**Date:** Friday, January 13, 2017 4:39:42 PM  
**Attachments:** [DRAFTRegulationPartDeuxOnsiteConsumption.pdf](#)

---

AMCO Team & MCB Members:

I would like to urge the adoption of the attached version of the Onsite Endorsement Regulations, identified on your website as [Draft Regulations Onside Consumption Part 2](#). I feel strongly that by not allowing customers to reseal and take their purchases with them if they do not consume them all in one sitting clearly encourages over consumption and will result in increased incidents in which over consumption negatively effects the person's choices.

Moreover, by requiring disposal of unused marijuana and marijuana products, I believe you are creating an incentive for some bad actors to repackage the product and resell the product as opposed to disposing the product pursuant to the disposal regulations. The financial incentive for some owners to repackage and resell the products and marijuana may be too enticing for some to resist given the high price of marijuana & products due to lack of supply. I believe any requirement that prohibits a person from taking the product with them greatly increases the chance that this type of behavior could come to be common practice.

Lastly, I can see no public harm by allowing a store employee to properly reseal the product/flower of an onsite consumer before the consumer leaves the premises. Conversely, I do see a large potential of harm if consumers are forced either leave their remaining purchase behind or consumer the whole product because most will choose to consume the whole product/flower in lieu of throwing it away and will increase over consumption and could possibly increase levels of impairment and may have an increased impact on those driving while intoxicated.

Thank you for your hard work,

*Jana D. Weltzin, Esq.*

Hi Joe,

I wanted to know more details on marijuana transportation laws to and from Alaska and other lawful states such as Washington and Colorado. It is possible to ship merchandise between the two states?

Upon reading 3AAC306.750, it sounds like if both establishments are in compliance of the state laws then transporting wouldn't be a problem.

Please let me know if that is the case.

Thank you again for your assistance, as I'm sure you must be swamped with the hundreds of applications your processing.

Good Day,

Hope this email find you well.

This is Shoaib, I am working with the Regulatory department of 360training.com, we are a leading online alcohol seller and server training providers.

I wanted to inquire about the requirements for online Marijuana Training program providers for the state of Alaska.

May I request you to please assist us about your training course/s requirements and guide us about the process, applications or steps that need to be taken to have our Marijuana Training course submitted to the commission for approval.

360training.com has been the leading online alcohol training and certification provider since 1999. As a pioneer in online education and occupational training we bring trusted content from industry experts, and ensure that our training is in compliance and up to date with the most recent regulations.

360training.com is an ANSI Accredited training provider. Our Alcohol Seller/Server training courses which are approved and recognized in the vast majority of jurisdictions nationwide. Our top courses include Illinois Basset training, TABC training, Responsible Beverage Server training for California, Louisiana, and Wisconsin.

Please don't hesitate to contact me at your convenience if you have any questions or comments regarding our program.

Your assistance in this regards would be highly appreciated.

Hope to hear back from you soon.

Thank You

**Subject:** question on testing including pesticides  
**Date:** Monday, January 09, 2017 10:05:25 AM

---

Hello,

Happy New Year and thanks for reviewing my email. I have a client that is interested in starting a Marijuana testing facility in AK, and I am consulting with him on the testing requirements. The latest document I have access to is 3AAC306 PDF, which is dated in early 2016. Do you have an updated document that provides more details about the testing requirements??

In particular, I'm interested in knowing what the test requirements are for Pesticides and toxic chemicals? (1) Has the state established a list of the pesticides required to test for and/or toxic chemicals, and (2) Does that list include cutoff specifications for Pesticides (levels deemed harmful and requiring reporting).

Also, is it mandatory for a lab to be able to do all the testing criteria, or can a lab operate doing only certain tests (say for instance, they only want to perform microbial testing and potency and residual solvents, and don't want to take on pesticides and toxic chemicals). Can they pick and choose what they want to analyze for?

If you have a better source document for the testing, can you please send me that, or an updated version of the 3AA306 PDF.

