

MEMORANDUM

TO: Marijuana Control Board DATE: September 11, 2019

FROM: Erika McConnell, Director RE: Good LLC, #10165, Product
Manufacturing Facility

There are two issues for the board to consider relating to this license.

1. Infused oil approved for retail sale.

Good LLC submitted a new product called “GOOD Coconut Cooking Oil” in July of 2018. It was brought to the board at the meeting of January 24, 2018, and approved.

The product is made by combining “raw unrefined Coconut oil” with “Butane Hash Oil cannabis extract.” The oil is placed in a glass jar with horizontal lines measuring individual servings.

During staff review and at the board meeting, nobody identified the fact that this product violates 3 AAC 306.555(b)(2) which states, “... infused dairy butter, oils, or fats may not be prepared as stand-alone edible products for sale;”

To date, the licensee has produced three production batches of Coconut Cooking Oil, in November and December of 2018. From the three production batches, 1,868 jars of Coconut Cooking Oil were made, tested, and sold to retail stores.

Because this type of product is not permitted by regulation to be sold to retail stores, I recommend that the board amend its approval of the product to limit the sale to wholesale to other product manufacturing licenses.

Attached: “GOOD Coconut Cooking Oil” MJ-16 new product application

2. Single approved product made into multiple product types.

The products the board has approved for this license are as follows:

1. GOOD Capsules
2. GOOD Coconut Cooking Oil
3. GOOD Gummies
4. GOOD Lemon Ginger Drops
5. Ice Water Concentrate
6. Manna Transdermal Patch
7. N-Butane Concentrate
8. Rosin
9. Vape Pen With Oil

The products listed in Metrc that are being produced by the licensee are as follows:

- | | |
|--------------------------|-------------------------|
| 1. Badder | 9. Shatter |
| 2. Crumble | 10. Wax |
| 3. BHO | 11. Bubble Hash |
| 4. Distillate | 12. Sap |
| 5. Dough | 13. Coconut Cooking Oil |
| 6. Ice Water Concentrate | 14. Gummies |
| 7. Live Resin Sugar | 15. Lemon Ginger Drops |
| 8. Rosin | 16. Sugar |

When asked about the production of many of these products which don't appear to have board approval, the licensee wrote the following:

BHO crumble, badder, and live resin sugar are N-Butane Concentrate. The terms crumble, badder, wax, shatter, sugar are all industry descriptors of the texture of the N-Butane Concentrate. The final texture of N-Butane Concentrate can vary depending on multiple factors relating to the starting material that is processed. Factors that affect the final texture of N-Butane Concentrate include strain, age of the product, and type of product (e.g., machine trim versus hand trim). These factors affect the availability of terpenes, cannabinioids, and other compounds during the extraction process. The concentrations of these compounds in the final product ultimately affects the final texture of the N-Butane Concentrate.

The product called "N-Butane Concentrate" was approved at the time the license was approved, on December 7, 2016. The product description states, "A thick, viscous liquid that is typically golden or light amber color. The liquid is allowed to harden, which creates a smooth, glass-like substance. This substance is either processed additionally into a "wax" or measured out in its current state as "shatter" and broken into smaller, half gram or gram containers."

To date, no product produced and sold by Good LLC appears to have been labeled as "N-Butane Concentrate." Other product manufacturers have submitted wax, shatter, sugar, and the like as different products.

I recommend that the board require a separate product approval for each different product label type, so that the only deviation on the label from the approved product name would be the marijuana strain used.

Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

What is this form?

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board approval of a new marijuana product or marijuana concentrate for production at its licensed premises, under 3 AAC 306.100 and 3 AAC 306.525. **The required \$250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the Marijuana Control Board has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the licensed establishment.

Licensee:	GOOD LLC	License Number:	10165		
License Type:	Manufacturing				
Doing Business As:	GOOD LLC				
Premises Address:	1949 Frank Ave				
City:	Fairbanks	State:	AK	ZIP:	99709

Section 2 – Proposed Marijuana Concentrate or Marijuana Product

Review 3 AAC 306.520 - 3 AAC 306.525 and 3 AAC 306.560, and identify how the licensed establishment will meet the listed requirements.

Product Name:	GOOD Coconut Cooking Oil
Type:	Marijuana Edible Product

Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

<p>Product Description: Details must include the color, shape, and texture.</p>	<p>Looks and feels like regular coconut oil - white to off-white solid (hard) oil when below 76 degrees Fahrenheit, clear oil liquid when heated above 76 degrees Fahrenheit. Assumes the shape of the container, oily texture.</p>
<p>Ingredients: This box is not applicable to marijuana concentrates</p>	<p>Organic Virgin Coconut Oil (250mL) Cannabis Butane Hash Oil (BHO) Extract (Will test for potency and adjust accordingly)</p>
<p>Standard Production Procedure and Detailed Manufacturing Process:</p>	<p>Place 250 mL of raw unrefined Coconut oil in a double boiler and set temperature to 220 degrees F. Make sure to keep temperature below 220 degrees F. Mix in Butane Hash Oil cannabis extract, and stir into mixture. Let mixture heat for 1 hour. Check on mixture to note formation of CO2 bubbles that denotes decarboxylation. Stir mixture, and keep heat on until there are no more CO2 bubbles forming. Pour oil into cooling pan and place in the fridge to cool down.</p>
<p>Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.</p>	<p>See attachment</p>

Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product

Section 3 – Proposed Product Packaging and Sample Label

Review 3 AAC 306.565 - 3 AAC 306.570, and identify how the licensed establishment will meet the listed requirements.

<p>Packaging Description: Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Attached photos, drawings, or graphic representations are preferred.</p>	<p>Coconut oil will be packaged in clear child-resistant 70 dram glass jars (Pollen Gear brand). The glass jar will contain 250 ml of infused coconut oil: 10 servings of 25 ml, with each individual serving containing 5mg of activated THC. The transparent jar will have a label applied that will show gradations (horizontal lines) that measure the 10 individual servings. The glass jar will be placed in an opaque paper exit bag.</p>
--	--

<p>Sample Label: Provide a sample label showing how the labeling information required in 3 AAC 306.570 will be set out.</p>	<p>see attachment</p>
--	-----------------------

As a marijuana establishment licensee, I declare under penalty of perjury and falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.
