**MEMORANDUM**

TO: Chair and Members of the Board      DATE: August 3, 2018

FROM: Erika McConnell      RE: Hollyweed 907 #11304  
Director, Marijuana Control Board

Hollyweed 907, a marijuana product manufacturing facility, is requesting approval of five new products. Attached is the MJ-16 Proposed New Marijuana Product for each product.

Alaska Marijuana Control Board

## Form MJ-16: Proposed New Marijuana Product

### What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required \$250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

### Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	YNY Investment LLC	MJ License #:	11304		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	HOLLYWEED 907				
Premises Address:	2429 E. 88th Ave				
City:	Anchorage	State:	Alaska	ZIP:	99507

### Section 2 – Proposed Marijuana Concentrate or Marijuana Product

Enter information for the marijuana concentrate or the marijuana product for which you are seeking MCB approval.

Product Name:	CO2 Crumble				
Product Type:	Marijuana Concentrate - Intended for inhalation				
Perishable: Yes/No	No	Shelf Life: If perishable.	N/A		

## Form MJ-16: Proposed New Marijuana Product

### Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

<b>Product Description:</b> Details must include the color, shape, and texture.	Crumble has a light golden appearance and has the consistency of wet sticky sand.
<b>Ingredients:</b> This box is not applicable to marijuana concentrates.	N/A
<b>Standard Production Procedure and Detailed Manufacturing Process:</b>	Oil extracted from the Apecks 2000PSI-5LD will be placed in a vacuum oven and then occasionally agitated. After a set period of time in the oven, the material will appear brittle and will crumble. Materials will be placed in large silicone containers to await packaging.
<b>Depiction:</b> Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

## Form MJ-16: Proposed New Marijuana Product

## Section 4 – Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

## Packaging Description:

Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

.3g, .5g or 1g will be packaged into small glass, plastic containers lined with silicone or silicone containers with a lid and then placed into heat-sealed, resealable, child-resistant and opaque mylar bags. The THC content will range from 40 - 90% THC with the actual THC content listed on the label per the testing results.

## Sample Labels:

Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

## Form MJ-16: Proposed New Marijuana Product

### What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required \$250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

### Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	YNY Investment LLC	MJ License #:	11304		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	HOLLYWEED 907				
Premises Address:	2429 E. 88th Ave				
City:	Anchorage	State:	Alaska	ZIP:	99507

### Section 2 – Proposed Marijuana Concentrate or Marijuana Product

Enter information for the marijuana concentrate or the marijuana product for which you are seeking MCB approval.

Product Name:	CO2 Sauce and Crystals				
Product Type:	Marijuana Concentrate - Intended for inhalation				
Perishable: Yes/No	No	Shelf Life: If perishable.	N/A		

## Form MJ-16: Proposed New Marijuana Product

### Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

<b>Product Description:</b> Details must include the color, shape, and texture.	A honey like consistency with a light golden color. Small crystals of THC-A will clump and sit within the honey-like sauce.	
<b>Ingredients:</b> This box is not applicable to marijuana concentrates.	N/A	
<b>Standard Production Procedure and Detailed Manufacturing Process:</b>	Oil that is extracted from the Apecks 2000PSI-5LD will be placed in air tight mason jars and stored for at least a week. The natural pressure build up from the CO2 turning back into a gas will cause THC-A to crystallize. Those crystals will be separated and the remaining "sauce" will be placed in a vacuum oven to purge any remaining CO2. The crystals will be reintroduced to the sauce after purge and then packaged together.	
<b>Depiction:</b> Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
