MEMORANDUM

TO: Chair and Members of the Board DATE: 9/11/2019
FROM: Erika McConnell RE: Rosie Creek Farm, License
Director, Marijuana Control Board #12511

Rosie Creek Farm, a marijuana product manufacturing facility, is requesting board review of thirty-six (36) proposed products. These products were tabled at the February and May 2019 Meetings.

**Section 6 – Proposed Marijuana Concentrates and Marijuana Products**

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Dry Sift Hash (Decarboxylated)		
Product Type:	Marijuana Concentrate		
Perishable: Yes/No	Yes	Shelf Life: If perishable.	8 months
Product Description: Details must include the color, shape, and texture.	In its powdery form, dry sift hash will appear as a green-gold to gold-brown dust. When pressed and aged, the hash will appear a rich chocolate brown on the outside and lighter brown, yellow brown, or greenish brown inside. Variations in color, shape and texture will occur based on season, variety, age and grade.		
Ingredients: This box is not applicable to marijuana concentrates.	N/A		
Standard Production Procedure and Detailed Manufacturing Process:	The production of dry sift hash is based on agitating dry plant material above or within fine mesh screens to separate and collect the trichomes of the plant. Initially, dried cannabis will be crumbled by hand. The crumbled cannabis will then be placed it into a nylon mesh cylinder suspended in a food grade plastic container which will be rotated with a small electric motor. The resulting hash will then be collected for use or further refinement by placing hash on top of flat nylon screens of increasingly smaller mesh sizes and manually moving the hash back and forth across the top of the screen. With each pass across the screens more plant material will be removed and the hash will become purer. Trichomes will then be hand collected, decarboxylated by heating to around 220 degrees F for 30-60 minutes in a scientific grade oven to covert THCA to THC, and either stored in a loose, powdery state or pressed into cakes by hand or with a hydraulic press.		
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.			

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Dry Sift Hash (Decarboxylated)		
Product Type:	Marijuana Concentrate		
Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	<p>0.5g, 1g, 3.5g, or 7g portions will be packaged in either a combination of clear, self-sealing adhesive strip cellophane sleeves, parchment paper, and cardboard or small silicone or glass containers and then into resealable, opaque and child-resistant Mylar bags for licensed retailers. Up to 5 pounds of hash may be packaged in glass jars with screw top lids for wholesale to other licensed product manufacturers. Depending on grade, hash will range between 20% and 90% THC by weight. The actual THC content will be listed on the label per the testing results.</p> <div></div>		
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	<div><p>Produced by: Rosie Creek Farm License Number: 12511 Product Name: Dry sift hash (decarboxylated) Packaging Date: Strain: Net MJ Weight: Batch/Lot Number: Gross Weight: Tested by: License Number: Total THC: THCA: CBD: CBDA: CBN: Microbial Test: Pesticides: Herbicides: Fungicides: Residual Solvent Test: Contaminants Test Result: Retailer: License Number:</p><p>Alaska Safety Warning: Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgement. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.</p><div></div></div>		

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Ice Water Hash (Decarboxylated)		
Product Type:	Marijuana Concentrate- intended for inhalation		
Perishable: Yes/No	Yes	Shelf Life: If perishable.	8 months
Product Description: Details must include the color, shape, and texture.	Ice water hash will appear pale-golden to reddish-brown to greenish-grey. Texture will vary from a soft fine powder, to solid yet pliable chunks. Most hash will be fully opaque, however, the highest-grade hash may at times suggest a degree of translucence. Ice water hash will be sold in a powdered form, pressed into “cakes,” or left in the “clumpy” state it appears in when first dried. Variations in color, shape and texture will occur based on season, variety, age and grade.		
Ingredients: This box is not applicable to marijuana concentrates.	N/A		
Standard Production Procedure and Detailed Manufacturing Process:	Dried or frozen cannabis will be submerged in barrels filled with ice and water and lined with synthetic mesh bags. After a period of manual agitation, left-over cannabis will be removed and wasted according to the facility waste plan. The mesh bags will then be removed individually from the solution, filtering the hash from the water. Hash will then be collected from the bags and dried in an electric freeze dryer. Once dry, hash will be decarboxylated by heating to around 220 degrees F for 30-60 minutes in a scientific grade oven to covert THCA to THC. Hash will then either be left as-is, manually powdered using a stainless-steel grater, or pressed into “cakes” either by hand or with a hydraulic press.		
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.			

