Amberglass

Type:	Concentrate
Product Description:	Amberglass has a smooth, glass like texture that is hard & brittle when cold (shatters when broken apart) and has the consistency and appearance of honey when warm. Color ranges from yellow to amber. Comes in a variety of strains with varying THC & CBD levels. Used for inhalation, making edibles and topicals.

Packaging:	Cannabis oil is extracted in a closed loop machine using flower or trim with one of the following solvents; Butane, N-Butane, Isa-Butane (or combination of) or Ethanol. The solution is strained & purged to remove all plant matter and remove solvents to below regulated ranges (3 AAC 306.645) from the product. The concentrated oil is placed in a vacuum at a warm temperature for approximately 5-6 days to complete the manufacturing Process.
