,

I just went to the web site for my application attempting to edit or delete my file to remove my physical address that is posted as the future site of my proposed retail business, but I am unable to change the file. I will call the MCB tomorrow and request my application be deleted. I will be flying up to Barrow on the morning flight and cell coverage is troublesome, I'll be returning this weekend but will stay on this issue until it is resolved.

Mr. Weaver,

Our firm represents the Terraces Homeowners Association. You apparently caused quite a stir when your retail marijuana store application listed "2891 Morgan Loop" as the physical address for a retail marijuana sales establishment. We understand you told the association manager that you intend to open a store at 1551 East Tudor Road, and the proposed business location is NOT "2891 Morgan Loop." Attached, however, is a copy of the "Public Notice" downloaded from the Alcohol & Marijuana Control Board indicating your home address as the physical location for the business. The listed GPS coordinates apparently point to a third location at 13101 Glen Alps Road.

We are asking that you immediately clarify the situation, correct the Public Notice to remove 2891 Morgan Loop as the physical address for this business, and provide documentation confirming the correction has been made.

This is a HUGE concern to the homeowner's association, as we previously had an armed robbery/hostage situation involving guns and drugs where one of the criminals obtained an incorrect address on Tulin Park Loop. The association will strongly object to any effort to store or sell marijuana at your home address, or advertise that the home has anything to do with a marijuana dealer. Frankly, we would strongly prefer you not even list Morgan Loop as your MAILING address, recognizing that marijuana businesses handle large sums of cash that most banking institutions cannot presently accomodate. You seem to be inviting a robbery by posting your home address on the internet, associated in any way with a marijuana dealership. Our firm represents another (commercial condominium) association where patrons showed up and tried to purchase marijuana simply based upon the address and GPS coordinates listed on their application (prior to approval or commencement of business, as the applicant withdrew their submission after receiving the Homeowner's Association objection).

The declaration for the Terraces strictly prohibits any type of business operation,

other than home professional pursuits with no external evidence of a “business.” (So an accountant may work on files at home during the evening, but may not meet with clients at the residence). We can assure you this restriction will be STRICTLY enforced, especially in any situation involving marijuana sales. Violations can result in fines (secured by a lien), injunctive litigation, and potentially the foreclosure of property if fines are levied and unpaid.

We are attaching a draft letter that I prepared before the manager informed me of your address discrepancy. We assume you would much prefer to avoid having any “objection” or “protest” to your licensing effort, so we will not finalize or send the letter if you correct the address and provide documentation of that correction within five days.

We wish you the best in your upcoming business venture, although we also respectfully insist that your business not impact The Terraces in any manner.

Please contact me with any questions or concerns regarding the above, and we thank you in advance for your assistance in this matter.

Sincerely,

Good point—however, the zoning locations are regulated by the MOA, not the state, so the state is not in a position to advise applicants that their location is illegal. Planners at the MOA would advise applicants that they are about to lay out \$1700 for an application in an illegal location. Hopefully that will help!!!

I'm 2 and 0 regarding applicants submitting for STATE approval in illegal locations, so I'm not as confident as you.

This is all new to everyone. And without slamming any industry, the president of "Smoke & Toke Sales" may not be as astute when applying for permits as the president of Conoco Phillips. My two recent examples presumably wasted \$1,000 each on an application fee without first securing a legal location.

Just to clarify—when the MOA begins receiving applications for marijuana establishments, those applications will be posted on the MOA website through our CityView Portal system. At this time we have not accepted any applications because we require a completed state application, and the

state has not deemed any applications to be complete.

However, it is unlikely that an applicant will submit for a municipal license/land use permit in an illegal location (such as a residential district).