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Ice Water Hash (Decarboxylated)
Product Type:	Marijuana Concentrate- intended for inhalation
Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	<p>0.5g, 1g, 3.5g, or 7g portions will be packaged in either a combination of clear, self-sealing adhesive strip cellophane sleeves, parchment paper, and cardboard or small silicone or glass containers and then into resealable, opaque and child-resistant Mylar bags for retail sales. Up to 5 pounds of hash may be packaged in glass jars with screw top lids for wholesale to other product manufacturers. Depending on grade, hash will range between 20% and 90% THC by weight. The actual THC content will be listed on the label per the testing results.</p>     
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	<p>Produced by: Rosie Creek Farm License Number: 12511 Product Name: Ice Water Hash (decarboxylated) Packaging Date: Strain: Batch/Lot Number: Gross Weight: Net MJ Weight: Tested by: License Number: Total THC: THCA: CBD: CBDA: CBN: Microbial Test: Pesticides: Herbicides: Fungicides: Residual Solvent Test: Contaminants Test Result: Retailer: License Number:</p> <p>Alaska Safety Warning: Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgement. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. **Section 6 – Proposed Marijuana Concentrates and Marijuana Products**

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Rosin (Decarboxylated)		
Product Type:	Marijuana Concentrate (Dab oil) - intended for inhalation		
Perishable: Yes/No	Yes	Shelf Life: If perishable.	8 months
Product Description: Details must include the color, shape, and texture.	Rosin will be honey colored and semi-transparent. The texture is either smooth to the touch or slightly sticky. Rosin consistency will vary somewhat depending on the batch but generally resembles mostly, but not fully, dried spruce sap. Rosin will appear in flat, uneven globs.		
Ingredients: This box is not applicable to marijuana concentrates.	N/A		
Standard Production Procedure and Detailed Manufacturing Process:	Rosin will be produced via heat and pressure using a hydraulic press with heated metal pressing plates. Dried or frozen cannabis plant material or hash will be placed into synthetic, heat resistant, fabric mesh bags. The bags will then be placed between a folded sheet of parchment paper and then onto the press. The combination of heat and pressure will move cannabis oils (rosin) out of the nylon bags and onto the parchment paper where it will be collected. Rosin may be manually pressed flat after collection. Rosin will then be decarboxylated by heating to around 220 degrees F for 30-60 minutes in a scientific grade oven to covert THCA to THC.		
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.			

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Rosin (Decarboxylated)
Product Type:	Marijuana Concentrate (Dab oil) - intended for inhalation
Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	<p>0.5g, 1g, 3.5g, or 7g portions will be packaged in either a combination of clear, self-sealing adhesive strip cellophane sleeves, parchment paper, and cardboard or small silicone or glass containers and then into resealable, opaque and child-resistant Mylar bags for retail sales. Up to 5 pounds of rosin may be packaged in glass jars with screw top lids for wholesale to other product manufacturers. Depending on grade, hash will range between 20% and 90% THC by weight. The actual THC content will be listed on the label per the testing results.</p> <div></div>
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	<div><p>Produced by: Rosie Creek Farm License Number: 12511 Product Name: Rosin (decarboxylated) Packaging Date: Strain: Batch/Lot Number: Gross Weight: Net MJ Weight: Tested by: License Number: Total THC: THCA: CBD: CBDA: CBN: Microbial Test: Pesticides: Herbicides: Fungicides: Residual Solvent Test: Contaminants Test Result: Retailer: License Number:</p><p>Alaska Safety Warning: Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgement. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Cannabis Essential Oil		
Product Type:	Marijuana Concentrate		
Perishable: Yes/No	Yes	Shelf Life: If perishable.	12 months
Product Description: Details must include the color, shape, and texture.	Cannabis Essential Oils appear as a mostly clear liquid. Coloration can be a slight gold or greenish tint to the liquid.		
Ingredients: This box is not applicable to marijuana concentrates.	N/A		
Standard Production Procedure and Detailed Manufacturing Process:	Fresh or dried plant material is placed into a stainless-steel or copper chamber above another chamber containing water. As the water is heated to boiling using an electric heating apparatus, steam passes up through the plant material and acts as a solvent for the plant's volatile oils. The steam then exits the chamber into a length of metal pipe where it cools, condenses and is collected. Essential oils then separate from the water before they are removed and stored in glass containers.		
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.			