**Subject:** Questions for Retail Sales Shops  
**Date:** Friday, January 06, 2017 3:39:17 PM

---

Questions:

1. Does a retailer of MJ have to file a monthly report with the SOA? If so, where do we find it? Or is the METRCS system all we need to do with the SOA. Since retailer does not pay tax to SOA like a cultivator, I am somewhat confused. Please let me know.
2. Can a retailer make joints from the crumbs etc left after we sell the buds from say a five pound lot that was purchased from a licensed cultivator?
3. Can a retailer take pounds of trim purchased from a licensed comm'l grower to a processor and have it processed in to say extracts, oils, BHO etc.

Thanks for taking the time to clear up this confusion. LCW

Hi Cynthia,

Thank you for the speedy response. I found the page you are describing at:

<https://www.commerce.alaska.gov/web/amco/MCBMeetingDocuments.aspx>

However, when I go to click on any of the links, none of them will open. They all suggest I download Acrobat Reader (I use daily already, so I have an updated version on my computer). I tried on another computer with the same issue, and have experimented across browsers. Had a co-worker try, and he experienced the same issue as well (he's in a different city / on a different wifi network).

Is there another way to get at this information?

Best,  
Leslie

Hi Joe,

I hope that you do not mind me reaching out and introducing myself -- I have

worked in the market research industry for the past 30 years and have recently launched an agency focused upon the legal cannabis industry.

I am writing to see if Alaska currently releases or plans to release its inventory tracking data for cannabis (the METRC data) or some subset thereof. Ideally I'm looking for sales dollars (including tax), tax dollars, units by product by format by cultivator by day by dispensary name or license with a means to obtain ongoing updates (in a manner similar to Washington State, if you are familiar with their process). If so, could you refer me to the best person to contact about that?

Best regards,  
Leslie

Hi Joe,

I hope that you do not mind me reaching out and introducing myself -- I have worked in the market research industry for the past 30 years and have recently launched an agency focused upon the legal cannabis industry.

I am writing to see if Alaska currently releases or plans to release its inventory tracking data for cannabis (the METRC data) or some subset thereof. Ideally I'm looking for sales dollars (including tax), tax dollars, units by product by format by cultivator by day by dispensary name or license with a means to obtain ongoing updates (in a manner similar to Washington State, if you are familiar with their process). If so, could you refer me to the best person to contact about that?

Best regards,  
Leslie

**Date:** Thursday, January 05, 2017 10:25:47 AM

---

We are looking to put up a poster in marijuana shops to inform parents of the potential dangers to kids. Do you already have some posters like that? If so, could you share them with me?

We don't want to use scare tactics, but make sure we are educating adults to keep kids safe.

Thanks, K

**Subject:** RE: App 10002 , & to AMCO BOARD MEMBERS  
**Date:** Wednesday, January 04, 2017 11:29:11 AM

---

Mr. Tuma,

This email is long and in the end it is fairly difficult to know what you want from us. I am going to tackle it sentence by sentence. My responses are in red.

I believe my application is a compilation of a new agency that still has a lot of kinks to work out.

The status of your application is incomplete. You have received a letter requesting completions and we are coming up on 90 days since AMCO sent that letter. You must comply with the requested items to complete your application.

It started by not allowing people to amend their applications after initiation, in which I asked to change not ownership, but just my DBA, before I submitted my app, and was not answered.

IT set up the system so that once you submit the application, there are items you cannot change. This has been discussed and resolved by the board.

Then I was not allowed to pay cash, even though it was established that banks would not work with marijuana businesses.

No one could pay cash until Revenue's cash room was built and ready to receive cash. That information has been on our website since day one. The cash room is now built and cash can be used for licensing fees.

Then after I paid both application fee AND license fee, (which should not be charged until license is issued, so that the state is not collecting interest on a hundred thousand dollars and apps that may not even be processed),

The regulations promulgated by the Marijuana Control Board require that both the non-refundable application fee and first year license fee be paid upon application for a new license. If the application is denied, the license fee is refunded.

my application "slipped thru the cracks" and I was not reviewed,

Your local government, MSB, opted out through a moratorium, so all MSB applications were placed on hold. Had the board voted on your application, it would have been required to deny it due to the moratorium.