**Date:** Tuesday, March 29, 2016 9:21:23 PM

---

Dear Director,

I received your email and just today was able to get a copy machine big enough to run off some of the information you sent me, such as 131 pages of regulations. I have not been able to review all the information, so today I called your office and talked with Joe S. I asked him that the Musky Ox LLC, #10134 and 310135 shows a 2/29/16 public notice date on your website. I asked him if I still had time to object to the application as today is March 29th. Do I have an additional day or does the public comment period start to run thirty (30) days after the last public notice in the Fairbanks Daily News Miner dated March 18, 2016. Joe told me that the period for public comment runs thirty days from the March 18, 2016 date. I am writing you to make sure I get confirmation of this important issue.

Honestly, we are not sure at this time whether or not we will oppose the application. I have reached out to the applicant, my neighbor Mr. Mansker last week and he called yesterday. It is my intention and the intention of other neighbors to have coffee with the applicant and try to better understand his marijuana pot growing operation. This operation proposes to build a Standard Marijuana Cultivation Facility in a residential neighborhood.

I also asked Joe today if he would ask you again if I am able to receive a copy of the Musky Ox LLC application and any other correspondence, emails, etc. between the applicant and the division or if I had to file a formal FOIA request. He said that he didn't think the application could be made available to me. He said he would get back to me. Please let me know what information the division will give me and what information they will not provide.

Thank you again. I can just imagine the work that has to go into implementing this new law and regs and I hope my requests do not overburden your staff.

With kind regards,

Jim Sampson

At this point, our primary interest is there a requirement that the retail point of sale system have to track the inventory via lots, from receiving to sale (to the customer)? Or is there any type of serialization that needs to be done in any of the product sales? This would all be for retail sales, not distribution or manufacturing.

John is out this week.

I am not really sure what you want to discuss. Interfacing with the seed to sale tracking system? If so, it is probably best to wait until Franwell does its Metrc presentations in early April then bring back questions after that. Metrc is not up yet, so no one at AMCO is ready to start talking about the API between specific systems and Metrc. If I have this completely wrong, please clarify.

Hope this helps.

Hi Ginger,

Yes you are right the notice was up on the property. I had Paul take a walk up there and he found it. I intended to let you know that he found it but I became ill Sunday and it just got worse. I had to make a trip to Providence Hospital for an emergency appendectomy Tuesday.

I responded to all the email addresses you sent this email to so they should see my response. I'm sorry I couldn't respond sooner.

I'm glad to hear that you plan to stay on the property while it is producing product. That changes the safety issues greatly.

Hi Shirley,

Just wanted to touch base with you again about the public notice. Just got home from paying a visit to the property to be sure everything is in order. We found our public notice right where it should be, posted on a tree next to the driveway. Now, it has been up for well over the required ten days, but we decided to go ahead and leave it up a bit longer just in case you would like to take a look for yourself.

I don't believe you would intentionally lie to the Marijuana Control Board, I think perhaps you were just confused about where you should find the notice. However, the bottom line here is you gave them false information. No big deal. It just needs to be cleared up. I would appreciate it if you would please notify the control board that you gave them misinformation regarding our public notice.

Thank you,  
Ginger

**Subject:** Question regarding retail store bathroom

Hello,

We are hoping to secure a marijuana retail space in downtown Juneau DBA The Fireweed Factory LLC. The building is an historic one that is unusual in size and location. Apparently, it is the smallest separate business store in town tucked between two other old buildings. The interior space is only about 150 sq. feet. The State marijuana regulations require a bathroom for each establishment, but this location does not have water supplied to it.

The city of Juneau has a regulation permitting the use of a nearby permitted bathroom for

**businesses.** Here is the section out of Title 19 which is the City Ordinance that modifies the Building Codes.

**19.03.2902.3.2 - Plumbing systems; location of toilet facilities in occupancies other than covered mall buildings.**

In the exception, add a second paragraph as follows:

"For minor uses, the building official may approve facilities in nearby buildings under the same or different ownership with adequate assurance of continued access."

(Serial No. 2009-16(b), § 2, 9-21-2009; [Serial No. 2014-19\(c\), § 3, 7-30-2014, eff. 7-31-2014](#))

Our hours of operation would match those of the adjacent business providing the bathroom. There are two bars and two restaurants close by. I have also attached a plat of the proposed property and photos.