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Cannabis Essential Oil
Product Type:	Marijuana Concentrate
Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	<p>Cannabis essential oils will be packaged in clear or opaque glass vials in 0.5 ml to 5 ml quantities for retail sales and in large glass containers up to 1 pound for wholesale. Cannabis essential oils will contain only trace amounts of THC - generally less than 1% and will be printed on labels per the testing results. *To be placed into fully opaque and child-resistant exit packaging in compliance with 3 AAC 306.345(a)(3) by the retailer.</p> <div></div>
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	<div><p>Produced by: Rosie Creek Farm License Number: 12511 Product Name: Cannabis essential oil Packaging Date: Strain: Batch/Lot Number: Gross Weight: Net MJ Weight: Tested by: License Number: Total THC: THCA: CBD: CBDA: CBN: Microbial Test: Pesticides: Herbicides: Fungicides: Residual Solvent Test: Contaminants Test Result: Retailer: License Number:</p><p>Alaska Safety Warning: Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgement. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.</p><div></div></div>

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Cannabis Hydrosol		
Product Type:	Marijuana Concentrate		
Perishable: Yes/No	Yes	Shelf Life: If perishable.	12 months
Product Description: Details must include the color, shape, and texture.	Cannabis hydrosol appears as water (clear liquid, sometimes with a golden to yellow tint), of which it is primarily composed, and is quite aromatic.		
Ingredients: This box is not applicable to marijuana concentrates.	N/A		
Standard Production Procedure and Detailed Manufacturing Process:	Fresh or dried plant material is placed into a stainless-steel or copper chamber above another chamber containing water. As the water is heated to boiling using an electric heating apparatus, steam passes up through the plant material and acts as a solvent for the plant's volatile oils. The steam then exits the chamber into a length of metal pipe where it cools, condenses and is collected. Essential oils separate from the water and are removed. The remaining water, now infused with aromatics, is collected and stored in glass containers.		
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.			