I then had a personal meeting at AMCO building with John Calder and asked what my status was and since it was amco mistake in missing my app, would they please look at it,

You met with John Calder, Jane Sawyer, and Tina Thibodeaux who tried to explain these things to you in person in a professional manner in spite of your obvious hostility and volatility.

and I was told that the Director felt it was a "waste of staff" to review apps in the Matsushiro borough because of the moratorium.

Your local government, MSB, opted out through a moratorium, so all MSB applications were placed on hold. Had the board voted on your application, it would have been required to deny

it due to the moratorium.

The vote was illegal, and so was the moratorium, state statutes do not allow an ordinance and a vote of the same nature, 29.26.170B,

AS 17.38 clearly permits local governments to opt out of allowing commercial marijuana establishments to operate in their boundaries.

but again, AMCO, even though they had been paid an application fee decided to hold my app for over 6 months, even though regulations say AMCO has only 90 days.

The 90 days is from the director determining an application to be complete to getting it to the board for approval or denial. Holding the MSB applications was a favor designed to save those applicants from losing their non-refundable 1000 application fee and was not in violation of the 90 day statute because your MSB application was not complete and is still not complete.

So while AMCO supported the corrupt politicians, who chose not to follow the law, AMCO then gave them the power by holding our applications so that the Matsu borough could change the zoning laws, and zone out 3/4 of the applications already in front of them.

The voters of Alaska gave MSB this power by voting in favor of Ballot Measure 2, AS 17.38.

AMCO and politicians had nothing to do with the ability of a local government to opt out.

Now AMCO expects me to basically redo my entire application on a property that my current building is no longer "zoned correctly" for.

If you complete the original application, it must be for the originally applied for premises and include all corrections requested in your incomplete letter. If the zoning no longer allows you to use that property, you are correct that you must start over.

I do not believe I have any options besides locating another location and starting from scratch, with the DBA I want to use, and a property not controlled or influenced by the MATSU borough.

Sounds like you are correct.

If AMCO is still willing to work with me on my current application and give me my license, I would be happy to give them additional documents and more details on my current plans as listed in the letter, but I want to use the building I am in, and the DBA I posted publically, printed in paper, and have on all my business signs and logos, Evergreen Marijuana.

This is not possible.

If this is not possible then I wish to rescind my current application and start over.

Again, you are correct.

Please share this with the board as I want them to understand everything that is going on with applications, the good, the bad, and the ugly-

This email was sent to the boards marijuana mailbox as has my response. They will have all mail in that box in their next board packet.

Also since I will be in the industry, please have the investigators continue in their "investigation" of my residency, so that this issue will not further delay my next license.

The residency issue has been resolved. AMCO has determined that you are a resident eligible to apply for a commercial marijuana license.

Thanks,

Cynthia Franklin, Director  
Alcohol & Marijuana Control Office  
907-269-0351

FEDERALLY LEGAL MARIJUANA BIZ>>MMJ DOCTORS CENTER\$50000 (Anchorage)

We are looking for someone to take over our Alaska location. We have been in Anchorage for five years we have a patient base of over 2500 patients.

We are currently expanding into the Florida and Ohio market and since we live in Colorado it's going to be just too much travel going to Alaska.

We have profit and loss that shows over \$250,000 gross with over \$125,000 in profit.

We have the doctor and all of the processes in place contact us for more information

As I said in the post and caption we are a federally legal business and we can use the banks.

Thx

Mike

**Date:** Thursday, December 22, 2016 7:52:08 AM

---

Marc

Sorry for the delayed response, very busy week.

This type of transportation is not allowed. Per 3 AAC 306.750 a marijuana product manufacturing facility (Frozen Budz) may only transport **marijuana product** which does not include marijuana bud/flower, leaf/trim, pre rolled joints etc. Only a marijuana cultivation facility can transport the joints and only a product manufacturing facility can transport the products.

