Subject: Possible green house conversion from marijuana to fruits and vegetables

To whom it may concern,

I have been listening to marijuana growers and I have been hearing a growing interest in converting current greenhouses from pot to vegetables and fruit to help our state during the Covid-19 crisis. Ron Bass is one of the growers who is willing to help our state at this time with freshly grown produce. He currently has an empty greenhouse in which; he is willing to plant fruits and vegetables. He knows other growers who are also willing to do the same. Is this something that the board would consider in these difficult times? Please feel free to contact me in regards to this possibility. One of the issues that I am running on, is- when elected, that I intend to help further develop and bring new green industries to our state. What are your thoughts?

Best wishes,

Lyn Franks

Subject: Potential health risks of marijuana inhaled products
Date: Thursday, April 9, 2020 11:52:06 AM

Dear Marijuana Control Board,

I am submitting a comment in advance of your April 10, 2020 meeting: as you are likely aware, the impacts of and characteristics of COVID-19 are still unfolding and will not be fully understood for a long time. However, there is emerging evidence that aligns with common sense: that smoking and vaping products (including tobacco and marijuana) are linked with damage to the lining in the lungs, making them prone to infections and diminished capacity, and are potentially putting current consumers of these products at further risk of serious complications with this virus.

Marijuana stores have been deemed essential businesses, but this raises a serious question: is it smart to allow for continued commercial purchase and consumption of these products, even as emerging and long-established evidence suggests that this will make some people's cases worse?

I put this question to the Board to consider in your deliberations tomorrow, April 10, as part of your duty to balance the interests (particularly financial) of the marijuana industry with the larger health and safety interests of the state. In particular, the implications of loosening any restrictions that would potentially increase consumption of these products during this time, and potential increased load on the health care system if more serious cases develop in the near future. Perhaps more health-oriented ideas could be considered as well: for example, banning sales of combustible or inhaled products for the time being, and allowing only edibles? This would maintain access to these products, and provide a market for processing raw product into edibles, while discouraging people from harmful use. Unfortunately, the latest data from the state's use and attitudes survey (published by DHSS > OSMAP) show that 96% of current consumers are still smoking this product, regardless of what other ingestion or delivery methods they use. This strongly suggests that Alaska's marijuana users are in a higher risk category because they are inhaling combusted smoke.

This is one of several articles exploring the preliminary findings of this correlation.
<https://www.nytimes.com/2020/04/09/health/coronavirus-smoking-vaping-risks.html>

Thank you for consideration of this comment at your meeting tomorrow.

Best,
Anna Brawley

Subject: Public comment on licensing fees
Date: Sunday, April 12, 2020 1:58:54 PM

Hello Marijuana Control Board

Thank you for taking the extra time to meet and discuss Covid 19 impacts to the marijuana industry in Alaska. I would like to ask you to please consider postponing the due date for the licensing renewal fees from June 30 to Sept 30. Business are being hit hard with the downturn in economic activity, and we are looking at potentially missing out on the entire summer tourism season. We are lucky that marijuana businesses have been deemed essential business and allowed to stay open with restrictions. However, many marijuana businesses are also being supported by spouses and partners who work in other industries, who have been laid off and face difficult financial circumstances in the months ahead.

Please consider postponing the licensing fees this year, to help support the industry during this difficult time.

Respectfully
Christina Logan

Subject: Regulation Requirements

Good morning AMCO staff,

I am reaching out with a question about state regulations and board actions. At the Juneau board meeting Green Zone in Kotzebue was approved 3 to 2. Their application had been previously delegated because of the concern it might not meet the 500 foot distance requirement from a children's home. There was conflicting surveys. The applicant said it met the 500 foot distance but the local authorities measured it and it did not meet the 500 foot distance requirement they said. The AMCO board members discussed it and Mr. Jones and Mr. Jaime voted against approval because it did not meet the state distance requirement but the other three members noted that if the city wasn't protesting it then they were ok with it and voted to approve it.

My question and concern is what precedence is the board setting when they approve a license that does not appear to meet the states regulations? It took me a very long time to find a location that met the states requirements and I am concerned that the precedence being set for this license will effect future licensing.