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Cannabis Hydrosol
Product Type:	Marijuana Concentrate
Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	<p>Cannabis hydrosol will be packaged in 1oz to 16oz clear or opaque glass bottles with atomizer pump caps. Cannabis hydrosol will contain only trace amounts of THC - generally less than 1% and will be printed on the labels per the testing results. *To be placed into fully opaque and child-resistant exit packaging in compliance with 3 AAC 306.345(a)(3) by the retailer.</p> <div></div>
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	<div><p>Produced by: Rosie Creek Farm License Number: 12511 Product Name: Cannabis hydrosol Packaging Date: Strain: Net MJ Weight: Batch/Lot Number: Gross Weight: License Number: Tested by: CBD: CBDA: CBN: Total THC: THCA: Pesticides: Herbicides: Fungicides: Microbial Test: Contaminants Test Result: Residual Solvent Test: License Number: Retailer:</p><p>Alaska Safety Warning: Marijuana has intoxicating effects and may be habit forming and addictive. Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Cannabis Infused Vegetable Oils		
Product Type:	Marijuana Product - intended for ingestion		
Perishable: Yes/No	Yes	Shelf Life: If perishable.	12 months
Product Description: Details must include the color, shape, and texture.	Cannabis Infused Vegetable Oils will appear as normal vegetable oils with a yellow to green coloration.		
Ingredients: This box is not applicable to marijuana concentrates.	Vegetable oils infused with cannabis leaf and flower.		
Standard Production Procedure and Detailed Manufacturing Process:	Vegetable oil and cannabis will be measured and mixed together by hand or mechanically. The oil mixture will then be added to a slow cooker/crockpot and left to infuse at low heat for a period of time. Plant matter will then be strained from the oil, yielding infused vegetable oil.		
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Product Name:	Essential Oil Infused Rosin		
Product Type:	Marijuana Concentrate		
Perishable: Yes/No	Yes	Shelf Life: If perishable.	12 months
Product Description: Details must include the color, shape, and texture.	Essential oil infused rosin will make standard rosin more dilute and viscous as well as much more aromatic. It will range in color from light yellow to golden yellow and have a sticky, viscous texture.		
Ingredients: This box is not applicable to marijuana concentrates.	Rosin, cannabis essential oil.		
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis essential oil will be measured into a quantity of rosin and incorporated via manual stirring. Food grade materials will be used in all steps.		
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Cannabis Tincture		
Product Type:	Marijuana Product - intended for ingestion		
Perishable: Yes/No	Yes	Shelf Life: If perishable.	12 months
Product Description: Details must include the color, shape, and texture.	Cannabis tincture will appear yellowish to dark green in color. It will be aromatic and fully liquid.		
Ingredients: This box is not applicable to marijuana concentrates.	Cannabis tincture will include food-grade ethanol infused with cannabis leaf and flower.		
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis flower and leaf will be infused in food-grade ethanol for a period of time in a glass, ceramic or stainless-steel container. Cannabis will then be strained from the ethanol, yielding infused ethanol, or tincture.		
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.			

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Cannabis Tincture
Product Type:	Marijuana Product - intended for ingestion
Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	<p>Cannabis Tincture will be packaged in 30ml opaque, glass dropper bottles. ! Serving size will be clearly indicated on the bottle for consumers. ! Approximately 3 dropper fulls(3ml) will equal one serving and 5mg THC. ! Each bottle will contain approximately 10 servings not to exceed 50mg ! THC per bottle. *Bottles to be placed into fully opaque and child-resistant ! exit packaging in compliance with 3 AAC 306.345(a)(3) by the retailer*</p> <div></div>
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	<div><p>Produced by: Rosie Creek Farm License Number: 12511 Product Name: Cannabis Tincture Packaging Date: Strain: Net MJ Weight: Batch/Lot Number: Gross Weight: License Number: Tested by: Total THC: THCA: CBD: CBDA: CBN: Microbial Test: Pesticides: Herbicides: Fungicides: Residual Solvent Test: Contaminants Test Result: Retailer: License Number:</p><p>Alaska Safety Warning: Marijuana has intoxicating effects and may be habit forming and addictive. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.</p><div></div></div>

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Cannabis Salve		
Product Type:	Marijuana Product - intended for topical application		
Perishable: Yes/No	Yes	Shelf Life: If perishable.	12 months
Product Description: Details must include the color, shape, and texture.	Cannabis salve will appear yellowish to dark green in color and be aromatic. It will be smooth and oily to the touch and vary between hard and soft depending on the temperature at which it is stored. Salve is intended for topical use and not for ingestion.		
Ingredients: This box is not applicable to marijuana concentrates.	Cannabis salve will contain cannabis infused vegetable oils and beeswax.		
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis infused vegetable oils will be slightly heated in a slow cooker and mixed with beeswax before being poured into tins and allowed to cool.		
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.			