The only way this type of transport could legally take place is if a third party security firm completed the transport as an agent of both the cultivation and product manufacturer.

Joe

AMCO,

Please review the email thread below for further reference. I will also summarize our request. I want to make sure this unique wholesale product transfer is setup correctly. This is a rather unique transfer, yet will be common in the industry.

We, Red Run Cannabis Company (Retail establishment OR Cultivation entity), are purchasing two separate "packages" from two independent marijuana establishments - (1) Edibles from AK Frozen Budz and (2) Pre-roll cones from Rosie Creek; both these entities are located in Fairbanks.

We would like to have AK Frozen Budz deliver Rosie Creek's "package" along with their own edible package - to us in Kenai, rather than drive all the way to Fairbanks for one product.

Please let me know the best way to create this manifest transaction?

---

Good afternoon,

I've read and re-read the mj regulations and faqs off AMCO..along with the additional Anchorage ordinances and Chugiak-Peters building safety & Title 21 planning devision.

My question is about (Chapter 21.05.055 Marijuana Establishments) from Planning Devisions Title 21...Section A.2 Separation from Protected Land Uses. Just wanted to clarify that Marijuana Establishments in Eagle River-Chugiak needed to be 1000ft(as crow flies)from both Lists A&B?

Also would that 1000ft measurement apply to places off the other side of the highway? There are many areas where "as the crow flies" bans places that someone would have to illegally cross over a 2-lane road, a 7' fence in a ditch, 2-lanes of highway, another ditch, another 2-lanes of highway heading the other way, another ditch with 7' fence, and then another 2-lane road.

A example would be 20280 Bill Stephens Dr...the building next to the Chevron in peters creek. It's too close to a church because it's across the highway(also theres a big retaining wall people would have to climb in that specific spot along the highway). There is a baseball field too, people would have to trespass across properties & threw the woods to get to.

Thank you,  
Ben Luedtke

**Subject:** youth center definition  
**Date:** Tuesday, December 20, 2016 1:08:12 PM

---

Good afternoon,

I am seeking clarification on whether Anchorage Youth Court's building at 838 W 4<sup>th</sup> Ave, Anchorage, AK qualifies as a "youth center" under 3 AAC 306.990(b)(35)(B). We are a juvenile diversion program that trains teens to act as attorneys and judges to handle misdemeanor cases for other teens and give a second chance to youth who have made a mistake. Teens are regularly at our office for trainings, to prepare for court hearings, to hold planning meetings, and generally to run the organization. Our office is used solely by Anchorage Youth Court. While we clearly provide training and guidance to persons under 21, our confusion stems from the phrase "licensed to" and what type of license that refers to. We are not a licensed shelter. We are a nonprofit organization, and our business license category is "educational services." Under AS 47.12.400, we have "recognition" as the youth court with jurisdiction within our geographic area.

Any guidance is appreciated.

Thank you,

Rebecca Koford

Executive Director

Anchorage Youth Court

It started by not allowing people to amend their applications after initiation, in which I asked to change not ownership, but just my DBA, before I submitted my app, and was not answered. Then I was not allowed to pay cash, even though it was established that banks would not work with marijuana businesses. Then after I paid both application fee AND license fee, (which should not be charged until license is issued, so that the state is not collecting interest on a hundred thousand dollars and apps that may not even be processed), my application "slipped thru the cracks" and I was not reviewed, I then had a personal meeting at AMCO building with John Calder and asked what my status was and since it was amco mistake in missing my app, would they please look at it, and I was told that the Director felt it was a "waste of staff" to review apps in the Matsu borough because of the moratorium. The vote was illegal, and so was the moratorium, state statutes do not allow an ordinance and a vote of the same nature, 29.26.170B, but again, AMCO, even though they had been paid an application fee decided to hold my app for over 6 months, even though regulations say AMCO has only 90 days.