Would it be possibly to make use of the city's ordinance in order to comply with the State regulation? We would of course provide a signed agreement with the business providing the bathroom. Thank you for your consideration.

Hello Cynthia,

We just received an email from CBJ planner Chrissy Steadman letting us know that you were concerned we had applied for our Conditional Use Permit before we received our state cultivation permit. We mistakenly thought that we had to have our CUP approved before our state application could be complete. We just wanted to assure you that we would not be starting our cannabis business until we have received our state permit.

With very few limited warehouse locations in Juneau, after several months we were still unable to procure a grow location. Our plans had to change. So we decided to apply for a CUP in our residential area zoned for limited cultivation to make sure it would be possible. After two months and many difficulties, our CUP was finally accepted for processing but it is far from approved. With the many conditions that were added to our CUP our current plan is to apply for a new CUP at a different commercial location.

This time we will apply for our state cultivation permit before we apply for our new CUP. Hopefully this information reassures you that we have no intention of opening our business until we have all state and city permits. Let us know if you have any questions or need any other confirmation of our status.

Thank you for your time and effort.

Paul V. Disdier and June E. Hall

Thank you for the quick reply, we'll work on getting a bathroom put into the building.

June and Paul,

We do not consider the issuance of a marijuana license and the regulation requiring toilet and hand washing facilities in 3 AAC 306.735(b)(2) and (3) to be a "minor use".

You are going to have to meet the requirement that the premises have a bathroom. Sorry.

**Subject:** Question regarding retail store bathroom

Hello,

We are hoping to secure a marijuana retail space in downtown Juneau DBA The Fireweed Factory LLC. The building is an historic one that is unusual in size and location. Apparently, it is the smallest separate business store in town tucked between two other old buildings. The interior space is only about 150 sq. feet. The State marijuana regulations require a bathroom for each establishment, but this location does not have water supplied to it.

The city of Juneau has a regulation permitting the use of a nearby permitted bathroom for businesses. Here is the section out of Title 19 which is the City Ordinance that modifies the Building Codes.

**19.03.2902.3.2 - Plumbing systems; location of toilet facilities in occupancies other than covered mall buildings.**

In the exception, add a second paragraph as follows:

"For minor uses, the building official may approve facilities in nearby buildings under the same or different ownership with adequate assurance of continued access."

(Serial No. 2009-16(b), § 2, 9-21-2009; [Serial No. 2014-19\(c\), § 3, 7-30-2014, eff. 7-31-2014](#))

Our hours of operation would match those of the adjacent business providing the bathroom. There are two bars and two restaurants close by. I have also attached a plat of the proposed property and photos.

Would it be possibly to make use of the city's ordinance in order to comply with the State regulation? We would of course provide a signed agreement with the business providing the bathroom. Thank you for your consideration.

Hey Ms. Franklin:

No problem. Good luck with the budget request.

I'm turning the Mat-Su Businesses into a lovingly constructed .xls as we speak, based on your data.

See/hear you in Houston for the meeting on March 24, assuming you're still planning on attending.

**Subject:** Waste Disposal Questions

I've been getting calls from potential marijuana related businesses and I don't want to give out any wrong info. I've read through regulation AAC 306.740 regarding waste disposal. From what I can read, as long as the business:

- Does whatever they need to do regarding the waste itself in your inventory tracking system
- Grinds or renders destroyed with a solvent their related products (roots, leaves, stalks, stems, etc)
- Mix with other waste (compostable or not) to a proportion no more than 50% marijuana waste
- Knows on record waste's final destination

It can just go in a regular dumpster, in my regular trucks, to the transfer station/landfill of each region's normal disposal? Is there anything more complicated than that for me to worry about or advise them on regarding their plan for waste disposal?

Brad

Hello,

I began applying for a Marijuana Cultivation Facility License 2 weeks ago. The License is #10110 and my Business License is #1033018 under Popof Greenhouse. After further research, I have decided that this will probably not work for me. Due to the remoteness and small population, it would not be cost effective. No public notices have been posted. Therefore I do not plan on pursuing this license any more.

