RE: Kreative Konfections LLC
License 17389

Kreative Konfections LLC, a marijuana product manufacturing facility, is requesting approval of one new product. Attached is the MJ-16 Proposed New Marijuana Product.

Alaska Marijuana Control Board

Form MJ-16: Proposed New Marijuana Product**What is this form?**

This proposed new marijuana product form is required for a marijuana product manufacturing facility licensee who is seeking Marijuana Control Board (MCB) approval of a new marijuana product or marijuana concentrate for production at its licensed premises, as required under 3 AAC 306.100 and 3 AAC 306.525. **The required \$250 proposed new marijuana product fee may be made by check, cashier's check, or money order.**

This form must be completed and submitted to AMCO's main office prior to production of any new marijuana product or marijuana concentrate. **The proposed new marijuana product may not be produced unless and until the MCB has approved of the product.**

Please note that licensees seeking approval of more than one proposed new marijuana product or marijuana concentrate must submit a separate completed copy of this form and pay a separate fee for each proposed new marijuana product or marijuana concentrate.

Section 3 – Proposed Product Details

Enter information for the marijuana product for which you are seeking MCB approval.

Product Description: Details must include the color, shape, and texture.	Fireweed Extracts FECO (Full Extract Cannabis Oil) has the appearance of a puddle of liquid. Shape conforms to the jar. Color ranges from a dark yellow to black. Generally opaque. Texture is like honey. There may be very small visible crystals present. When frozen, it will become hard, but won't easily shatter into small pieces. Will soften and become a runny liquid as temperatures exceed 60F.
Ingredients:	
Standard Production Procedure and Detailed Manufacturing Process:	A centrifuge is used to soak marijuana plant material in alcohol, then spun to separate the soaking liquid from the plant matter. The liquid is placed in a rotary evaporator and the alcohol is recovered and removed. The remaining concentrate is poured into a jar. After testing, it is weighed into 1/2 gram to 7 gram portions and packaged for sale.
Depiction: Provide a photograph, drawing, or graphic representation of the expected appearance of the final product.
