Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required \$250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	GOOD LLC	MJ License #:	10165		
License Type:	Product Manufacturing				
Doing Business As:	GOOD LLC				
Premises Address:	1949 Frank Ave				
City:	Fairbanks	State:	Alaska	ZIP:	99701

Section 2 – Proposed Marijuana Concentrate or Marijuana Product

Enter information for the marijuana concentrate or the marijuana product for which you are seeking MCB approval.

Product Name:	GOOD Lemon-Ginger Drops				
Product Type:	Edible Marijuana Product				
Perishable: Yes/No	No	Shelf Life: If perishable.	6 months		

Form MJ-16: Proposed New Marijuana Product

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	The infused lozenges are a golden to light brown infused marijuana product, and will be either square or spherical in shape (depending on the available molds, but can be modified) with a hard consistency and a smooth, powdered texture. They will be similar in appearance and texture to a hard candy drop or cough lozenge.
Ingredients: This box is not applicable to marijuana concentrates.	1. 1 part raw, buckwheat honey 2. ¼ part organic lemon juice 3. Freshly grated ginger root to taste 4. 1/4 cup powdered cane sugar and 1 teaspoon powdered vitamin C 5. Decarboxylated butane hash oil cannabis concentrate (amount depends on test results)
Standard Production Procedure and Detailed Manufacturing Process:	Calculate the dosage of decarboxylated cannabis concentrate to be added to the batch. Measure cannabis concentrate, honey, lemon juice, and grated ginger and pour honey, lemon juice, and grated ginger all into a saucepan. Mix the ingredients together with a whisk and bring the saucepan up to 300 degrees Fahrenheit. Once the mix has been heated up, remove it from the heat and keep whipping it. Once the temperature drops back down you may put it back on the heat and it bring back up to 300 degrees Fahrenheit. Put the candy thermometer in the solution and keep it around hardball temperature. You can test it by dropping a bit into ice-cold water, and if it hardens right away, it should be ready. Once the product is ready, let it cool moderately and pour it into the mold and let it fully cool at room temperature. Mix powdered sugar and vitamin c powder together in a small bowl and toss the candy to keep it from sticking. Store the finished product in an airtight container and in a dry environment.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	Picture attached.

Form MJ-16: Proposed New Marijuana Product

Section 4 -- Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

Packaging Description:

Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Picture attached

Lozenges will be packaged in a certified child resistant metal tin (dimensions 3" x 1.125"). The tin will be silver in color, with white and black labels affixed to the top and bottom of the container. Labels will describe the number of servings, THC per serving, and the total THC content of the package. Product will be packaged in packages of 5 servings of 5 mg THC/serving (total: 25 mg THC) or in packages of 10 servings of 5 mg THC/serving (total: 50 mg THC).

Sample Labels:

Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

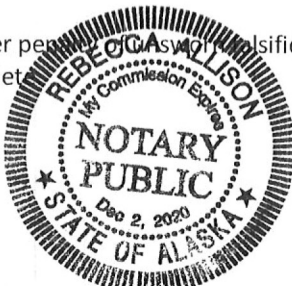

Picture attached

As a marijuana establishment licensee, I declare under penalty of perjury that the information provided on this form, including all accompanying schedules and statements, is true, correct, and complete.

Signature of licensee

Christian Hood

Printed name of licensee

Notary Public in and for the State of Alaska.

My commission expires: 12/2/20

Subscribed and sworn to before me this 12 day of March, 2018.