Thank you,  
James Brown

The regulations are silent as to how you get your marijuana to a testing facility, except that it must be manifested and tracked using the state procured marijuana inventory tracking system.

**Subject:**

Hello,

I have several questions that I would like to have answered.

I live in Sand Point which is located in the Shumagin Islands 570 air miles from Anchorage. We (my wife Shirley and I) own a building that is on commercial property and built this building originally as a pizza/beer wine establishment named Popof Pizza. We were in operation from 1987 - 2000 and we had a beer/wine license. We remodeled this building into a duplex and rented it out and both units have separate entrances. Our current renters will be the managers/caretakers of our property. The other part of the duplex we would like to license for cultivation, manufacturer and sell.

1. I am concerned about expansion in the future. Can we get a license for 500 square feet and under and then upgrade to a bigger one or should we apply for the 500 and over now and pay the extra \$4000?
2. The current tenants live downstairs. The downstairs is twice the square footage and the upstairs. I am considering them moving upstairs and running the business downstairs. Can the manager live in the building with a separate entrance?
3. Is there room for a marijuana "cafe" or place to smoke on premises?
4. Can we get separate licenses to grow, manufacture and sell on the same premises?
5. How do we test? Send out by freight or by mail?
6. My son and I want to be on the license. Is that OK?

Answers to these questions will help me when I start the application process. Please let me know.

Thank you,  
James Brown

**Date:** Sunday, March 20, 2016 8:53:09 AM

---

My husband and I are very concerned about the ability of this couple to operate this facility in a manner which will keep the residents of this area safe. We are adamantly opposed to it.

This area is off grid, no electric power, no fire service, no road maintenance other than what the people provide that live on Rampart Loop. The access to their location is little more than a 4-wheeler trail. It is a wooded site on the north side of a hill so they will need to run a generator all the time for power. It would be very difficult to get a drilling rig up there, so what will they do for water? And how will they dispose of waste? They will not be living on site so will need video surveillance for security and fire safety. Cell phone service is not reliable in that area. A spring flows out of that area which provides drinking water for many of the dry cabins here, and it's the only one available to them.

Rampart Loop isn't a loop road, there is only one way out of here for some fifteen families if there was a fire. Their property is closer to the access road than any of us and we would be trapped. They live four hours from this site; how can they guarantee safe operation?

I would like to know how their Operating Plan addresses these concerns.

I understand they are to post their application on the proposed site for 10 days. There isn't one there. The notice was posted at the Talkeetna Post Office on March 18th but the posting date said March 6th... a neighbor watched her put it up. There was nothing on KTNA, our only radio station listing this application. We don't have a local newspaper. If they aren't willing to follow the requirements at this point why would they meet their obligations set forth in the regulations for operating a Marijuana Cultivation Facility?

John Calder,

On March 18th I became aware of a Marijuana Cultivation Facility that was planned at 22716 Rampart Loop E., Talkeetna when Nancy Yow, my neighbor watched Ginger Shinness post this on the board at the Post Office. The posting date is listed as March 6, 2016. I checked your website and saw that it was Initiated on Feb. 24, 2016.

We have some concerns with this proposed facility and would like to know how long we have to respond to this? Ginger said one day???? There has been no notice of this on our local radio or the PO board until 3/18/16.

Hello,

I would like to know about the legality of marijuana social clubs. I'm referring to a place that is a private club, that accepts member fees, and allows members to consume marijuana on site.

I have found conflicting information on the subject and am not sure where to look for the right answer.

Thanks

Hi. Sorry to bug you. I tried to find this on your website and in the regs, but couldn't locate anything. I'm sure it's there, but can you tell me if there will be a tax on extracting the oils from marijuana, and if there is a tax on producing edibles? I am aware of the \$800/lb tax on growing, but am not sure about extraction and producing. Thanks so much.

