MEMORANDUM

TO: Chair and Members of the Board

FROM: Glen Klinkhart
Interim Director, Marijuana Control
Board

DATE: January 8, 2020

RE: R.C. Tinderbox, LLC #10301

R.C. Tinderbox, LLC, a marijuana concentrate manufacturing facility, is requesting approval of three new products. Attached is the MJ-16 Proposed New Marijuana Product for each product.

1. Pure Extracts Rosin
2. Pure Extracts Shatter
3. Pure Extracts Vape Cartridge

Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product**What is this form?**

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required \$250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 1 – Establishment Information

Enter information for the business seeking to be licensed, as identified on the license application.

Licensee:	R.C. Tinderbox, LLC	MJ License #:	10301		
License Type:	Marijuana Concentrate Manufacturing Facility				
Doing Business As:	R.C. Tinderbox, LLC				
Premises Address:	7801 King Street				
City:	Anchorage	State:	Alaska	ZIP:	99518

Section 2 – Proposed Marijuana Concentrate or Marijuana Product

Enter information for the marijuana concentrate or the marijuana product for which you are seeking MCB approval.

Product Name:	Pure Extracts Rosin				
Product Type: Choose one.	Marijuana Concentrate				
Perishable: Yes/No	Yes	Shelf Life: If perishable.	n/a		
Intended Use: Smokable/ edible/topical/wholesale/etc.	Inhalation of vaporized concentrate.				

Form MJ-16: Proposed New Marijuana Product

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	Rosin will be a taffy like shape, texture and consistency and will be produced in color gradates of amber varying from dark to light.
Ingredients:	Cannabis plant material, including one or more of the following: cannabis flower, trim, and kief.
Standard Production Procedure and Detailed Manufacturing Process:	Rosin bags are loaded with cannabis plant material. Rosin bags are then exposed to applied heat and pressure. Through this process sappy resin is extracted from the plant material. The sappy resin is then cooled to yield a final product known as rosin. Pressed plant material will be handled and recorded according to the operating plan cannabis waste procedures. Finished rosin will be portioned into packages for distribution.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	<p>Rosin will vary in color and texture.</p> 

Form MJ-16: Proposed New Marijuana Product

Section 4 – Proposed Product Packaging and Sample Label

Enter information for the packaging and labeling of the marijuana product for which you are seeking MCB approval.

Packaging Description:

Details must include the color(s), size, packaging materials used, total amount of THC, individual serving sizes (if multiple), and other specifics showing compliance with 3 AAC 306.565. Please include photos, drawings, or graphic representations.

This product will appear in 0.01 gram to 5.0 grams weights, in varying strains and varying THC amounts. Finished rosin will be wrapped in Parchment Paper and placed in a 3 inch by 4 inch blister pack made of clear plastic (Polyethylene Terephthalate Glycol), with a printed card-stock insert (see Sample Labels below) placed behind the product – which will detail compliance, batch, and strain information. The blister pack will be heat sealed with the product and insert, and will be sold with an opaque paper bag.

**Sample Labels:**

Provide sample labels showing how the labeling requirements set forth in 3 AAC 306.570 will be met.

As a marijuana establishment licensee, I declare under penalty of unsworn falsification that this form, including all accompanying schedules and statements, is true, correct, and complete.

Form MJ-16: Proposed New Marijuana Product

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	Shatter has a solid glass-like texture and consistency and will be produced in color gradates of amber varying from dark to light. Shatter shape is flat and organically amorphous.
Ingredients:	Cannabis flower and/or trim.
Standard Production Procedure and Detailed Manufacturing Process:	Cannabis material is submerged in -40 C (or colder) ethanol for a period of time. The ethanol solution is then subjected to a series of phased filters and dramatic temperature changes to isolate and separate the cannabis fats from the ethanol. The liquid, isolated cannabis fats are then poured onto a sheet tray and placed in a vacuum oven for a period of time. The fats are then removed from the oven and allowed to cool. Processed plant material will be handled and recorded according to the operating plan cannabis waste procedures. Finished shatter will be portioned into packages for distribution.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.	<p>Shatter will vary in color and texture.</p>