So while AMCO supported the corrupt politicians, who chose not to follow the law, AMCO then gave them the power by holding our applications so that the Matsu borough could change the zoning laws, and zone out 3/4 of the applications already in front of them.

Now AMCO expects me to basically redo my entire application on a property that my current building is no longer "zoned correctly" for.

I do not believe I have any options besides locating another location and starting from scratch, with the DBA I want to use, and a property not controlled or influenced by the MATSU borough.

If AMCO is still willing to work with me on my current application and give me my license, I would be happy to give them additional documents and more details on my current plans as listed in the letter, but I want to use the building I am in, and the DBA I posted publically, printed in paper, and have on all my business signs and logos, Evergreen Marijuana. If this is not possible then I wish to rescind my current application and start over.

Please share this with the board as I want them to understand everything that is going on with applications, the good, the bad, and the ugly-

Also since I will be in the industry, please have the investigators continue in their "investigation" of my residency, so that this issue will not further delay my next license.

Thanks  
Clint Tuma

**Subject:** Fwd: [#73622] New Transfer  
**Date:** Tuesday, December 20, 2016 9:24:25 AM

---

AMCO,

Please review the email thread below for further reference. I will also summarize our request. I want to make sure this unique wholesale product transfer is setup correctly. This is a rather unique transfer, yet will be common in the industry.

We, Red Run Cannabis Company (Retail establishment OR Cultivation entity), are purchasing two separate "packages" from two independent marijuana establishments - (1) Edibles from AK Frozen Budz and (2) Pre-roll cones from Rosie Creek; both these entities are located in Fairbanks.

We would like to have AK Frozen Budz deliver Rosie Creek's "package" along with their own edible package - to us in Kenai, rather than drive all the way to Fairbanks for one product.

Please let me know the best way to create this manifest transaction?

Hi Marc,

Please reach out to the AMCO for advisement, this would not be a common transfer so you would need the AMCO to grant permission.

Have a great day!

Good Afternoon-

We were routed a message that you were having issues getting into myAlaska for your handler permit. If you go through our website you should not have the same issues.

Hi Cynthia,

Do you have a time-frame from IT for a fix? I would be interested in the data once it is available.

Thanks again for your time.

Gary

**Subject:** Quick AAC 306.990 question

Mr. Bankowski,

I'm assisting a group of stakeholders who are starting a small indoor marijuana cultivation facility in Fairbanks. Toward that end, I have two quick questions which I did not see addressed in the code.

1. The secure doors to our proposed cultivation facility will open onto a hallway which is shared with other businesses that exist in the same building. This hallway leads to a shared exterior door. Will the fact that the building/hallway/exterior doors are shared with other businesses cause the license application to be denied? Assume that those businesses do not require a buffer zone for sensitive use.
2. The relevant section of AAC 306.990 defines a recreation area as "(B) operated by a public or private organization licensed to provide shelter, training, or guidance for minors". Does a privately-owned gym geared toward adults, but not exclusively for adults, fall under this definition?

Thank you for your time.

I am trying to design our building and can not find anything on the material that the walls and tables need to be made out of. I was going to do the tables with All Weather Wood or stainless steel. The walls i would like to do metal stud framing, with vapor barrier and green house panels or the white wall panels that is used in restaurants. Please let me know if there is a guide for this somewhere and if there is someone that i can talk to about this. Thank you.

**Subject:** RE: Question about each license  
**Date:** Friday, December 02, 2016 11:19:40 AM

---

Justin,

Most of these answers can be obtained by reading the statutes and regulations linked under the marijuana links on our home page.

Cultivators grow. No sales to public.

Limited cultivation has 500 square foot canopy limit. Standard has no limit to size of grow.

Product manufacturers manufacture marijuana products. Edibles, concentrates, etc.

Concentrate manufacturers only manufacture concentrates. No sales to public for any manufacturing license.

Retail store sell marijuana and marijuana products to anyone 21 or over. This is not a medical program, it is an adult use program.

Go and read the resources. It will all become clear.

