**MEMORANDUM**

TO: Chair and Members of the Board

FROM: Erika McConnell  
Director, Marijuana Control Board

DATE: April 16, 2019

RE: Good Titrations #10886

Attached are five products for Good Titrations that were tabled at the February 2019 meeting.

Alaska Marijuana Control Board

## Form MJ-16: Proposed New Marijuana Product

### What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required \$250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

**Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.**

### Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	FSE, Inc.	MJ License #:	10886		
License Type:	Marijuana Product Manufacturing Facility				
Doing Business As:	Good Titrations				
Premises Address:	1770 Donald Avenue Ste. B				
City:	Fairbanks	State:	Alaska	ZIP:	99701

### Section 2 – Proposed Marijuana Concentrate or Marijuana Product

Enter information for the marijuana concentrate or the marijuana product for which you are seeking MCB approval.

Product Name:	Canna Bath Bomb				
Product Type:	Bathing amendment - topical				
Perishable: Yes/No	No	Shelf Life: If perishable.			

# Form MJ-16: Proposed New Marijuana Product

## Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

**Product Description:**

Details must include the color, shape, and texture.

Golf ball sized sphere in shape that is a powdered bath soak, it is a white to very pale light green tinged color. This bath soak is to be added to a tub of hot water. White, blue purple, or pink in color with a granular, crystalline exterior and a sandy texture.

**Ingredients:**

This box is not applicable to marijuana concentrates.

Magnesium Chloride, Potassium Chloride, Sodium Chloride, Sodium Lauryl Sulfate, FDA & DEC approved fragrance, Sodium Bicarbonate, Citric Acid, vegetable oil, Coloring (red or blue dye. Optional), Canna Concentrate or Cannabis oil . Essential oils (Sandalwood, lavender, patchouli, chamomile and/or jasmine). \*All essential oils are not to be combined at once but will be used to give varying product scent options.\*

**Standard Production Procedure and Detailed Manufacturing Process:**

Mix ingredients together in commercial mixer. Remove from mixer and scoop into molds. Allow to dry for 24 hrs. Remove from molds and send to packaging.

**Depiction:**

Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

## Form MJ-16: Proposed New Marijuana Product

## Section 4 – Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

**Packaging Description:**

Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

Product will be packaged in standard mylar bags with the Good Titrations logo on the front. Product description and labeling info will be on the back.

Canna bath bombs will come in three varying mg levels - 100mg of THC; 200 mg of THC; and 300mg of THC. These are one time use products.

Each canna bath bomb will be placed into an opaque mylar bag with the Good Titration logo on the front and product description and labeling on the backside. The mylar child resistant opaque bag.

**Sample Labels:**

Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

Product Name:	Good Vibes Yummy Gummies				
Product Type:	edible				
Perishable: Yes/No	yes	Shelf Life: If perishable.	1 year		

**Form MJ-16: Proposed New Marijuana Product****Section 3 – Proposed Product Details**

Enter information for the marijuana product for which you are seeking MCB approval.

<b>Product Description:</b> Details must include the color, shape, and texture.	Good Vibes Yummy Gummies will have muted colors, much as muted pink, green, and muted blue. Good Vibes Yummy Gummies will be round, squishy gummy candies with granular coating. Available in 1mg, 2.5mg and 5mg of thc per singular gummy.
<b>Ingredients:</b> This box is not applicable to marijuana concentrates.	Flavored Gelatin Dessert powder (Raspberry, lemon, orange, pineapple, lime or strawberry *note that not all flavors will be used at once) Food coloring to correspond with flavors. Unflavored gelatin citric acid corn syrup water Canna concentrate sugar for exterior of gummy.
<b>Standard Production Procedure and Detailed Manufacturing Process:</b>	Combine flavored gelatin, unflavored gelatin and citric acid in a medium microwave-safe bowl and stir to combine. Add the corn syrup, canna concentrate and water, and stir gently with a soup spoon until all of the ingredients are blended together. Let the mixture sit for 5 minutes so that the gelatin can bloom. Stir tently again, then microwave it on high for 30 seconds. Stir it again, then zap it for another 15 seconds. Repeat heating it for 15 seconds 3 more times for a total heating time of 1 1/2 minutes. If air bubbles begin to form on the surface of the gelatin, stop heating and stir gently. Let the mixture sit for 10 minutes. Give the solution a gentle stir every couple of minutes and you should see it become clearer over time.  Pour the candy syrup into a measuring cup with a spout, then carefully pour the liquid into the molds. Let the candy sit for 30 minutes, then put the molds into the refrigerator for another 30 minutes. When the candy is firm push each piece out of the molds and arrange them on a baking sheet. Let them sit this way for 48 hours, then flip and let sit for 24 hours. This process will help the gummies dehydrate so that they are chewy. Toss gummies in sugar and seal them up in an air-tight covered container or zip-top bag. Keep them stored in a sealed container