**Subject:** Testing for island communities.  
**Date:** Friday, April 01, 2016 7:17:35 AM

---

Hello,

My name is Jason Kolanko and I am currently applying for a variety of marijuana licenses. I live in Ketchikan, and I believe it is not likely that someone will establish a testing facility here in the near future. For cultivars in isolated communities, is there an acceptable way to transport marijuana to be tested to a testing facility? Or is there still no legal method for this to occur?

Also, is there a way to electronically submit my supplemental documentation for my Standard Cultivation License? Or does it need to be mailed? If it needs to be mailed, what is the address?

I would appreciate your insight into this matter.

Thank you,

**Subject:** Valdez Mike Liljedahl's License Application-SUPPORT  
**Date:** Friday, April 01, 2016 10:47:38 AM

---

I am writing in support of Mike Liljedahl's application for a commercial grower's license.

-so far, no one else has applied for a license in this community. We need both commercial growing and sales in this community so those people who want to use cannabis can obtain it locally.

-people who object to cannabis forget it is a legal substance, just like alcohol. The battle over whether it should be legal to grow, consume and sell has already been fought, and the prohibitionists LOST in the referendum. Mike should be allowed to open his business like any other business in this state. He is a businessman, pure and simple.

-the black market for cannabis thrives because state regulations are so onerous. Imagine taxing a bottle of booze \$50. By taxing commercial production or sales so much, reality is that the underground market will thrive. The State of Alaska, in this respect, is too greedy for their own good. A minor in economics in college taught me that the price (tax) of a commodity should be such that the State is able to maximize its profit (not per item, but total). By taxing MJ so dearly, you encourage people to grow their own, or turn to the black market. I'm a realist. I don't use the stuff myself and have not in more than 25 years, but if my neighbors want to, allow them to, without undo regulation on cultivation, possession, sale or use.

-outlawing public consumption should be modified with okay for vaporizing. There will be no smoke for people to complain about. Where beer or wine is allowed, cannabis vaping should be allowed. I want to go to a bar for a beer and don't care if cannabis is sold there for people to vape. After all, they have as much right to relax over cannabis as I do to relax over beer.

-please don't create some sort of giant State apparatus to regulate cannabis. Your budget should be based on the number of licenses you regulate; you don't need 1000 State employees to regulate 10 licenses. You want a bigger budget? Grant more licenses without all the drama; demands for testing labs, product identification, labelling, etc. Treat cannabis like alcohol as both are intoxicants.

-ignore the "Refer Madness" doom prediction by clergy, pastors, cops, teachers....people of my HS generation (1962) smoked in college, and we did not turn into zombies, lose all ambition, become heroin addicts; we went on to respectable careers as engineers, doctors, lawyers, judges, police, carpenters, plumbers, teachers....the war on drugs has been a war on people and over 1 Trillion dollars has been wasted by trying to legislate them out of existence, and it has failed miserably. Please don't add to the difficulty in allowing people to do what they will do anyway, with or without your regulations. Keep it simple, Stamp applications OK. Alaska needs money, visitors and Bud-N-Breakfasts to pump some money into this economy. Oil is not the big earner for the

State that it once was. We have scenic beauty, lots of room, and a population which can thrive if we give them the opportunity. People from all over the US now flock to Colorado. People from all over the world flock to Amsterdam to enjoy a smoke.

That money should be coming to Alaska. You have it in your power to turn this economy around. Let the retail and wholesale business succeed or fail purely on supply and demand grounds. Make regulations easy and allow growers and sellers exist. If the product is bad, if the place is bad, they will go out of business. Make it unprofitable for the black market to exist and the State will be rolling in money.

**Subject:** Waste Disposal Questions  
**Date:** Monday, March 28, 2016 2:37:30 PM

---

I've been getting calls from potential marijuana related businesses and I don't want to give out any wrong info. I've read through regulation AAC 306.740 regarding waste disposal. From what I can read, as long as the business:

- Does whatever they need to do regarding the waste itself in your inventory tracking system
- Grinds or renders destroyed with a solvent their related products (roots, leaves, stalks, stems, etc)
- Mix with other waste (compostable or not) to a proportion no more than 50% marijuana waste
- Knows on record waste's final destination

It can just go in a regular dumpster, in my regular trucks, to the transfer station/landfill of each region's normal disposal? Is there anything more complicated than that for me to worry about or advise them on regarding their plan for waste disposal?

