BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF ALASKA:

THE ACT FOLLOWS ON PAGE 1
AN ACT

Relating to the prescription of opioids; relating to voluntary nonopioid directives; relating to the controlled substance prescription database; relating to the practice of dentistry; relating to the practice of pharmacy; relating to the practice of medicine; relating to the practice of podiatry; relating to the practice of osteopathy; relating to the practice of nursing; relating to the practice of optometry; relating to the practice of veterinary medicine; relating to the duties of the Board of Pharmacy; relating to pharmacists; relating to the definition of "practitioner"; providing for an effective date by repealing the effective date of sec. 73, ch. 25, SLA 2016; and providing for an effective date.

* Section 1. The uncodified law of the State of Alaska is amended by adding a new section to read:
LEGISLATIVE INTENT. It is the intent of the legislature that the seven-day supply limit for an initial opioid prescription under secs. 5, 16, 22, and 33 of this Act and the four-day supply limit for an initial opioid prescription under sec. 28 of this Act may not be considered as a minimum length of time appropriate for an initial prescription. The United States Centers for Disease Control and Prevention guidelines state that a three-day initial prescription of an opioid is sufficient for most cases of acute pain. The United States Centers for Disease Control and Prevention reported in its March 17, 2017, weekly report that the likelihood of a person's chronic opioid use increases with each additional day of medication supplied after the second day. Practitioners should use their professional judgment in each case and not interpret the seven-day limit as a direction to prescribe the full seven days or the four-day limit as a direction to prescribe the full four days.