Good afternoon,

I found yesterday and today when I sign into my Alaska account all it says is it is working.  
Later that evening it did open up and my permit did appear.  
Though there was no Secure site.  
Perhaps that is because I have already received my handles permit number ...which is 11531.  
So I have my permit number , have done and passed my exam.  
Now all I am trying to do is get the cover sheet.  
Which to my understanding I have to send in with passport pic, color ID, \$50.00 and my cert. to the AMCO in Anchorage.  
So would you please just send me the cover sheet?  
I would really appreciate it.

Thank you for your assistance,  
Elizabeth Odom

**Subject:** RE: Requirements for teaching people to make their own edibles

First, you can only possess an ounce of marijuana in any place except your home.

Second, you can only have marijuana in your home if it is grown from your plants.

Therefore, inviting people to bring their own marijuana into your home where they pay you to do something with it is a marijuana business that is outside the statutory provisions for marijuana businesses. Alaska voters said in Ballot Measure 2 they only want 4 types of marijuana businesses, and your idea for a business is not one of them.

Finally, going into another person's home and teaching them to do something with their marijuana could be considered consulting and therefore permissible. However, you would encounter the same problem as above if the person whose home you are in has invited other people to bring their own marijuana into that persons home.

Frankly, we are trying to stand up this industry based on Ballot Measure 2. You can read those 8 pages until the cows come home and not find any language that says everyone is free to make up their own kind of marijuana business and start an unregulated marijuana business with untested marijuana.

What I was trying to say before is that this is not a business sanctioned by the voters in Ballot Measure 2. If you do it, you are out of bounds.

Ms. Franklin,  
Thank you for your reply. This is where things get confusing as I will not be manufacturing marijuana products for sale.  
I would be selling the service of instructing others having them use their own products for their own consumption.

But it sounds like from your response and briefly going to your website what I would be doing would still be considered manufacturing marijuana products. Is this correct ?

Thank you.

Ms. Herning,

You are talking about marijuana product manufacturing. You cannot have a business that manufactures marijuana products unless it exists under the businesses set out in AS 17.38. That is not what you are describing, but to manufacture marijuana products, you need a license. Please visit our website to educate yourself on how to apply for a product manufacturing license.

**Subject:** Requirements for teaching people to make their own edibles

Hello,

I am considering starting a business where I would teach people to make their own edible marijuana products with their own marijuana in their own homes.

I possibly might bring my students to my home to do the same thing, but always using my student's marijuana.

What would I need to do to satisfy Alaska State regulations to operate this business ? Thank you for the information.

Sincerely,

Kim Herning

---

As a brief introduction, I have provided primary healthcare services to the Juneau community for nearly 25 years. I have recently become a member of the national organization of medical professionals, "Society for Cannabis Clinicians," because I am interested in the therapeutic potential of cannabis, particularly for neurodegenerative disease. I have prescribed CBD in my practice for several years already (for conditions such as social anxiety, OCD, Parkinson's, early dementia, depression, chronic pain) and look forward to being able to refine my prescriptions with the whole plant "entourage" effect.

I am enthusiastic about cannabis as a potent and safe plant medicine. It is a natural human instinct to seek pleasure and relaxation. That's a good thing! Nobody dies from cannabis overdose because there are relatively few endocannabinoid receptors in the cardiac and respiratory centers. However, these complex receptors abound in central nervous tissue. Currently cannabis is the single most potent dopaminergic agent available, which is why I recommend it to all my Parkinson's patients. For a wealth of information about medical applications of cannabis, [Realm of Caring](#) is a good resource.

While moderate alcohol consumption can help some folks relax, I never recommend to my patients to start drinking. Legion personal and family tragedies have cast a long shadow due to drunk driving, wife-beating, and a vicious depression-addiction cycle. These deeply problematic and pervasive issues do not occur with cannabis use.