Brad

Hello John,

**I am interested in applying for a grow, cultivation and retail sales license. I live in Sand Point, a community that is located 600 miles southwest of Anchorage on an island. The only way in is by air or boat. I used to run a restaurant that served food and beer/wine and would like to use the same facility. I have a few questions:**

- 1. Can I get a license to do all of these things? I plan on growing and selling only my product.**
- 2. Are there any differences between the 500 sq ft or unlimited regulations?**
- 3. How do you handle inspections since it costs about \$1000 for a flight here?**
- 4. Can I make a comment or is this it?**

**I would really like to do this so I would like to get off on the right foot.**

**Thank you,  
James Brown**

## An Open Letter

Hello Everyone

Today (03-21-16) the U.S. Supreme Court handed down its ruling on the “*Marijuana*” case of Nebraska & Oklahoma vs. Colorado (Cite as: 577 U.S. \_\_\_\_ (2016)). The States of Nebraska & Oklahoma’s “*MOTION FOR LEAVE TO FILE A BILL OF COMPLAINT*” was “*denied*” without comment. Attached to this message is a PDF File copy of the “*Dissenting Brief*” of Justice Thomas and Justice Alito of that case and the “*Dissenting Brief*” may be downloaded from the Internet at: <http://tinyurl.com/zzcnf7g>. The “*Dissenting Brief*” may be found at the end of the listing of “*Court Orders*” of the U.S. Supreme Court.

You may have recalled several months ago, that I gave everyone a warning that the government of the “*United States*” (<http://tinyurl.com/zhkffa6>) in Washington, D.C. is a conquered and an overthrown government that is now occupied by “*Agents*” of a foreign country known as “*Vatican City*” (<http://tinyurl.com/9otqape>). Those “*Agents*” are the “*Jesuits*” (<http://tinyurl.com/hj3q7dg>) of the Roman Catholic Church (<http://tinyurl.com/z2oqevq>).

As with any country that has been overthrown and occupied by a conquering nation, the first thing that the conquering nation will do is to take possession of all branches of government and impose its will upon the people either by violent or subtle means. At the moment, the “*Catholic Jesuit Pontiff*” (<http://tinyurl.com/zo5g3zp>) of the “*Vatican City*” has been able to subdue the people of our nation through its “*Agents*”

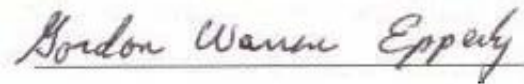

in our Federal Courts, the Office of President of the United States, and the U.S. Congress. The country of the "Vatican City" owns our Nation's supply of money as the "Catholic Church" is the "secret" principle stockholder of the Federal Reserve Bank (<http://tinyurl.com/7szso>).

In regard to the case of Nebraska and Oklahoma vs. Colorado (<http://tinyurl.com/h77qxe6>), it was the Catholic members of the U.S. Supreme Court that denied those States a ruling on the "Marijuana" laws of the "United States." Please keep in mind that several months ago the names the "Jesuit Members" of the Roman Catholic Church that wrote and sponsored the "Marijuana Initiatives" of the States of Colorado, Oregon, Washington, and Alaska were given to you. The drug of "Marijuana" is being used as a tool of "WAR" upon the people of our "Nation" for the purpose of subduing our young generation from having the will to oppose the "Catholic Jesuit Pontiff's" goal of World dominance. Do you not understand the term "New World Order" (<http://tinyurl.com/zaq42b6>) as expounded by the Catholic "Bush" Presidents (<http://tinyurl.com/jxkb7g4>) of our Nation? Do you not understand why the "Jesuits" implanted Presidents into Washington, D.C. that do not have Constitutional qualifications of being "natural born Citizens of the United States"? Keep in mind that Barack Hussein Obama never had a father that was ever a "Citizen of the United States" and that Presidential Candidates Ted Cruz and Marco Rubio also do not have fathers that were "Citizens of the United States" at the time of their births, a requirement of being "natural born Citizens" of our Nation. But that is no problem, they were and are sponsored and represented by "Jesuits" of the Roman Catholic Church.

