Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required \$250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	Tanana Herb Company, LLC	MJ License #:	16091		
License Type:	Marijuana Concentrate Manufacturing Facility				
Doing Business As:	Tanana Herb Company, LLC				
Premises Address:	1200 Well Street				
City:	Fairbanks	State:	Alaska	ZIP:	99701 - 2835

Section 2 – Proposed Marijuana Concentrate or Marijuana Product

Enter information for the marijuana concentrate or the marijuana product for which you are seeking MCB approval.

Product Name:	CO2 crumble				
Product Type: Choose one.	Marijuana Concentrate				
Perishable: Yes/No	No	Shelf Life: If perishable.			
Intended Use: Smokable/ edible/topical/wholesale/etc.	Smokable				

Form MJ-16: Proposed New Marijuana Product

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	Product is opaque, smooth to grainy in appearance. Color ranges from yellow to brown and has the consistency of dry cake batter.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	CO2 crumble is produced by extracting marijuana with a closed loop CO2 system that complies with all applicable laws and specification required by the State of Alaska. CO2 is liquefied and passed through the marijuana at high pressure. This strips the desired components. Once extracted the concentrated components are purged in a vacuum oven to achieve the desired consistency..
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	

Form MJ-16: Proposed New Marijuana Product

Section 4 – Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

Packaging Description:

Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

The Total size of the child resistant blister pack containing standard child resistant boron silicate glass container with silicone lid. is 5.5"x3.5". The blister pack is clear plastic with a white product label. THC range will be 1%-100%, based on lab samples. The package will contain .5gram - 1gram of product. It will display the; cultivation name, license number, contact information, retail name, license number contact information, testing results for the overall THC, testing results for the overall CBD, the date of manufacturing, harvest batch number, net contents, name of product, name of original flower and disclaimers.

Sample Labels:

Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.
