Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board approval of a new marijuana product or marijuana concentrate for production at its licensed premises, under 3 AAC 306.100 and 3 AAC 306.525. **The required \$250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the Marijuana Control Board has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the licensed establishment.

Licensee:	R.C. Tinderbox, LLC	License Number:	10301		
License Type:	Marijuana Concentrate Manufacturing Facility				
Doing Business As:	R.C. Tinderbox, LLC				
Premises Address:	7801 King St.				
City:	Anchorage	State:	AK	ZIP:	99518

Section 2 – Proposed Marijuana Concentrate or Marijuana Product

Review 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the licensed establishment will meet the listed requirements.

Product Name:	Shatter
Type:	Concentrate - for Inhalation

Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

Product Description: Details must include the color, shape, and texture.	Color ranges from black to green to golden. Shape is amorphous. Texture can range from sticky to crystalline.
Ingredients: This box is not applicable to marijuana concentrates	N/A
Standard Production Procedure and Detailed Manufacturing Process:	The process of creating shatter is to pour cannabis oil onto silicone mats and put into a vacuum oven. The vacuum oven cooks the cannabis oil under low pressure to create shatter.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	A close-up photograph of cannabis shatter. The shatter is a translucent, golden-yellow, amorphous solid with a crystalline texture. It is broken into several irregular pieces, showing its brittle nature. The background is a plain, light-colored surface.

Phone: 907.269.0350

Section 3 – Proposed Product Packaging and Sample Label

Review 3 AAC 306.565 - 3 AAC 306.570, and identify how the licensed establishment will meet the listed requirements.

Packaging

Description:

Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Attached photos, drawings, or graphic representations are preferred.

Shatter will be packaged in a small glass, plastic, or silicone container with a lid for retail sales. The container will be placed into a plastic or mylar, child-resistant, resealable bag with an optional clear window to show the product. Retail packages will contain up to one gram of shatter per package with a THC percentage between 50% and 99%. Shatter will be placed into glass jars with screw top lids for wholesale to other manufacturing facilities with a THC percentage between 50% and 99%.

Sample Label:

Provide a sample label showing how the labeling information required in 3 AAC 306.570 will be set out.

Manufacturer: R.C. Tinderbox