I would also like to remind the "Public Officials" of the "City and Boroughs" of the State of Alaska that the question of legalization of "Marijuana" by the States has never been resolved by any Federal Court. All the "Civil" Marijuana Court Cases that have been before the Federal Courts have all been "dismissed" for "want of standing" including the U.S. Supreme Court case of "Nebraska and Oklahoma vs. Colorado" and any "Opinions" that may have been offered by a U.S. District Court Judge of the U.S. District Court for the District of Colorado are merely "dictum" (<http://tinyurl.com/zr56f9t>) Opinions. The failure of the Federal Courts to address the Constitutional questions of the States to legalize the use of "Marijuana" leaves every "Public Official" of the State of Alaska and its municipal corporations in an awkward position, for a day will come when someone will have the "standing" of damages to bring a civil action against the offending businesses and those who issued "colorable" licenses to those businesses for "farming," "distributing," and the "selling"

of "Marijuana" in violation of the "Federal Control Substance Law"  
(<http://tinyurl.com/zv2gt76>) and the "Racketeering Laws" (<http://tinyurl.com/ptps7xn>)  
of "The United States of America."

Respectfully Submitted

**Subject:** marijuana cultivation/property loan question  
**Date:** Friday, March 18, 2016 12:46:41 PM

---

Hello- I have a question regarding the state marijuana regulations, I was hoping someone could answer it for me.

I am interested in a particular property that complies with all state and borough zoning requirements, buffer zones etc. But I would need to acquire a home loan to purchase the property.

Is there a restriction on having an Alaska state marijuana cultivation license if I have a federally backed home mortgage?

I looked for this question on the FAQ page and did not find it.

Appreciate your help,  
Jessica.

To the CBJ Assembly Members:

I appreciate the hours and energy that many of you have put into this marijuana issue.

I see from the Ordinance of the CBJ that Article X. Marijuana Establishments in 49.65.1100 states that the purpose to allow this is to be done in a manner that promotes **public health, safety and general welfare**.

We have experienced an enormous amount of oral and written information as to the entrepreneurial possibilities of this business and the tax revenues that may accrue to the municipality and to the state.

I have seen very little that speaks to the **public's health, safety and general welfare**. The professional literature is replete with this information and there are professionals in our community who are knowledgeable about the short and long term uses by children, adolescents, pregnant women and other adults. To pretend that the **public's health and safety** is not an issue or mandate of the CBJ Assembly in their deliberations and decision making is to abdicate responsibility for the purpose of the Ordinance.

As to the point of this week's angst, I ask that the Assembly look very seriously and with some science and reason at the **public health and safety** concerns of this zoning change. There are many in this community who believe this review of the **public's health and safety** has not been done. To name a few of the concerns:

- Water and air toxicity potential. Who will test and where is the oversight? Cost of this oversight?
- Security. The Juneau Police Department does not appear to have sufficient officers to care for the issues before this community now. I have heard officers state that marijuana will be a low priority in the scheme of things. This can include burglary, noise, altercations and other crime related activities that other states have recorded. This is bad enough in an industrial area - but in a residential area? Why? Who will pay for this additional involvement by the police?
- Freedom of residential area occupants to carry out the activities of residents in other residential areas. Why the inequity? A statement that these areas are "remote" appears to be a sham at addressing the issue. When does something get called "remote" and when does it stop being "remote" and turn into something else - when it is defined as residential? Who has priority in a residential area where a family wishes to have a day care facility for children and the "marijuana establishment" is already "established" within a buffered zone? Who wins on that one?

