Response to 3/12/19 NOV:

On February 20, 2019 we discovered widespread infestation of a very damaging pest in all active rooms of the facility. Professional pest management's recommendation was to immediately destroy and remove all infested vegetation in an effort to save any remaining healthy plants. This facility has no waste storage space for the volume of vegetation we had to destroy so we immediately double-bagged and trucked it all to the Anchorage landfill. Our understanding now is that we should be able to call an AMCO investigator and get an emergency inspection in the case of any situation where immediate removal of waste is necessary.