I am not a fan of smoking, anything. I am heartened that edibles will be legal and that more controlled-dose consumption is moving toward dabbing. Very little particulate matter is delivered to the lungs with dabbing. Ventilation of licensed premises will be easier with less smoke production although because dab processing is very expensive, and will require an engineer, I would not want to hold up these regulations with prohibiting old-fashioned joint smoking on site.

A more specific comment on Chapter 306, 3ACC, section 306.265 (f) (7) (third draft): As written, the regulations imply that a patron of a licensed marijuana facility could not sample a product after purchasing it. However, the samples could not legally nor feasibly (from a business perspective) be given free of charge, therefore a patron of a licensed marijuana facility would indeed need to purchase a sample before sampling it, in the separate, ventilated, room. So, it would need to be legal for the purchase to occur before the on-site consumption.

In general, I strongly believe that on-site consumption serves many good purposes. First, we have as a state agreed that it is high time to decriminalize a widely enjoyed therapy with an extremely low risk profile, and many health benefits. Therefore, it is incumbent upon us to help those still in fear of the weed to have an opportunity to experience, in a safe environment, with the possibility of group feed-back, what this safe, helpful medicine could do for them. So, on-site consumption is a really good idea for the MJ newbie, as well as the seasoned user. We seem to have no issue with bars serving alcohol, a much more problematic mind-altering substance. Let's allow the newly legal MJ users a place to congregate, relax, and learn more about the effects of different strains, thus adding to the collective research, which is over

50 years behind the times due to an unfortunate period of fear and prohibition in the US.

Thank you for your attention.

Please feel free to contact me if you would like further perspective from a medical provider of cannabis.

Sincerely  
Dr. Emily A. Kane

First, you can only possess an ounce of marijuana in any place except your home.

Second, you can only have marijuana in your home if it is grown from your plants.

Therefore, inviting people to bring their own marijuana into your home where they pay you to do something with it is a marijuana business that is outside the statutory provisions for marijuana businesses. Alaska voters said in Ballot Measure 2 they only want 4 types of marijuana businesses, and your idea for a business is not one of them.

Finally, going into another person's home and teaching them to do something with their marijuana could be considered consulting and therefore permissible. However, you would encounter the same problem as above if the person whose home you are in has invited other people to bring their own marijuana into that person's home.

Frankly, we are trying to stand up this industry based on Ballot Measure 2. You can read those 8 pages until the cows come home and not find any language that says everyone is free to make up their own kind of marijuana business and start an unregulated marijuana business with untested marijuana.

What I was trying to say before is that this is not a business sanctioned by the voters in Ballot Measure 2. If you do it, you are out of bounds.

Ms. Franklin,

Thank you for your reply. This is where things get confusing as I will not be manufacturing marijuana products for sale.

I would be selling the service of instructing others having them use their own products for their own consumption. But it sounds like from your response and briefly going to your website what I would be doing would still be considered manufacturing marijuana products. Is this correct ?

Thank you.

Kim Herning

Ms. Herning,

You are talking about marijuana product manufacturing. You cannot have a business that manufactures marijuana products unless it exists under the businesses set out in AS 17.38. That is not what you are describing, but to manufacture marijuana products, you need a license. Please visit our website to educate yourself on how to apply for a product manufacturing license.

Hello from Soldotna...

I'm one of the owners of Red Run Cannabis Company (and Red Run Cannabis Cultivators). We were granted both of our licenses yesterday after the investigators visited our store.

My question is about three employees who submitted all their paperwork and fees for the Marijuana Handler Permits. Can you provide me any updates for the following three folks?

- 1) Ryan Walker
- 2) Hanna Walker
- 3) George Frazier

Sorry to bug you with this, but we were hoping to open next week

and those people are all crucial to the operation.

Thank you for your help!

Eric Derleth

**Subject:** General question about Marijuana handlers permit

Hey,

I was applying to get my Marijuana handlers card, and had a quick question about the cover sheet required. I asked my instructor and he said it came from the [alaska.gov](http://alaska.gov) site, but I couldn't find anything indicating it was the correct cover sheet.

Thanks!

-Nicole