This zoning issue needs much more work, information, and reasoned discussion with all of the stakeholders transparently at the table before the "knee-jerk" decision of this slippery slope is cast in stone, concrete or among the weeds. When will a decision be made to move this decision making to another residential area? When will buffers be changed in residential areas? Slippery slopes are slippery.

This issue involves much more than entrepreneurs walking it to the bank (if there are any) or tax collectors filling the coffers. This issue involves families with children, communities that care about each other and their surroundings, businesses that belong in an industrial area, and a sense of pride and ownership of where we live and work. I think we can do better than screw it up so early in the game.

Attached is a brief report on one of many articles that can provide information to decision makers. I hope you will read this. I hope you will read and discuss other professional health literature. I hope you will consider the concerns. We have time and do not need to ask for a train wreck. Please let me know if there are questions or if I can provide additional information.

Thank you for this consideration.

Howdy,

I've been fielding many concerns from my constituents vis-a-vis the marijuana business permitting. The one question I'm not sure of is if the State will be sending an individual to survey the neighborhood and take measurements for the buffer zones. Some of the proposed establishments seem to be within the buffer distances, and it would be reassuring to know that the State will be meticulously making those measurements, and not just waiting for after-the-fact complaints.

I'm also curious if there is anything official that notes that daycares are covered under the definition of "Recreation and Youth Center". It seems obvious from the definition, but would be good to have it stated.

Thanks,

Lance Roberts

---

I am interested in the training session next Wednesday, but I don't understand the term "Seats will be limited by venue" on a first come, first served basis. I understand the first come, first served portion.

Can you please clarify?

Thank you,

Deborah Hutchens

---

I have a course curriculum almost finis he'd but I am having a little bit of trouble finding the penalties for unlawful acts by a employee, or agent of a marijuana establishment.?  
Is Article 8 of AAC 306 have all the information for penalties for unlawful acts by a licensee, employee, or agent of a marijuana establishment?  
Also I am wondering if you have had many courses submitted awaiting approval so far?

---

I am a long time homeowner at 1000 Bennett Road in Fairbanks, Alaska. Bennett Road is approximately 2 miles long and is residential in nature. I recently saw an announcement in the local paper by Musky Ox LLC requesting a license for a new Standard Marijuana Cultivation Facility License 3. The applicant resides at 741 Bennett Road, Fairbanks, Alaska.

I am interested in receiving any information submitted to the Alcohol and Marijuana Control Board/Office by Musky Ox LLC and/or any correspondence, emails, etc between Musky Ox LLC and the ABC Board or staff.

I would ask that you to let me know when this application for a new Standard Marijuana Cultivation Facility will be on an agenda and would like to know what criteria the board uses to approve or deny this application.

Thank you for your public service and your assistance.

Please find attached a scanned letter respectfully objecting to Unit #306 in the Airport Plaza Condo Association business park being used for a marijuana business.

This comment is per the public notice that was posted in the window of Unit #306 for a short period of time directing interested parties to submit written comment not later than 30 days after the notice of application. The posting date on the notice in the window was February 24, 2016.

Sincerely,

Gail Galleher

Hi John,

We are a local point of sale vendor here in Anchorage and are looking to provide point of sale solutions to licensed retailers of marijuana. Do you have time this week for a 10 to 15 minute phone call to discuss some specifics regarding how the State envisions handling transactions at a point of sale level?

Thanks in advance,

---

Hi Shirley,

Just wanted to touch base with you again about the public notice. Just got home from paying a visit to the property to be sure everything is in order. We found our public notice right where it should be, posted on a tree next to the driveway. Now, it has been up for well over the required ten days, but we decided to go ahead and leave it up a bit longer just in case you would like to take a look for yourself.

I don't believe you would intentionally lie to the Marijuana Control Board, I think perhaps you were just confused about where you should find the notice. However, the bottom line here is you gave them false information. No big deal. It just needs to be cleared up. I would appreciate it if you would please notify the control board that you gave them misinformation regarding our public notice.

Thank you,  
Ginger