Thank you,

Subject: For the MCB

Sending this to you because there does not seem to be an email for the MCB.

Alaska has always based its number of beverage dispensary licenses on population. The practice, since before statehood, was to address alcohol overconsumption by limiting the number of retail businesses that can sell alcohol.

My question is why isn't the State of Alaska doing the same for cannabis cultivation, manufacturing, and retail?
We are going to end up with a glut in the industry if limits aren't set.
Thank you.

To the AMCO board.

As the owner of the commercial property adjacent to Joyln Jillson's I would like to let the board know that Ms. Jillson continues to be a stellar neighbor who we are grateful to have.

This operation has caused no issues, no smell , no added traffic, no problems for the neighborhood.

I wholeheartedly support the renewal of Ms. Jillson's license #16791 and appreciate the AMCO board's support of a local business in a time where we are few and far between.

Sincerely,

Casey Steinau, owner

Good afternoon, Teri,

I have forwarded your email to Enforcement for clarification.

Regarding being heard by the board, a couple options for you are: you could send an email to the marijuana@alaska.gov inbox, which is for correspondence with the Marijuana Control Board, and should be reviewed by the board at the next regularly scheduled board meeting. And/or you may provide public testimony at a regularly scheduled board meeting. The information for the board meetings is found on our website <https://www.commerce.alaska.gov/web/amco/>.

Thank you,

That's why I want to be heard. We collect a lot of kief and so far we have been instructed that we can use it in our pre-rolls. If we can do that, we should be able to sell it, since we are, in effect, selling it with the pre-rolls.

Good morning, Teri,

I reached out to AMCO Enforcement about kief. Basically, manufacturing and cultivation licenses should be the only ones collecting and packaging kief. Retail stores would only be allowed to package any bulk, already tested kief.

Thank you,

To add another agenda item? I would like to talk about the possibility of selling the kief that we collect when we package product.

Thank you.

Subject: Appeal of Ownership Transfer
Date: Friday, May 22, 2020 1:54:39 PM
Attachments: [MW Appeal.pdf](#)

Good afternoon MCB Members,

Please find the enclosed official appeal (3 AAC 306.095(a)); feel free to contact me regarding any questions or concerns: 907-617-8246.

Mark Woodward

Mark Woodward

Ketchikan, AK 99901

May 22, 2020

Marijuana Control Board
Alcohol & Marijuana Control Office
550 West 7th Avenue, Suite 1600
Anchorage, Alaska 99501

Control Board Members:

I am currently a 34% shareholder of E&M Holdings, LLC, a corporation in Ketchikan, Alaska, that does business as The Stoney Moose (retail license 10873) and Stoney Moose Kitchens (product manufacturing license 16991). Recently I have been assigned to a new position in employment in my private life, and the work location is not only overseas in a sensitive area but also in a profession that requires extreme confidentiality. I could be transferred at any moment starting June 1, 2020, and therefore need to remove myself from ownership of E&M Holdings, LLC, effective immediately. Due to those extenuating circumstances, I would like to officially appeal my ownership transfer under 3 AAC 306.095(a) so that the Director can directly approve my removal from E&M Holdings, LLC, without the typical transfer of controlling interest approval from the MCB as per 3 AAC 306.045(a).

My shares/ownership percentage (34%) would be transferred to Eric Riemer, the current Managing Member of E&M Holdings, LLC, who also is the largest shareholder with myself at this time. All the MJ-17 paperwork is completed, minus the notary signature (which I will complete and submit immediately to the Director if I receive approval from this appeal).

Again, what this appeal would allow me to do is remove myself from all ownership, and allow Eric to become a majority shareholder, with Director approval only. What it provides for me is a more discrete way of leaving, while also allowing AMCO to conduct any investigation needed for this type of transfer before granting approval. I am also more than willing to

discuss this matter further with any MCB Board Member or the AMCO Director/Investigator over the phone: 907-617-8246.

Thank you for your consideration regarding this appeal, as my transfer was unexpected, but something I have been striving towards my entire life. I would also like to officially thank Occupational Licensing Examiner TJ Zielinski for providing various scenarios to help me solve this issue; I truly believe TJ went above and beyond what was required, and I am extremely appreciative.

Sincerely,

Mark Woodward