Section 7 – Proposed Product Packaging and Sample Labels

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Cannabis Salve
Product Type:	Marijuana Product - intended for topical application
Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	<p>Salve will be packaged in 1 oz round, metal tins or glass jars. Each container will hold approximately 10, 5mg servings of THC not to exceed 50mg THC total per container. The ten servings will be clearly demarcated by "pie" shaped line marks imprinted on the salve. Tins will be packaged into resealable, opaque and child-resistant mylar bags.</p> <div></div>
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	<div><p>Produced by: Rosie Creek Farm License Number: 12511 Product Name: Cannabis Salve Packaging Date: Strain: Net MJ Weight: Batch/Lot Number: Gross Weight: License Number: Tested by: Total THC: THCA: CBD: CBDA: CBN: Microbial Test: Pesticides: Herbicides: Fungicides: Residual Solvent Test: Contaminants Test Result: Retailer: License Number:</p><p>Alaska Safety Warning: Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgement. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.</p><div></div></div>

Ingredients: This box is not applicable to marijuana concentrates.	Pre-rolls will contain ground cannabis flowers and leaves, mullein leaves, Artemisia tilesii leaves and flowers, and dry sift hash.		
Standard Production Procedure and Detailed Manufacturing Process:	Measured quantities of cannabis, hash, artemisia, and mullein will be used to mechanically fill pre-rolled hemp paper cones in a cone filling machine. The machine will use vibration to fill the cones with the mixture. Cones will then be removed from the machine, their ends manually twisted shut and packaged.		
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.			

**Section 7 – Proposed Product Packaging and Sample Labels**

Review the requirements under 3 AAC 306.520, 3 AAC 306.565, and 3 AAC 306.570.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Cannabis Mullein Artemisia Hash Pre-rolls
Product Type:	Marijuana Product - intended for inhalation
Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.	<p>The pre-rolls will be approximately 2 1/2 to 5 inches long and contain approximately 10-40% THC by weight. The actual THC content will be listed on the label per the testing results. Pre-rolls will be sold loose to retailers or packaged in either cardboard, plastic tubes, or metal tins and then into opaque, child-resistant and resealable mylar bags. Paper liners and cellophane wrapping may also be used in packaging. Pre-rolls will be packaged either singly or in groups.</p> <div></div>
Sample Labels: Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.	<div><p>Produced by: Rosie Creek Farm License Number: 12511 Product Name: Cannabis Mullein Artemisia Hash Pre-rolls Packaging Date: Strain: Net MJ Weight: Batch/Lot Number: Gross Weight: License Number: Tested by: CBD: CBDA: CBN: Total THC: THCA: Pesticides: Herbicides: Fungicides: Microbial Test: Contaminants Test Result: Residual Solvent Test: License Number: Retailer: License Number:</p><p>Alaska Safety Warning: Marijuana has intoxicating effects and may be habit forming and addictive. Marijuana impairs concentration, coordination and judgement. Do not operate a vehicle or machinery under its influence. There are health risks associated with consumption of marijuana. For use only by adults twenty-one and older. Keep out of the reach of children. Marijuana should not be used by women who are pregnant or breast feeding.</p><div></div></div>

Section 6 – Proposed Marijuana Concentrates and Marijuana Products

Review the requirements under 3 AAC 306.520, 3 AAC 306.525, and 3 AAC 306.560.

Attach a completed copy of this page for each proposed marijuana concentrate or marijuana product.

Product Name:	Mullein Wraps		
Product Type:	Marijuana Product - intended for inhalation		
Perishable: Yes/No	No	Shelf Life: If perishable.	N/A
Product Description: Details must include the color, shape, and texture.	Mullein wraps will be grey-green in color and have the size and shape of a cigar and feel slightly fuzzy. The coloration of the ground cannabis contained within the Mullein Wraps will be primarily shades of green and purple.		
Ingredients: This box is not applicable to marijuana concentrates.	Mullein wraps will contain mullein leaves and cannabis leaf and flower. Wraps will be sealed using small amounts of natural gums such as gum arabic or fruit pectin.		
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis will be hand ground and then be hand rolled in mullein leaves in a process similar to traditional cigar manufacturing.		
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
