Green Go, LLC

Green Go received three NOV's in 2018 all relating to smell coming from the facility. We have replaced the air filters, added additional filters, and have resealed all areas of the building where we believe the smell could be coming from. We have been paying attention to our trimming days where the smell seems to be the most pungent and has the tendency to carry the scent a lot easier. We are being extra mindful of having the entrance/exit sealed during those peak smell times.

One of the NOV's came from the exhaust fan going out and not becoming aware of it until after the smell complaint happened. Once the exhaust fan was back up and running the issue was resolved.

Another NOV happened due to the earthquake in 2018. It caused several fittings to become loose or unhinged and caused the ionizers to stop working. HVAC company was called immediately to help find cause and solution.

Green Go has invested thousands in additional expenses to help remediate the smell issues and will continue to do so to keep the smell contained within the premises.
